JARAI AS A MEMBER OF THE MALAYO-POLYNESIAN

FAMILY OF LANGUAGES

That some of the mountain languages of South Viet Nam are members of the Malayo-Polynesian language family has apparently been known by the French for some time. This fact, however, and the data on which it is based, are not so well known elsewhere.

In February and March 1956, I had the privilege of visiting South Viet Nam, and recording word lists in some of the mountain languages there. During this trip, I was given a list of 234 words in the Jarai language by Mr. Grady Mangham, of the Christian and Missionary Alliance mission. In spite of the fact that I have not had opportunity to check personally the phonemicization of this list, even a cursory comparison of it with Malayo-Polynesian languages reveals a high number of probable cognates.

Since the most convenient point of reference available to me at the time was a translation of Dempwolff's word list of Proto-Malayo-Polynesian done by Miss Christine Laurens and Miss Trudy Pauwels, I checked the entire Jarai list with Dempwolff. The results, I felt, were of sufficient value and interest so that they should not be withheld from interested scholars, whatever may be their reservations with regard to the validity of Dempwolff's reconstructions or the phonemicity of the Jarai materials.

In the Dempwolff materials we have used Dyen's orthography. In the Jarai materials we have used Mangham's orthography except for the "whiskered o", which we have written as e, and one or two infrequent symbols which will require later clarification.

These, then, are the correspondences observed. A list of apparent discrepancies will follow.

1. Vowels.

Only a and e appear in the first syllable of disyllabic Jarai word bases. e characteristically replaces all original vowels in this syllable except *a, *qudip 'live, alive', Jar. hedip; *hajeN, hujiN 'charcoal', Jar. hedang; *kapas 'cotton', Jar. kepaih; *t/ulaN 'bone', Jar. telang; *batuk 'cough', Jar. hetuk; Indo. rusa 'deer', Jar. resa 'Aristotle deer'; *hinum 'drink', Jar. menum *taliNah 'ear', Jar. tengia; *tanaq, taneq 'earth', Jar. tenah; *limah 'five', Jar. rema; *buNah 'flower', Jar. benga; *qatay 'liver', Jar. hetai; *Ratus 'hundred', Jar. haretuh, *basih, besih 'iron', Jar. pesei; *kutuh 'head lice', Jar. ketao; kayuh 'log', Jar. keyao; *lakin 'male', Jar. rekei; *babuy 'pig', Jar. bebuy; *tikus 'rat', Jar. tekuih; *pajay 'rice', (harvested but unhusked), Jar. pedai; *batuh 'stone', Jar. petao; *kapal 'thick', Jar. kepal; *dilaq 'tongue', Jar. jelah; /h/u(n)taq 'vomit', Jar. petah; *dalan, zalan 'way, road', Jar. jelan; kamih 'we excl.', Jar. gemei; *kayuh 'wood', Jar. keyao; *hubih 'yam', Jar. hebei 'sweet potato'.
