BIOCHEMISTRY

By W. E. Cornatzer
HISTORY OF BIOCHEMISTRY DEPARTMENT

1951-1982

BY

W. E. CORNATZER, PH.D., M.D.
PROFESSOR AND CHAIRMAN, DIRECTOR
IRELAND RESEARCH LABORATORY
CHESTER FRITZ DISTINGUISHED PROFESSOR
The Biochemistry Department was organized July 1, 1951. In the spring of 1951 the Accreditation Committee of the American Association of Medical Schools recommended that the Basic Science staff had to be expanded and that a Department of Biochemistry be established in the Medical School. Up to that time Physiological Chemistry was taught in the Chemistry Department. Wilbur F. Potter, Ph.D., M.D., Dean of School of Medicine and President John C. West, appointed W. E. Cornatzer, Ph.D., M.D. to be Professor and Chairman of the new department. Dr. Cornatzer obtained his Ph.D. in Biochemistry in 1944 and completed two years of Medicine from the University of North Carolina in 1946. He became Assistant Professor, Bowman Gray School of Medicine, 1946 to 1951 and completed his M.D. in June, 1951.

The objectives and goals of the Department of Biochemistry have been to create a center of excellence in Biochemistry and to excel in teaching, research and services.

The Department of Biochemistry was to be organized for the teaching of medical and graduate students and research. A laboratory for Clinical Chemistry was established to do analyses on bloods and urines for hospitals in the State. The Department's teaching facilities and research area were shared in the Physiology-Pharmacology Department. Plans were made for the expansion or doubling of the Basic Science Building. State funds were provided for teaching laboratory equipment, instrumentation, and the hiring of a second staff member, Dr. John P. Davidson, October 1, 1951. Dr. Davidson was a graduate of the University of Michigan, Biochemistry Department. A laboratory manual was written, chemicals and equipment ordered and a teaching laboratory for Medical Biochemistry was set up in the Physiology Department in time for the first class in September of 41 medical students. As part of the Clinical Chemistry Laboratory, the first flame photometer for sodium and potassium analyses in the State was placed in the new St. Michael's Hospital.

The Medical School received full accreditation in the fall of 1951. A Master's degree program was approved by the Graduate School and the first graduate student, Duane Gallo, enrolled. Duane Gallo had taken some graduate courses in the fall of 1951 in the Chemistry Department. He became a full-time graduate student on February 1, 1952, and was awarded a Research Fellowship with a $2,000 stipend for 12 months. October 1, 1951, a $27,400 grant was given by the North Dakota Cancer Society to study Metabolism in Experimental Cancer and provide permanent equipment for research and a radioactive isotope laboratory for the Department. These funds provided the first Geiger Counter in the State to do radioactive iodine uptake in patients in the Deaconess Hospital. On October 25, 1951, a $17,450 grant from the U.S. Public Health to study the "Effect of Drugs and Hormones on the Phospholipide Turnover in Animals and Man" for two years and December 1, 1951, a grant from the U.S. Atomic Energy for $22,572 to study "The Effects of Radiation on Functional Capacity of Tissue" were awarded to Dr. W. E. Cornatzer.

On June 16, 1952, Dr. Cornatzer was asked to contribute to a symposium at Johns Hopkins University, Vol. II, "Role of Phosphorus Metabolism in Plants and Animals", edited by W. D. McElroy and Bently Glass, Johns Hopkins Press.
In July 1952, Dr. Cornatzer was awarded a Travel Grant of $740 to attend the Second International Congress of Biochemistry in Paris, France, July 21-27. He was one of eight young biochemists, out of 100 applicants, to receive the award given by the American Association of Biological Chemists.

The September 1952-53 Medical School Catalog listed the following Biochemistry courses:

Medical Biochemistry 333 - 7 credits; Food Chemistry 334 - 6 credits; Advanced Biochemistry 501-502 - 6 credits; Radioactive Tracers in Biochemistry 503 - 3 credits; Research in Biochemistry 510-511 - 2-6 credits; Seminar in Biochemistry 521-522 - 1 credit.

In the fall of 1952, Orlyn Engelstad became the first Graduate Teaching Assistant. In 1953 the Department of Biochemistry moved into the new Medical Science addition with 6,000 square feet of floor space for offices, research laboratories, a teaching laboratory with a walk-in coldroom. State funds were made available for the addition of a third staff member and three graduate students were enrolled. Fred Snyder, a graduate student, obtained the first three year Pre-doctorate Fellowship from the National Institutes of Health in 1955. The first U.S. Office of Education National Defense Education Act Fellowship was awarded to two graduate students, Virginia Zewe and Eric Glende for three years in 1960. Subsequently, four were awarded in 1962 and 1963. These funds provided, in addition, salary money for instructors, Dr. Carol L. Dahl, Dr. Mary Harsch and Dr. Akira Mochizuki. Dr. Mochizuki spent full-time in research working with Dr. Ya-Pin Lee. The first fellowship for medical students to do research in the summer months was awarded to the Department in 1954 for Ross D. Halliday by the National Institutes of Health.

The first National Science Foundation grant for undergraduate participation in research was awarded to the Department in 1959 to George Sarosi and Reed Keller. The first National Science Foundation Research Participation High School Teaching Training Fellowship was awarded in 1961 for 3 teachers, one each to Drs. Jacobs, Dr. Cornatzer, and Mrs. Luper. The National Institutes of Health awarded to the Department the first fellowship in 1959 for First-Year Medical Students to do research and obtain a Master's degree. David Rinn was awarded this fellowship. The National Institutes of Health awarded to the Department a Training Grant for graduate students working on their doctoral degree in 1962. These funds provided research fellowships for 8 students for 8 years.

On February 20, 1953, Guy and Bertha Ireland gave to the Department $11,200 for scientific equipment for research. An instrument room in the new Medical Science Building which was under construction was designated the "Guy and Bertha Ireland Laboratory for Cancer Research". The laboratory was completed and dedicated on May 7, 1956, with a lecture entitled "Biochemistry of Energy Transfer" by Dr. Fritz Lipmann, Nobel Prize Laureate in Medicine and Physiology. In May 1957 Mrs. Bertha Ireland gave $75,000 to the Ireland Research Laboratories. In November, the Department of Health, Education and Welfare gave $75,000 for the construction of a first floor of 5,000 square feet of floor space for the Ireland Research Laboratory. Fifty thousand dollars from Medical Center State funds provided for the footings and other designs so that additional floors to the laboratory could be added later. The first floor provided two offices for additional staff, common centrifuge laboratory, and
radioisotope laboratory, walk-in coldroom and seven other research laboratories. The building was dedicated in February 1959 with a lecture by Dr. James Frederick Danielli, Kings College, London. Dr. Danielli is noted for his lipid bi-layer of membranes.

The Medical School Catalog in September, 1956, shows that Duane Gallo and Fred Snyder were Research Assistants. In September 1956 an undergraduate biochemistry course was first initiated. The course in 1982 has 70 undergraduates enrolled with a separate Biochemistry Laboratory course with 25 students enrolled. In Spring of 1956 Dr. Herbert J. Fromm taught the graduate course 508 Enzyme Chemistry.

In 1961 Dr. Cornatzer obtained from the Hill Foundation funds for first Hill Research Professorships of $150,000 for salary for 11 years. Dr. Robert C. Nordlie, University of Wisconsin, Enzyme Institutes, accepted this appointment January 1, 1962. In September 1963 Dr. Nordlie received a grant from National Institutes of Health of $13,404/year to study "Liver Pyrophosphatase-Phosphotransferase Activities". This was the beginning of his study of the enzyme glucose-6-phosphatase which regulates blood sugar. In 1963 Dr. Herbert J. Fromm received a National Institutes of Health Career Development Award. The Career Development Award made State funds available for the addition of the fifth staff member to the Department, Dr. Jerald L. Connelly. In September 1, 1963, he transferred his National Institutes of Health research grant of $20,600 from University of West Virginia Medical School.

In 1962 Dr. Cornatzer obtained from the Hill Foundation in St. Paul, Minnesota, $150,000 salary funds for a 10-year period for the establishment of a Second Hill Research Professor. Ya-Pin Lee, M.D., Ph.D., University of Wisconsin, Enzyme Institute accepted this position June 1, 1963. Dr. Lee transferred from the University of Wisconsin a $12,370 grant from National Institutes of Health to study "Hormones on Carbohydrate Metabolism". In 1961, $402,000 was awarded to Dr. W. E. Cornatzer from the National Cancer Institute for the construction of a three-floor addition to the Ireland Research Laboratory of 15,000 square feet of floor space in an open laboratory arrangement. Each floor has 10 research laboratory rooms with a central bench with five chemical hoods. The research work is to be carried out in enzymology, membrane permeability and lipid chemistry, ultra-structure of the cells, cancer viruses, drug metabolism, tissue culture, histochemistry and circulation of body fluids. Medical center funds provided $30,000 for construction of the fourth floor and $60,000 from a grant to Dr. Robert G. Fischer from National Cancer Institutes to provide a Viral Laboratory.

The goals of the Ireland Research Laboratory were to investigate the basic molecular biology of the cell during growth and development. The laboratory was completed in 1963 with dedication lectures given May 2 by Nobel Prize Laureates, Dr. W. Stanley and Dr. Arthur Kornberg. Mrs. Bertha Ireland endowed the Ireland Laboratory, July 24, 1963, with $15,000 of securities. The income from these funds has provided guest lecturers ($1350/year). In 1977 Dr. Cornatzer obtained the Robert Massee endowed Nutrition Lectureship of $10,000 of Standard Oil securities. These funds provide $850/year for an annual lecture in nutrition for the Medical School.

In July, 1967, Dr. Paul D. Ray joined the Department of Biochemistry as a staff member. He transferred from the University of Wisconsin, the American
Heart Established Investigatorship, a salary grant of $86,000 for 6 years with additional funds for his research use. He also was awarded in 1967 from the National Institutes of Health a $40,483 grant to study "Hormones on Carbohydrate Metabolism".

In 1967, Dr. Jerald L. Connelly, received a Career Development Award for 5 years from the National Institutes of Health. This provided his salary and freed State funds to hire an additional staff member, Dr. John E. Dyson. In 1968 Dr. Dyson received an equipment grant of $3,036 from Research Corporation, Chicago and $25,000 from the National Science Foundation to study "Chemical and Physical Properties of 6-Phosphogluconate Dehydrogenase".

On April 2, 1964, Dr. W. E. Cornatzer testified before the U.S. Senate Committee on Appropriations on "Expanded Program of Research in Food and Nutrition". In July 1962 Dr. Cornatzer was asked to be a member of the Human Nutrition and Consumer Use Research Advisory Committee, U.S. Department of Agriculture. In April, 1976, funds were made available by the U.S. Department of Agriculture for planning a Human Nutrition Laboratory to be built at the University of North Dakota from a bill introduced by Senator Milton Young. April 9, 1969, bids were let for the construction of this $633,000 facility with a staff of 40 that will include 10 scientists with a $500,000 per year operating budget. The original building had 20,640 square feet of floor space and in 1976 an additional 6,720 square feet of floor space was added. In September 15-17, 1970, the Human Nutrition Research Laboratory was dedicated with a Symposium of 17 scientists as speakers. This laboratory was the first major scientific center dedicated solely to the study of trace elements. Harold H. Sandstead, M.D., was appointed Director of the Laboratory. The Proceedings of the Symposium were published, as a book, Newer Trace Elements in Nutrition, edited by Dr. Walter Mertz and Dr. W. E. Cornatzer, 1971, Mercel Dekker, Inc., New York, pp. 438. The staff in the Human Nutrition Laboratory have appointments in the Biochemistry Department. Currently, the laboratory is being tripled in size. The total laboratory space available for research with the new addition is 75,685 square feet of floor space. In 1982, the laboratory has a 1 million dollar per year budget as a Cooperative Agreement with the University of North Dakota.

The National Institutes of Health Training Grant of 1962 and the beginning of the U.S. Office of Education National Defense Education Act Fellowship, along with Research Grant Fellowships, resulted in 30 full-time graduate students enrolled in 1967. Twenty graduate students or more were enrolled full-time each with a fellowship between 1963-1969. The staff has supervised between 1951-1982, sixty-four Master's degree theses and fifty-six Ph.D. dissertations. The names of Master's degree students and Ph.D. degree students, titles of theses and dissertations, staff advisory with year of graduation are given in Tables. In addition, the staff of the Department has trained twenty-one Post-doctorate students between the years of 1957-1982.

The staff has published 293 full-length publications from 1951-1982. This includes 26 contributions to books. The number of publications of each staff member is given in a table.

As recognition for research and creative work the Department of Biochemistry was awarded the "McDermott Award for Excellence in Research and Creative Work" on Founder's Day, February 1968. This was the first award given by
the University. The Department received this award again ($1,500), for excellence in research and creative work at Founder's Day in 1981. Two of the staff were awarded Chester Fritz Distinguished Professorships, Dr. W. E. Cornatzer, 1973 and Dr. Robert C. Nordlie, 1974. The Society of Sigma Xi has awarded the following staff "Individual Excellence in Scientific Research", 1969 Dr. Robert C. Nordlie; 1970 Dr. W. E. Cornatzer; 1973 Dr. Ya-Pin Lee; and 1982 Dr. Francis A. Jacobs. The staff has served on numerous national scientific committees and have received many scientific awards (see listing under each staff member's name).

The total research grant funds for professorships and fellowships, awarded to staff for 1951 to 1982 is $6,657,605. These monies have provided the funds for equipment, animals, supplies, and research fellowships for graduate and postdoctorate fellows. Not included in this is the funds for the construction of the Human Nutrition Laboratory.

The Professorship funds provided the salary money for Dr. Robert C. Nordlie, Hill Foundation Research Professor 11 years, Dr. Ya-Pin Lee, Hill Foundation Research Professor 10 years; Dr. Herbert J. Fromm, Career Development Award 4 years; Dr. Jerald L. Connelly, Career Development Award 6 years; and Dr. Paul D. Ray, American Heart Established Investigator 6 years. Clinical Chemistry funds provided part of the salary of Miltza Luper for 20 years.

A table is given showing the amounts of research funds awarded to the individual staff members.

The Biochemistry Training Grant funds (1962-1969), the Ireland Lecture Endowment, Robert Massee Endowed Nutrition Lectureship and Industry funds have provided 108 scientists to visit and lecture in the Biochemistry Department. There have been 9 Nobel Prize winners in this Biochemistry lecture series 1961-1982. The detailed list of these lectures is given.

Bibliography references of the staff in the Department of Biochemistry can be found in:

Dr. W. E. CORNATZER, MEMBERSHIPS OF NATIONAL COMMITTEES

1. American Chemical Society, Cooperative Examination Biochemistry, Examination Committee (1959).
2. Member of Board of Directors of American Board of Clinical Chemistry (1960-66).
8. Member of National Science Foundation Evaluation Panel, National Science Foundation Grants (1960-61, 1968-69).
11. Member of Grant Review and site visit for Medical Research Council of Canada, University of Manitoba, 1970 and 1974.

DR. W. E. CORNATZER, NATIONAL SCIENTIFIC AWARDS AND HONORS

5. National Science Travel Award to the Seventh International Congress of Biochemistry, Tokyo, Japan, August 1967.
8. Sigma Xi, University of North Dakota Outstanding Scientific Research Award, February 27, 1970.
9. Distinguished Service Award, Faculty of the University of North Carolina, School of Medicine, May, 1970.
10. American Institute of Nutrition Travel Award to Ninth International Congress of Nutrition, Mexico City, September, 1972.
11. Golden Apple Award Outstanding Professor, 1975, Student American Medical Association.

DR. ROBERT C. NORDLIE, MEMBERSHIP OF NATIONAL COMMITTEES

1. Member of Examination Committee, Division of Biological Chemistry, American Chemical Society.
2. Chairman, Hudson Award Committee, American Chemical Society.
4. Member Editorial Board of the International Journal, Biochimica et Biophysica Acta, (1972 to present date), Managing Editor, Summer 1980.
5. Member of Biochemistry Study Section, Division of Research Grants, National Institutes of Health (1975-1979).
6. Member of National Institutes of Health Site Visit at Dept. of Biochemistry and Molecular Biology, University of CA, Irvine (1978); Dept. of Biochemistry, University of Chicago (Oct. 1979); Department of Pediatrics, Case Western Reserve University, Cleveland (1977); Dept. of Biochemistry, Case-Western Reserve and Dept. of Pediatrics, Univ. of Oregon (1978); Bronx N.Y. V.A. Hospital, Alcohol Unit (1981).

DR. ROBERT C. NORDLIE, NATIONAL SCIENTIFIC AWARDS AND HONORS

5. Visiting Professor, San Marcos University, Lima, Peru, Jan.-Feb., 1982.

DR. PAUL D. RAY, MEMBERSHIP OF NATIONAL COMMITTEES

1. Member of the Arthritis, Metabolism and Digestive Diseases Study Section, National Institutes of Health (1967-1972).

DR. PAUL D. RAY, NATIONAL SCIENTIFIC AWARDS AND HONORS

DR. FRANCIS A. JACOBS, MEMBERSHIP OF NATIONAL COMMITTEES

2. Member of Panel for the National Science Foundation for Research Participation Program of High School and College Programs, 1964 and 1969.

DR. FRANCIS A. JACOBS, NATIONAL AWARDS AND HONORS

4. Travel Award from Western Hemisphere Nutritional Congress II, San Juan, Puerto Rico, 1968.
5. Travel Award from American Chemical Society to attend Regional Officer's Meeting, Zion, IL, Nov. 1970.
7. American Institutes of Nutrition Travel Award to attend the IX International Congress of Nutrition, Mexico City, Mexico, Sept. 3, 1972.
8. Travel Award, University Faculty Research Committee, International Symposium on Metabolic Effects of Alcohol, Milan, Italy, April 26, 1979.
9. Travel Award, University of North Dakota School of Medicine VA Fund, International Symposium on Biological Aspects of Metals and Metal Related Diseases, Toronto, Canada, October, 1981.
10. Sigma Xi, University of North Dakota Outstanding Scientific Research Award, February, 1982.

M.S. DEGREES AWARDED FROM THE DEPARTMENT OF BIOCHEMISTRY
1951-1982

1. Duane G. Gallo (1952) Ph.D.*
2. Orlyn D. Engelstad (1953) M.D.
3. Fred L. Snyder (1955) Ph.D.
4. Miltza Luper (1956)
5. Robert C. Nordlie (1957) Ph.D.
6. Eli Kaplan (1957) Ph.D.
7. Lyle J. Coen (1958)
8. Sister Rita George (1958)
9. David A. Rinn (1959) M.D.
10. J. Michael Poston (1960) Ph.D.
11. Raymond C. Flaa (1960) M.D.
15. Eric A. Glende (1962) Ph.D.
17. William G. Tarnasky (1962) M.D.
20. Kwane Buahene (1962) M.D.
22. Frederick E. Varricchio (1964) Ph.D.
23. William J. Arion (1964) Ph.D.
25. Paul M. Bowden (1965)
26. Joe A. Bowden (1965) Ph.D.
27. Curtis H. Hallstrom (1965) Ph.D.
28. Dean J. Danner (1965) Ph.D.
29. Wayne B. Anderson (1965) Ph.D.
31. James E. Miller (1965) Ph.D.
32. Lee-Jing Chen (1965) Ph.D.
33. Heng Chun Li (1965) Ph.D.
34. Thomas L. Hanson (1965)
35. James F. Soodsma (1965)
36. Jerald A. Bietz (1966)
37. Ming-hwei Wang (1966)
38. Michael L. McDaniel (1966) Ph.D.
40. James D. Johnson (1967) Ph.D.
41. Elwood E. Largis (1967) Ph.D.
42. Roy E. Snode (1967) Ph.D.
43. Judy L. Evans (1967)
44. James R. Gilsdorf (1968) M.D.
45. Chung-Yuan Liu (1968) Ph.D.
46. Richard J. Paur (1968) Ph.D.
47. Tsun Wen Wang (1969) Ph.D.

49. Mary F. Miller (1969)
50. Su-Mei Huang (1969)
52. Elizabeth B. Proctor (1971)
53. Richard Rottschafer (1971) M.D.
54. Robert A. Brunsvold (1972) M.D.
55. Patrick C. Choy (1972) Ph.D.
56. Ronald W. Bryan (1973) M.D.
57. Craig B. Fabel (1973) M.D.
58. John M. Haun (1973)
59. Thomas W. Winter (1975) M.D.
60. Thomas E. Thoreson (1975)
61. Wing Cheun Lau (1975) Ph.D.
62. Carol R. Overvold (1975)
63. Eric O. Uthus (1976) Ph.D.
64. James R. Maxwell (1976) Ph.D.
65. Fair A. Meeks (1976) M.D.
66. Harvey Hwang (1977) M.D.

*The degree after each name has subsequently been awarded.

POST-DOCTORATE TRAINING--THE STAFF OF THE DEPARTMENT HAS TRAINED 21 POST-DOCTORATE STUDENTS:

LIST OF POST-DOCTORATES TRAINED IN BIOCHEMISTRY (1957-1982):

2. Akira Mochizuki, M.D., Shinshi University, 1950, Japan. 1963-1965, research with Dr. Ya-Pin Lee.

3. Tunekazu Takahasi, M.D., Nippon Medical School, Tokyo, Japan. 1955-1956, research with Dr. Ya-Pin Lee.

5. Peter Bally, Ph.D., Bern, Switzerland, 1967-1968 research work with Dr. Robert C. Nordlie.

17. Dennis R. Hoffman, Ph.D., University of North Dakota. 1979 to Nov. 15, 1980, research work with Dr. W. E. Cornatzer.

18. Jasbir Singh, Ph.D., University of Otago, New Zealand, Sept. 15, 1980 to present date, research work with Dr. Robert C. Nordlie.

BIOCHEMISTRY DEPARTMENT LECTURE SERIES FOR MEDICAL STUDENTS, GRADUATE STUDENTS, AND MEDICAL SCHOOL FACULTY. (1961-1982)

Speakers for the 1961-1962 series included: Fritz Lipmann (Rockefeller), Halvor H. Christensen (Michigan), and Sam Kirkwood (Minnesota).

Speakers for the 1964-1965 series included: Merton F. Utter (Western Reserve), Frank Huennekens (Scripps Clinic), Herbert E. Carter (Illinois), Oscar Touster (Vanderbilt) Konrad Bloch (Harvard), Camillo Artom (Bowman Gray).

Speakers for the 1965-1966 series included: Harland Wood (Western Reserve), Claude A. Ville (Harvard), Henrik Dam (Copenhagen), Edmund S. Nasset (Univ. Rochester), David M. Greenberg (Univ. Calif.).

Speakers for the 1966-1967 series included: K. Bruce Jacobson (Oak Ridge National Laboratory), Carl S. Vestling (Iowa), Albert Lehninger (Johns Hopkins), Joseph Larner (Minnesota), Halvor H. Christensen (Michigan), Robert A. Harte (Am. Soc. Biological Chemists), and LaVell Henderson (Minnesota).

Speakers for the 1967-1968 series included: Jordi Folch-Pi (Harvard), Martin Morrison (Univ. of Tennessee, Medical School), Ralph T. Holman (Hormel Institute), William D. McElroy (Johns Hopkins), Henry Lardy (Univ. of Wisconsin), Kenkichi Tomita (Japan), William E. Lands (Michigan), A. Baird Hastings (Harvard).

Speakers for the 1968-1969 series included: Abraham White (Albert Einstein College of Medicine), Ralph A. Nelson (Mayo Clinic), Bernard L. Horecker (Albert Einstein College of Medicine), Robert C. Baldridge (Temple), Frederick John Stare (Harvard), Eugene H. Cordes (Univ. of Indiana), Ernst A. Noltmann (California), Laurens Van Deenen (Netherlands), Robert W. Holley (Cornell-Salk Institute).

Speakers for the 1969-1970 series included: Robert I. Henkin (National Heart Institute), Ear. R. Stadtmann (National Heart Institute), Robert E. Olson (St. Louis University), Hector F. DeLuca (University of Wisconsin), Van R. Potter (University of Wisconsin).

Speakers for the 1970-1971 series included: E. J. Underwood (Univ. of Western Australia, Nedlands), D. M. Hegsted (Harvard University), B. L. Vallee (Harvard Univ.), M. S. Scott (Cornell University), O. A. Levander
Speakers for the 1971-1972 series included: Paul Walter (Univ. Bern), Nelson D. Goldberg (Minnesota), George V. Mann (Vanderbilt), Ronald L. Hanson (Harvard), M. C. Blanchaer (Manitoba), Charles H. Best (Toronto).

Speakers for the 1974-1975 series included: Grace A. Goldsmith (Tulane), Christian deDuve (Rockefeller Univ.).

Speakers for the 1976-1977 series included: Dennis P. Burkitt (St. Thomas Hospital Med. Sch., London), Eric J. Underwood (Univ. of Western Australia), Henry Lardy (Univ. of Wisconsin).

Speakers for the 1978 series included: Merton F. Utter (Case Western Reserve as a Wellcome Visiting Professor for 3 days ($1773 grant), Gilbert A. Leveille (Michigan State Univ.), Darold D. Holten (Univ. of California), Wayne B. Anderson (National Cancer Institute).

Speakers for the 1979 series included: Philip P. Cohen (Univ. of Wisconsin)--AOA four day visiting professor, Alfred E. Harper (Univ. of Wisconsin), Andrew V. Schally (Veterans Administration, New Orleans).

Speakers for the 1980 series included: Julius Axelrod (National Institute of Mental Health), Boyd L. O'Dell (Univ. of Missouri), Ken Tomita (Univ. of Kyoto, Japan).

Speakers for the 1981 series included: John Lenard, Douglas Miller (Rutgers Med. Sch.), Julius Adler (Univ. of Wisconsin), Bengt E. Gustafsson (Karolinska Institute) Stockholm, E. Thackery Pritchard (Univ. of Manitoba), Victor Herbert (State Univ. of N.Y. Downstate Medical Center), Fred Snyder (Oak Ridge Associated Universities).

Speakers for the 1982 series include: J. R. Prohaska (Univ. of Minnesota Med. Sch.), Patrick C. Choy (Univ. of Manitoba), Jim Buckner (Metabolism and Radiation Research Laboratory).
HUMAN NUTRITION RESEARCH CENTER, U.S. DEPARTMENT OF AGRICULTURE
(1982)

HAROLD H. SANDSTEAD, M.D., Research Professor of Biochemistry, Director, Human Nutrition Laboratory.

LESLIE KLEVAY, M.D., D.S. in Hygiene, Research Instructor, Biochemistry, Research Medical Officer.

FORREST H. NIELSEN, Ph.D., Research Instructor, Biochemistry, Research Chemist.

GARY EVANS, Ph.D., Research Instructor, Biochemistry, Research Chemist.

WILLIAM T. JOHNSON, Ph.D., Post-doctorate Research Associate, Biochemistry.

WING CHEUN LAU, Ph.D., Post-doctorate Research Associate, Biochemistry.

188. "Effect of Thyroid Hormones on Amino Acid and Protein Metabolism. II. Glutamate Concentration in Rat Tissues after Thyroidectomy and Thyroid Hormone Treatment", Akira Mochizuki and Ya-Pin Lee, Endocrinology 87, 816-819 (1970).

232. "L-Glycerol-3-Phosphate Dehydrogenase. III. Studies on the Immuno-

235. "Choline Phosphotransferase and Phosphatidyl ethanolamine Methyl-

242. "L-Glycerol-3-Phosphate Dehydrogenase. III. Studies on the Immuno-
logical Differences of Nicotinamide Adenine Dinucleotide Linked-L-

244. "Mammalian Carbamyl Phosphate:Glucose Phosphotransferase and Glucose-

Dr. W. E. Cornatzer set up a Clinical Chemistry Laboratory in the area of service for hospitals, clinics and physicians. Dr. Cornatzer became a licensed Clinical Chemist in 1952 and served on the National Board of Certification of Clinical Chemists in the U.S. (1960-1966). This laboratory did clinical chemistry analyses on urines and bloods. Special chemistry analyses were set up so that blood and urine samples would not have to be sent out of state; this reduced the turn around time necessary to report the laboratory data. This laboratory was the first in the state to determine serum sodium and potassium by flame photometry, serum electrophoresis, serum protein immunoelectrophoresis, serum lipoproteins, serum triglycerides, SGOT and SGPT, serum isoenzymes, urine 17-ketosteroids, serum protein bound iodine, radio-immunoassay for hormones, serum magnesium, urinary estrogens and many others. The Clinical Chemistry Laboratory did 5,000 to 7,000 tests annually. The income from these laboratory tests provided funds to the Department of Biochemistry for chemicals, equipment, travel, postage, salaries and other unexpected expenditures for over 25 years.

Miltza Luper, a registered medical technologist, who has a Master's degree in Biochemistry, supervised this laboratory (1959-1980). She set up and tested new procedures for clinical chemistry as they appeared in the literature. The laboratory was accredited and licensed both by the federal government and State of North Dakota (1967-1980). The Federal Government passed a law of licensure of clinical chemistry laboratories in 1967. The following is a list of medical technologists who worked in this laboratory:

MEDICAL TECHNOLOGISTS IN CLINICAL CHEMISTRY 1953-1982:

Carol Simonson Goven 1953-1954
Myra Janke Rada 1956-1960
Marilyn Bates Merbach 1957-1958
Carol Arter Brown 1958-1960
C. Wendell Pope 1958-1960
Jo Lobb Ebentier 1959-1960
Virginia Garrett 1960-1964
Marilyn Elofson 1960-1962
Ruth Kyllo 1960-1963
Marilyn E. Thibeault 1962-1966
Mrs. Charles Bassom 1965-1966
Karen Oren 1965-1968
Meredith Dubuque 1966-1968
Sharon Oien 1966-1967
Charlotte Flemming 1966-1968
Mitzi Dahle 1968-1970
Mary Schneider 1969-1972
Nicolette Nelson 1967-1972
Jane Ahlin 1970-1972
Jean C. Bitney 1971-1972
Joy Currie 1970-1971
Debbie McPherson 1971-1974
Lila Chakrobarty 1972-1974
Marilyn Mathsen 1972-1974
Linda Anne Rubin 1974-1975
Karen Hansen 1975-1977
Linda Fay Green 1975-1977
Jean A. Miller 1972-1977
Christine Briedlander 1977-1978
Edith Green 1977-1980
Julie Kvitne 1977-1980
Krista L. Botsford 1979-1979
Carol Gaudry 1981-1981
Lori Sollom 1980-1982

A LIST OF RESEARCH TECHNICIANS WHO HAVE WORKED IN THE DEPARTMENT OF BIOCHEMISTRY:

RESEARCH TECHNICIANS:*

Eileen Simonson Nelson 1952-1953
Beverley Teter 1963-1965
Elaine June Bowden 1964-1966
Lin Lin Lee 1964-1966
Martin Glynn 1967-1970
Judy Haning 1978 to present
Beth Ann Hoffman 1979
Vicky Hodson 1970-1981

LABORATORY WORKERS:

Osa Davis 1961 to present
George Davis 1965 to present

*There are numerous students and others who worked as research technicians from 1951-1982, however, employment records in the Department are not available.
