Senior Plans

Graduating seniors in the colleges of science, literature and arts, engineering, commerce and edu-cation are listed on pages 3 and 4. Their name, maj-or field of study and fu-ture plans are listed in that order under their respective college.

Information on degrees awarded to these seniors may be obtained from the May 20th issue of the "Da-kota Student," campus newspaper; and home addresses can be found in the "Student Directory" of the University.

Graduating seniors not listed have not indicated any definite plans for the future. Information about these seniors will appear in future editions of the ALUMNI REVIEW upon receipt at the Alumni of-

Asks Alumni Letter from the President To Contact, Remember

tomorrow you, as a graduating senior, will become an alumnus of the University of North Dakota. That fieldhouse platform you will walk across is more than a wooden structure—it is a transition "stage" between a student of college and a student of the world. And with this advancement, as with any major promotion, you must be prepared and willing to accept added responsibilities.

These "added repsonsibilities" can be listed under three major headings; (1) keep in touch with the alumni office, (2) promote the University and (3) contribute regularly. And as you think about each point, it takes on a deeper meaning. meaning.

Keep in Touch First of all, be sure to keep in touch with the alumni office. It is there for a purpose — to coordinate all activities of the University alumni. It will keep you posted on University news; let you know where your fellow classmates are and what they are doing. Changes of address should be sent to this office. A

graduate who fails to keep the alumni office posted is like a book in the library — without a card in the card catalog. Keep your "card" up to date. Secondly, but no less important the card in the card catalog.

portant, promote this great institution, both by word and deed. The University is a "home" and you, as a member of its large family, should take pride in it and make it the best in the nation.

Contribute Regularly

Last, but surely not least, contribute regularly to the University. Nobody expects you to give a fortune; but, if every alumnus contributed 25 cents each year, think of the large workable fund that would be availbale for re-search and development of

the University.
Sounds easy, doesn't it? And it is. This small amount of time and money spent each year will reward you in every way. Available information about college friends, the feeling that you are a part of a large fighting team helping to better our educational system,

ing in your lifetime career. Will you be an active alumnus? Thousands of graduates like you are doing their part. Be sure and do yours.

Congratulations - - Best of Luck

For the past four years you have attended classes dealing with those things that are our principal source of strength as a nation — I mean knowledge, ideas and more effective ways of thinking. You will long remember your teachers for the influence of their think-

ing upon you and for their importance to you in your search for better answers to better questions.

It is our hope that you enter upon your chosen field with something of that sense of power that comes from increased skill in seeking knowledge wherever it may be found, in getting the facts you need and above all in knowing how to think and how to make wiser and more appropriate use of the knowledge and skills you have.

The administration, the faculty and your fellow students are surely going to miss you. This year's class leaves its mark, and the University is the greater for your being here. Your many expressions of thoughtfulness and appreciation to your teachers and to the University are evidence of a sense of responsibility and true

character that make us all very proud.

If your conduct as students is indicative of your feeling toward your alma mater, then there can be no question about the quality of your performances as alumni, about to join the the quality of your performances as alumn, about to Join the host of loyal men and women who in so many ways show their love and appreciation to the University — not only through tangible contributions, but more important, through their influence in telling others about the University and by their continuous concern that the University will always be directed toward higher purposes and greater usefulness.

You will never forget the friendships you have made here, and I can assure you that your alma mater will follow your

Seal Implies Job, Purpose Of Graduate

When the seal of the University of North Dakota is placed on the diploma of one of its graduates, another representative of this institution assumes his or her place in the world.

Graduation is more than the completion of the required course of study with commencement exercises as the mencement exercises as the finale. The acquisition of a degree from any school confirms the graduate as a delegate from that school — a representative portraying the standards, ideals and philosophy of that school. True representation is then the responsibility of a senior.

Measured by Others This representation is meas-

ured by others through their interpretation of the graduate's words, thoughts and deeds. These items are imdeeds. These items are important, for they represent the yardstick used by persons with whom the graduate comes in contact in measuring his standards and hence the standards of his school.

The graduate must think, speak and act in a manner revealing consciousness of his responsibilty. To be the best representative, the holder of the diploma must make the best use of his knowledge and continue his personal development. He must utilize the understanding acquired in his undergraduate days in the situations which confront him in everyday life. The graduate's ideas expressions and ate's ideas, expressions and accomplishments bear witness to the extent that he has been a good representative of his Alma Mater.

Importance of Consciousness

Financial success, fame, nor lofty positions are assurance of good representation of this seal on the diploma. It cannot be assumed, either, that any such marks of personal attainment mean just d's-charge of responsibility. Constant consciousness of the graduate's position with regard to his diploma and con-stant endeavor to justify the placing of the seal are the only means of assurance that the senior's responsibility is being met.

If, then, we seniors while receiving our diplomas consider ourselves primarily as representatives and not merely as graduates, we will be truly assuming the responsi-bility that accompanies this mark of attainment.
