LOOK UNDER THE HOOD TO SEE HOW CARRC WORKS

Coal Ash Resources Research Consortium® (CARRC®, pronounced “cars”) tasks are divided into three categories:

1. Member-prioritized research tasks
2. Technology transfer and maintenance tasks
3. Special projects

All tasks support CARRC objectives and increase the availability of sound technical data for CARRC use. Special projects provide an opportunity for members and nonmembers to sponsor specific research or technology transfer consistent with CARRC goals.

CURRENT CARRC MEMBERS

- Alliant Energy
- Ameren Energy Fuels and Services
- Great River Energy
- Indianapolis Power and Light
- Lafarge North America
- Otter Tail Power Company
- Tennessee Valley Authority
- U.S. Department of Energy National Energy Technology Laboratory (DOE NETL)
- Xcel Energy

LET CARRC TAKE YOU THERE

Get in the driver's seat with CARRC (pronounced “cars”) and join other industry stakeholders in advancing the technical and economic aspects of coal ash management.

Longstanding Tradition – Founded in 1985, CARRC is a key research program at the University of North Dakota Energy & Environmental Research Center (EERC).

Member-Driven Approach – CARRC works with its members to identify technical issues of greatest importance, and members decide what research tasks CARRC will perform.

Helping You Reach Your Destination – CARRC is a forum for industry, research, and government representatives to work together to achieve common goals. The CARRC flexible team approach offers members the opportunity to tap into the collective knowledge of its research team and share ideas and information with other coal ash professionals.

Road to the Future – By actively participating in various committees and organizations, researchers update members on pending regulations and other external forces that affect the industry. Known as a leader in standards development, CARRC is dedicated to developing key standards that will enhance coal ash utilization.

CARRC®

TAKE CARRC FOR A TEST DRIVE

New CARRC members are invited to a 1-year trial at a half-price membership fee of \$5000. CARRC makes the most of your research dollars by matching them with DOE NETL funds.
