TOP STORIES

Medical School fully reaccredited

The School of Medicine and Health Sciences was fully reaccredited recently, receiving praise for its dean, faculty and curriculum.

The Liaison Committee on Medical Education voted to reaccredit the UND medical school for eight years. The committee listed several areas of institutional strength at the school including the "vision and energy of Dean H. David Wilson" in implementing the Patient Centered Learning (PCL) curriculum at the school.

"PCL is innovative and prepares students exceptionally well for their clinical (third and fourth years) education and the practice of medicine," the committee's letter to UND President Charles Kupchella said.

UND's PCL curriculum teaches medical students using real patient cases, where lectures, labs and small group work help the students learn the basic sciences behind the patient's condition and others like it.

The committee also cited the "commitment and cooperative spirit of the volunteer faculty." More than 900 clinical faculty members serve on a part-time or voluntary basis teaching medical students in 30 communities throughout the state during their third and fourth years of medical school.

In addition, the school's rural opportunities in medical education was said to "help address the state's physician workforce needs in rural areas" and that it "provides students with excellent opportunities for education in rural communities." The committee also applauded the medical school's focused and self-sustaining research program for its growth and strength saying it is "a model for community-based medical schools." The Indians into Medicine program was also commended stating it has "a well deserved national reputation" while the school's Clinical Education Center is a "model" for "clinical skills learning, assessment and improvement."

"We are very pleased our medical education program has earned this extraordinary vote of confidence from the accreditation body for all medical schools in the nation," said Kupchella.

"I am so proud of all the great work that our administrators, faculty, staff and students do here every day," said Wilson. "Our full reaccreditation shows that this small medical school has big ideas that produce great results."

"This is by far the best evaluation the UND medical school has had," said Associate Dean for Administration and Finance Randy Eken, who has been with the school for more than 25 years.

Accreditation is an evaluation that determines whether an institution meets established standards while encouraging improvement. The process includes gathering school information to submit to the committee, conducting a self-study and a several-day site visit when several members of the committee visit the school.

The U.S. Department of Education authorizes the LCME for accreditation of all programs of medical education leading to the Doctor of Medicine degree in the United States. Only accredited medical schools receive federal grants, and only students who graduate from accredited schools are accepted into accredited residency programs and may be licensed to practice medicine.

-- Amanda Scurry, public information specialist, School of Medicine and Health Sciences,

Schultz receives grant to increase UAV video resolution

Richard Schultz, associate professor and chair of electrical engineering, was awarded \$457,985 from the U.S. Army Research Office for a three-year project to develop higher resolution techniques that sharpen video captured by Unmanned Aerial Vehicles (UAVs) and to help with automatic target recognition and tracking.

The project is titled "Real-Time Super-Resolution ATR of UAV-Based Reconnaissance and Surveillance Imagery." UAVs are robotic airplanes used for military and homeland security intelligence gathering, especially to capture surveillance images and to relay communications from point-to-point. Dr. Schultz's research project is dedicated to image processing and analysis, in order to see details more sharply in video captured by UAV imaging payloads and to help with automatic target recognition (ATR) and tracking.

In movies about national security such as Patriot Games and Enemy of the State, it seems rather easy to zoom in on people, buildings, and vehicles found in satellite and airborne surveillance images. However, if you use the magnification tool found in any image processing software package to zoom in on a picture from your digital camera, you will see just how blocky the pixels really are. By exploiting the movement between multiple frames in a video sequence, it is possible to extract extra details from digital video frames that are not visible within any single digital camera picture. The movement of the UAV payload imager with respect to the ground can be exploited in this very same manner to enhance surveillance and reconnaissance video footage.

From a more technical viewpoint, this DEPSCoR award to the University will investigate feature-domain super-resolution image reconstruction with model-based constraints as a robust and real-time automatic target recognition algorithm for reconnaissance and surveillance imagery captured by airborne sensors flown by Unmanned Aerial Vehicles. Pixel-domain super-resolution is capable of extracting additional visual details from electro-optical (EO) and infrared (IR) video feeds that are not observable in any one frame through the integration of several frames registered with respect to a target-of-interest. However, super-resolution algorithms that rely on pixel-domain constraints are generally unsuitable for ATR because they are severely limited in magnification power, highly computational, and extremely sensitive to clutter, occlusions, noise, and registration errors. To overcome these limitations, model-based constraints will be generated by projecting CAD models and digital images of known military targets under surveillance, such as aircraft, armored personnel carriers, and combat vehicles, into a much lower-dimensional "target-space" using principal components analysis. By utilizing these "eigentargets," super-resolution carried out in this low-dimensional feature-domain will be capable of quickly detecting and identifying a target that appears in only a small fraction of pixels within several video frames, as well as magnifying the visual data by much greater than 10x.

In March 2006, the Department of Defense announced that a total of \$11.5 million would be awarded to 22 academic institutions in 17 states through the FY2006 Defense Experimental Program to Stimulate Competitive Research (DEPSCoR), specifically to perform research in science and engineering fields important to national defense. Twenty-five projects were competitively selected under the FY2006 DEPSCoR program, which is designed to expand research opportunities in states that have traditionally received the least amount of federal support for university research. Academic researchers in Alaska, Arkansas, Delaware, Hawaii, Idaho, Kansas, Kentucky, Maine, Montana, New Hampshire, Nebraska, Nevada, North Dakota, Oklahoma, Puerto Rico, Rhode Island, South Carolina, South Dakota, Tennessee, the U.S. Virgin Islands, Vermont, West Virginia, and Wyoming were eligible to receive awards under this competition. The Air Force Office of Scientific Research, the Army Research Office, and the Office of Naval Research solicited proposals using a defense-wide Broad Agency Announcement. The announcement was published on the Internet and accessed by the DEPSCoR state committees, which solicited and selected projects for each state's proposal. In response, 21 state proposal packages consisting of 103 projects were submitted, requesting approximately \$55 million.

EVENTS TO NOTE

U2 workshops listed

Below are U2 workshops for July 11-19. Visit our web site for more.

Creative Desktop Publishing: July 11 and 12, 8 a.m. to noon, 235 Starcher Hall, Graphic Communication Lab. Fee is \$85 (eight hours total). Learn to create visually appealing posters, flyers, newsletters and more. This is a hands-on workshop that includes using computers and printers to produce your design. Participants are encouraged to bring project ideas to complete. Presenter: Lynda Kenney, Department of Technology.

Employees Privacy and the Law: July 11, 9 to 11 a.m., 305 Twamley Hall. How far can an employer go in

making decisions on issues related to privacy in the workplace? Presenter: Joy Johnson and Desi Sporbert.

Defensive Driving: July 11, 12:30 to 4:30 p.m., Room 16-18, Swanson Hall. This workshop is required by state fleet for all UND employees who drive state vehicles on a regular (monthly) basis, received a traffic violation, or had an accident while operating a state vehicle. Employees are encouraged to bring a family member (spouse and/or dependents). This workshop may also reduce your North Dakota insurance premiums and could possibly remove points from your driving record. Presenter: Mike Holmes.

Digital Photography for Beginners: July 18 and 19, 8 a.m. to noon, 235 Starcher Hall, Graphic Communication Lab. Fee is \$85 (eight hours total). This hands-on workshop is an introduction to the practice of digital photography, including the basics of digital cameras, photographic composition, and an introduction to Adobe PhotoShop software. Participants will learn about the digital imaging process and how to create interesting and appealing digital images. Participants are required to bring their digital cameras and manuals to the workshop. Presenter: Lynda Kenney, Department of Technology.

Records Retention and E-Mail: July 19, 10 to 11 a.m., Memorial Room, Memorial Union. Learn what role e-mail plays in an organization, UND policy and best practices for retaining e-mail messages. Presenter: Chris Austin, records manager.

Please reserve your seat by registering with U2 by: Phone, 777-2128; E-mail, U2@mail.und.nodak.edu, or online at www.conted.und.edu/U2/. Please Include: (1) Workshop Title/ Date, (2) Name, (3) Department, (4) Position, (5) Box number, (6) Phone number, (7) E-mail, and (8) How you first learned about this workshop? Thank you for registering in advance; it helps us plan for materials and number of seats.

-- Julie Sturges, Program Assistant, U2, U2@mail.und.nodak.edu, 777-2128

Surface and Ground Water Engineering Camp planned for grades 5-8

The Dakota Science Center will sponsor a Surface and Ground Water Engineering Camp Tuesday and Wednesday, July 18-19, from 9 a.m. to 3 p.m. at the School of Engineering and Mines for children in grades 5-8. Cost is \$40.

The camp will include field trips to an underground aquifer, ground water and wastewater treatment plants, an irrigation pivot, and laboratory activities.

To register, call Laura Munki at 772-8207. The camp is sponsored by the School of Engineering and Mines, Advanced Engineering and Environmental Services Inc., and the Dakota Science Center.

Doctoral examination set for Charles Dunlop

The final examination for Charles Dunlop, a candidate for the Ed.D. degree with a major in Educational Leadership, is set for 5 p.m. June 29, in Room 206, Education Building. The dissertation title is "The Perceptions of Superintendents and Business Managers Regarding Purchasing Policies, Practices, and Procedures in Small Rural Schools: A North Dakota Case Study." Larry Klundt (Educational Leadership) is the committee chair.

The public is invited to attend. -- Joseph Benoit, Dean, Graduate School.

[BACK TO TOP](#)

Doctoral examination set for Betsi Little

The final examination for Betsi Little, a candidate for the Ph.D. degree with a major in Experimental Psychology,

is set for 8 a.m. June 30, in 203 Corwin-Larimore Hall. The dissertation title is "Optimism as a Buffer Against the Negative Impact of Discrimination." Cheryl Terrance (Psychology) is the committee chair.

The public is invited to attend. -- Joseph Benoit, Dean, Graduate School.

[BACK TO TOP](#)

Doctoral examination set for Wanda Berg

The final examination for Wanda Berg, a candidate for the Ph.D. degree with a major in Teaching and Learning, is set for 11 a.m. June 30, in Room 206, Education Building. The dissertation title is "Making a Difference, Making Connections: Perspectives of College Faculty and Practitioners Leading a Service Experience Abroad." Kathleen Gershman (Teaching and Learning) is the committee chair.

The public is invited to attend. -- Joseph Benoit, Dean, Graduate School.

Faculty sought for New Student Welcome Weekend

Faculty are asked to volunteer for small group discussions to serve incoming students during Fall 2006 Welcome Weekend. This is a great opportunity (alongside a well-trained Student Ambassador) to facilitate a small group discussion with incoming new students on the Saturday before fall classes begin. Together, you'll answer questions regarding academics, UND and college life in general. This is an opportunity for faculty to impact the academic experiences of new students -- providing general academic direction by setting helpful expectations that will guide students through the first steps of their UND education. All faculty participants will also receive a free UND T-shirt.

We ask faculty to participate in a brief training Thursday, Aug. 17, from 1 to 1:30 p.m. (optional free lunch provided at noon). The event is held Saturday, Aug. 19, and we're asking participants to volunteer for one of two sessions, either 12:45 to 3 p.m. or 2:45 to 5 p.m. Faculty who participate tell us it's a highlight! Please consider joining this important activity and contact Heather Kasowski at heatherkasowski@mail.und.nodak.edu or 777-6468.

-- Kenton Pauls, Director of Enrollment Services, Enrollment Services, kentonpauls@mail.und.nodak.edu, 777-3885

ANNOUNCEMENTS

Web sites should point to new search engine

A new Google search engine has been installed on the UND web site. Unfortunately, it is impossible to configure the new engine in the same way as the old one. As a result, all web sites will need to be updated to point to the new engine by July 15. To update your web site, visit <http://www.und.edu/template/searchbox.html>. If you have any difficulties, please call 777-2474, or e-mail kristoffer.frize@und.edu. --- Jan Orvik, Web Manager, with ITSS.

New facilities and administrative rates set for sponsored programs

UND has negotiated a new F&A rate agreement for sponsored programs effective retroactive to July 1, 2005. Following are the rates that should be used immediately for new competing proposals:

Research on-campus, 35.00%

EERC on-campus, 50.00%

Other sponsored projects on-campus, 31.40%

Other sponsored projects off-campus, 26.00%

The University will make the following changes for FY06 for research awards received with a begin date after July 1, 2005. Grants and Contracts Administration staff will manually adjust the F&A expenditures downward to reflect the negotiated 35 percent rate vs. the provisional rate of 39.60 percent. The new rate of 35.00 percent will be input into the system and F&A will calculate at that rate going forward. This will have no effect on supplements and add-ons to awards that began before July 1, 2005.

For awards classified as other sponsored projects with a begin date of July 1, 2005, the University will leave the rate at 30.00 percent for FY06. Effective July 1, 2006 the 31.40 percent rate will be charged on these awards.

If you have any questions, please contact the staff in Grants and Contracts at 777-4151.

-- David Schmidt, Manager, Grants & Contracts Administration, davidschmidt@mail.und.nodak.edu, 7-2505

NIH has changed electronic grant application forms

To provide greater consistency between forms and align forms with current policy, the standard SF424 (R&R) and agency-specific PHS 398 components used for electronic submission of grant applications have been changed as follows:

- Four new sections added to the PHS 398 Research Plan: Inclusion Enrollment Report and Progress Report Publication List (previously part of section 4) are separate attachments; Preliminary Studies/Progress Report are separate sections (to avoid being counted in page limit); new sections were added for Select Agent Research and Multiple PI Leadership Plan. Previous sections have been renumbered. The Data and Safety Monitoring section has been eliminated from the Research Plan Component, and is a subtopic within section 8, Protection of Human Subjects.
- The itemized list of policies, assurances, and certifications has been removed from the PHS 398 checklist; applicants are instructed to consult a web site.
- State Code List has been updated to include U.S. possessions, territories, military codes.
- Address field for province has been added.
- Enumeration values containing abbreviations and full descriptions have been standardized with a format of abbreviation, colon space, full description (e.g. AK: Alaska).
- Type of applicant pick-list expanded (SF424 (R&R) cover component field 7).
- Field length adjustments have been made to: congressional district; employer identification (EIN/TIN, note the agency-specific instruction has been revised to request the full 12-digit number be entered if one has been established for grant awards); organization name; opportunity ID; and competition ID.
- Grants.gov form hover text has been updated

Forms changes will be included in all new Funding Opportunity Announcements (FOAs) NIH/AHRQ posts. Over the next few months, NIH/AHRQ will update existing FOAs that use older forms and are open for multiple receipt dates. Until all FOAs are modified to use new forms, two form packages and associated application instructions will be maintained/supported.

The forms update plan and its affect on applicants is:

- For new FOAs (release/posted date after June 15), the application package attached to the FOA will contain the new forms and application guide; that form/guide MUST be used.

- For older FOAs (release/posted date before June 15):
 - FOAs with a single receipt date (typically NIH/AHRQ RFAs and PARs) will be evaluated and, in most cases, allowed to close with no change to the form package.
 - For older FOAs with multiple receipt dates, pay close attention to the form set used to create the application package. NIH is targeting July 5-15 to update older FOAs for the R03, R15, R21, R21/R33, R33 and R34 grant programs and September 9-15 to update older FOAs for the R43/R44 and R13/U13 grant programs with new form packages. Once new form packages are in place for an FOA, the old form package will not be accepted; applications "in the works" must be moved to the new form package. Updates have been timed to occur well in advance of the next standard receipt date of each program.
- To assist you in identifying the form version used to create an application package, NIH/AHRQ will populate the competition ID (which appears at the top of the page when you open an application package with the PureEdge viewer) of new forms packages with the label "Version 2 Forms"; the appropriate application guides will be labeled version 1 and version 2 on the cover page/within footers.
- For a short period of time, both old and new form packages will be available for download. Whenever there is a choice, the package labeled "Version 2 Forms" in the competition ID field should be used. To help in the transition, NIH will develop a splash screen to alert users to select the version 2 package. However, the splash screen only will be visible when using the download button from within the NIH Guide FOA.

The NIH Guide for Grants and Contracts, NIH Electronic Submission of Grant Applications web site and eSubmission listservs will be used as primary communication channels for these activities. Additional notices will be sent when updates take place. When changes are made to the FOAs, anyone subscribed to receive notification of changes will receive an automated email from Grants.gov.

The following resources are available for assistance in electronic submission of grant applications to NIH/AHRQ through Grants.gov:

General information: <http://era.nih.gov/ElectronicReceipt/>; or <http://www.ahrq.gov/path/egrants.htm>.

Grants.gov customer support: 800-518-4726; or support@grants.gov

eRA Commons help desk: <http://ithelpdesk.nih.gov/eRA/>; 301-402-7469, 866-504-9552 (Toll Free); or 301-451-5939 (TTY).

Inquiries: Grants Info, Office of Extramural Research, NIH; 301-435-0714 or 301-451-0088 (TTY); grantsinfo@nih.gov.

Submit your summer event

Have you heard the buzz about the UND summer calendar? Did you know you could get free publicity by submitting your event to the calendar? Jump on board and get your information listed on the UND Summer Calendar by going to www.summer.und.edu or calling 777-0841.

There are currently over 100 events listed on the calendar. We are presently marketing the summer web site, so submit your information NOW to take part in the marketing campaign.

More reasons to submit your event information:

- Potential to reach a larger audience
- Post your summer brochure
- Potential resource for participants

If you have any questions, please visit www.summer.und.edu, or call 777-0841.

-- Sara Satter, Summer Events Program Assistant, Continuing Education, sarasatter@mail.und.edu, 701-777-0841

Carnegie funding available for research on Islam and Muslim communities

The Carnegie Scholars Program provides direct support to innovative individuals whose research will extend understanding of issues related to intellectual and policy developments in Islam and Muslim communities. The corporation is seeking to support scholars who will pursue new scholarship on issues such as, but not limited to, the following: Islam's relationship with international law, science, banking, property, democracy, pluralism or tolerance, the role and rights of women in Muslim societies, the structure and status of Muslim communities in the U.S., the appeal of Islam, and historical and modern interpretations of jihad. The corporation is especially seeking to support promising individuals who demonstrate the capacity to communicate their findings beyond the scholarly community to the public and to policymakers. Up to 20 fellowships, with a maximum grant of \$100,000 for one to two years of research, will be awarded annually. For further information on the nomination process, please contact Victoria Beard. All nomination materials must be received before August 28, 2006.

-- Victoria Beard, Associate Provost, Academic Affairs, victoriabeard@mail.und.nodak.edu, 777-4824

Welcome Weekend binder submissions sought

Do you have information that you'd like new students to know? We are seeking information from departments and organizations to add to our Welcome Weekend student binder. This binder is given to all new students in the fall and is full of flyers, information sheets and welcome letters from various departments and organizations. We encourage you to use this binder as a means of communicating with the newest members of

UND's population!

If you are interested in submitting information, please send a copy (or original), UND fund and department number and contact information to Heather Kasowski in Enrollment Services, Box 8135 or heatherkasowski@mail.und.nodak.edu. We will then send your original to Duplicating Services and 2,000 three-hole punched copies will be billed to the fund number provided. The deadline for submissions is July 7!

-- Heather Kasowski, Special Projects Coordinator, Enrollment Services,
heatherkasowski@mail.und.nodak.edu, 777-6468

Items requested for "Kreature Komfort Kare Kits"

The Introduction to Women Studies students at UND are currently working on a project named "Kreature Komfort Kare Kits," a feel-good project to show support for the female soldiers from the North Dakota Army National Guard 188th ADA currently serving in Afghanistan. The students are collecting donations of new products such as shampoo, manicure and pedicure items, stationery, hard candy, towels, spa style items, etc., to be put into care kits that will be shipped to the soldiers throughout the remainder of the summer.

Items may be left in the drop boxes at the volunteer services and programming office at 113-A, Memorial Union or off campus at JB Hair and Nail Salon, 220 Fourth St. N. in Grand Forks.

Many of these soldiers are UND alumni or currently UND students on academic leave to serve their country. For further information, please contact group leaders Megan Pohlman (megan.pohlman@und.nodak.edu) or Nathan Vasquez (nathan.vasquez@und.nodak.edu), or leave a message at 218-779-7271.

-- Shelle Michaels, Instructor, Women Studies, shelle.michaels@und.edu, 218-779-7271
