The University of ALUMNI REVIEW

VOL. XLVII

GRAND FORKS, NORTH DAKOTA - DECEMBER, 1963

UND Graduate Elected Head Of Group College

Elmer Ellis, UND graduate, who is president of the University of Missouri, was recently elected president of the Association of State Universities and Land-Grant Colleges. A native of Velva, Ellis, 62, succeeds N. G. Fawcett, president of Ohio State University.

Ellis received his B.A. degree from UND in 1924, and was elected to Phi Beta Kappa. He obtained his Master of Arts degree from UND in 1925. UND conferred on him the honorary degree of Doctor of Laws in 1946.

In his position as head of the Association of State Universities, Ellis will direct the activities of the 98 member institutions, which belong to the oldest association of universities and colleges in the country.

UND Awarded NSF Grant

Science, Math Teachers Gain Benefits

Atomic Surgery Team Headed By UND Alum

Dr. John Linfoot, a graduate of the UND Medical School and native of Grand Forks, headed a team of physicians and biophysicists who successfully treated victims of a rare disease called Cushing's Syndrome.

The treatment was by proton beam produced by the University of California's biggest cyclotron, and uses "atomic surgery" instead of a scalpel to treat victims of this rare glandular ailment.

Dr. Linfoot worked with two other medical doctors and a prominent biophysicist in development of the treatment, with the work supported in part by the Atomic Energy Commission.

The treatment was cited as "striking example" of the continuity of science, and was reported in a recent issue of the New England Journal of Medicine.

J. DONALD HENDERSON

Program Expands

The Air Force is now accepting applications from officers throughout the nation for the SAC Minuteman Education Program. Of those accepted, 165 to 200 will be assigned to Minot Air Base to take part in the program.

All participants must meet admission requirements of the UND Graduate School, Hamre explained. Although this is basically a graduate program, he said, undergraduate courses will be offered to help qualify the participants for graduation. On completion of the three-year program, the officers will be awarded graduate degrees from the University.

"We are happy to have been approved for the presentation of one of these programs," Hamre said, "not only because it is a service to our men in the armed forces, but also because it constitutes the recognition of our university and our graduate school as having been one of the three universities selected."

Scholarship in Salesmanship to outstanding high school seniors.

The University of North Dakota has received a \$232,-300 grant from the National Science Foundation (NSF) for support of a 1964-65 academic year institute for high school teachers of science and mathematics.

The institute, the fifth such program at UND, will enable 35 teachers, largely from North Dakota and adjoining states, to study science and mathematics for one year at the University. The institute will run from September, 1964 to June, 1965. About 22 of the 35 participants will continue their science study at UND in a related program during the summer of 1965.

Forty school teachers from 16 states and one foreign student from South Africa, are presently attending a similar science institute at UND under the direction of J. Donald Henderson, professor of physics and science teaching, who will also direct the 1964-65 institute.

The reason for reducing the number of participants in next year's institute is because of a limited appropriation by Congress for the Na-tional Science Foundation, said Henderson.

The institutes, sponsored by NSF at universities throughout the nation, each year allow about 1,700 secondary school teachers to participate.

In addition to the five academic year institutes at the University, NSF has supported seven summer science programs on the campus. The total received by UND in grants for these programs is \$1,754,575. More than 460 high school teachers have studied under the programs. Many of them are working toward graduate degrees with the majority seeking a Master of Science Teaching degree.

The grant enables the University to give participating teachers stipends of \$3,000 plus allowances for depen-

(Continued on page 2)

Gamble Scholarship Increased

The Gamble Scholarship Foundation of Minneapolis has added \$5,000 to its student loan fund at the University of North Dakota.

Fred Davidson, a 1927 UND graduate who is a vice president of Gamble-Skogmo and secretary of the Foundation, presented the check to J. Lloyd Stone, executive vice president of the UND Alumni Association. B. C. Gamble, president of Gamble-Skogmo, Inc., heads the Foundation. Born in Chicago, he grew up in Hunter and Arthur, N. D. With this recent gift, a total of \$10,000 is now in the Gamble Loan Fund at UND.

Loans from the fund will be made available to University students who need financial assistance, Stone said. Further details for handling

of the loans are being made by the UND business office.

In expressing appreciation for the gift, Stone said, "This addition to the loan fund set up by the Gamble Scholarship Foundation will enable many students who are in need of financial help to continue their education at the University over the years. Record of repayment of student loans at UND is almost 100 percent and students who have benefited from available loan funds express great appreciation for the assistance made at a time when it is badly needed."

Gamble-Skogmo, Inc., has been contributing to college capital funds for a period of 15 years. For five years the wholesale - retail firm has awarded the B. C. Gamble University of North Dakota

ALUMNI REVIEW A L U M N I R E V I E W The University of North Dakota Alumni Review is published monthly, except July and August, by the University of North Dakota, Grand Forks, N. Dak, for alumni and former students of the University of North Dakota in the interests of the University. Second-class postage paid at Grand Forks, N. D. Change of address and return requested forms should be sent to the University of North Dakota Alumni Review, Grand Forks, N. Dak. Officers

NSF Grant

(Continued from page 1)

dents, travel, fees and books. It also covers costs for staff and special lectures, direct costs such as laboratory and field trips and indirect costs involved in administering the institute.

Dr. George W. Starcher, University president, said, "The University is pleased to continue being a part of this national program to upgrade the teaching of science in our secondary schools." Starcher commended Henderson for doing "an outstanding job in administering an important program of tremendous social significance in these times."

More than 470 applications are received from teachers throughout the country to attend the present academic year institute at UND, Henderson said. Over 1,000 books of special interest to science teachers make up the science library, in institute headquarters in the old library building at UND.

The National Science Foundation grants extend complete freedom to each sponsoring institution to administer and conduct the program as outlined in its proposal. Curriculum of the individual student is adapted to his needs. The program is especially designed for the instructor who must teach two or more sciences and /or general science. Teachers who wish to participate in the program should apply directly to Henderson.

A Busy Christmas Season

UND Alumni Are on the Go

Sherald James Anderson, '58, is a Chemical Engineer with the Rocket Dyne Company at McGregor, Texas.

Orville L. Larowe, '57, is serving his fourth year as Superintendent of Schools at Darby, Mont.

Joann Marjory Thompson, '60, married William G. Markland and is a school nurse at Las Vegas, Nev., where her husband is employed at the nuclear bomb testing site.

Thomas Warren Sullivan. '56, is Assistant Attorney General for the State of Colorado and resides in Boulder, Colo.

Edward J. Englerth, '58, is working toward his Master's Degree in Agronomy at the Illinois University at Urbana, Ill. Upon completion of studies, he and his wife, the former Nancy Murdoch, will sail to Africa where he will teach in Liberia.

Lily Storslee Rolczinski, '58, is a Junior High speech, art teacher, librarian and debate coach at Hallock, Minn. She is also president of the Northern Division of the M.E.A. Department of Classroom Teachers and a member and chairman of the M.E.A. State Ethics Committee.

James Edward Dignan, '59, married the former Diane Page and is a John Deere salesman for the Page Brothers, Inc., of Mohall, N. D.

Robert Craig Montgomery, '58, is a pediatrician at the Army Hospital in Security, Colo.

Thomas Benjamin Stoelting, '59, received his M.A. degree at the University of Chicago in '61 and is presently a case worker for the Stutsman County Welfare Board at Jamestown, N. D.

Gary Karl Malm, '58, taught high school for two years at Kensal and is now teaching at Climax, Minn.

Dr. Richard Bruce Beithon, '58, is an M.D. practicing in Wahpeton, N. D.

Leroy Delwyn Okeson, '58, received an M.S. degree from the Southern Illinois University and is now a City Planner, City of San Diego, Calif.

Alvin Willard Ollenburger, '57, is teaching and doing graduate work in secondary education at the University of Michigan.

Ronald Wayne Ekren, '58, married the former Mary L. Foss. He is a high school instructor and coach at Breckenridge, Minn.

Peter Simmet, '58, of Gilby, is superintendent of schools for the Midway Public School District No. 128 at Inkster.

Gordon Frank Wedel, '58, is living in Baraboo, Wis., and is district director for the Muscular Dystrophy Associa-

Donald Franklin Knorr, '59, earned his M.A. at Peabody College and is now teaching and living in Haines City, Fla.

Arthur Soren Jensen, '58, is department head at the Penney Store at Bemidji, Minn.

Gae Lynn Inmann, '62, is teaching first grade at the Lewis and Clark School in Grand Forks.

Laurence B. Matson, '58, and his wife are both teaching in an Eskimo school in Nightmute, Alaska. They previously taught at Point Barrow, Alaska.

John Patrick Rutten, '59, worked for two years after graduation in the research and periodical department of the New York City Library, then attended the American Institute for Foreign Trade at Phoenix, Ariz. He is now living in Guayaquil, Ecuador, South America, where he is regional director for CARE.

Alvin E. Horne, '61, now has a teaching assistantship and is a graduate student in mathematics at the University of Minnesota.

Jack Edwin Enge, '59, was married in 1960 to the former Shirley Oas, Oslo, Minn., and attended the University of Minnesota where he did graduate work in Library Science. He is presently librarian at Two Harbors High School in Two Harbors, Minn.

Donovan B. Reinke, '62, is a medical student at the University of Pennsylvania at Philadelphia, Penn.

Malcolm Dwight Rowswell, '58, is a Mine Captain with Dennison Mines, Uranium Mines, at Elliott Lake, Ontario, Canada.

Ronald Gene Schmidt, '61, is an attorney with Lathrop. Righter, Gordon and Parker in Kansas City, Mo.

Morris I. Becklund, '58, is an accountant and office manager with the Pillsbury firm in Minneapolis, Minn.

James Roger Zavoral, '58. is a Civil Engineer with the Federal Government, under the department of the Bureau of Public Roads, and resides at Madison, Wis.

George Edward Karel, '58, is manager of the Kand Implement Company at Walhalla. N. D.

John Elliott McCoy, '58, is a civil engineer and resides at Fairbanks, Alaska.

Dennis Merlin Sobolik, '58, resides at Hallock, Minn. He is a lawyer.

Glenn Lian, '48 & '57, who holds degrees in social science and educational administration from UND, has accepted the position of county welfare case worker in Walsh County in Grafton.

Patrick M. McMahon, 62 & '63, has become associated in the practice of law with the firm of Duffy and Haugland in Devils Lake.

Wesley Hary, '60, has joined the Jamestown law firm of Rittgers and Granner, and will also serve as assistant state's attorney.

Don Conroy, who completed his undergraduate work at UND, is teaching in the David Farragut school in Rota. Spain, where he will be on a two year tour of duty. He will teach science in a government school for U.S. Naval personnel. Rota is about 60 miles from Gibraltar.

Jen Chi Chang, '51, writes from Florida Memorial College, Saint Augustine, Florida, where he serves on the faculty of the Division of Education.

He was recently elected as a liason officer to the United States by the Chinese Sociological Society which was voted by the Board of Directors of the society at its annual meeting in Taipei, Taiwan.

Chang has recently authored a second book, titled "As It Were A New Song". It was published in Taipei, Taiwan, and is a collection of short articles relative to education, marriage, family and religion.

James L. Webb, M.S.-'63, is a teacher and coach at Staples, Minn.

Dean Vernon P. Squires

Dean of the College of Science, Literature, and Arts 1914—1930

It was a sad day in the history of the University of North Dakota when Dean Vernon P. Squires died of a heart attack at the age of 63.

There were many tributes paid to Dean Squires. Perhaps one of the most fitting ever paid anyone associated with UND was the University funeral for Squires. His body lay in state in the Liberal Arts building, which was secured largely through his efforts, with final services in the armory. The late President Thomas Kane said of him: "He was a man of the highest character and absolute sincerity."

The life of Vernon P. Squires began in Cortland, N. Y., where he was born on November 4, 1866. The original Squires family came from England in the seventeenth century, while the Purinton family came from Wales in the eighteenth century.

Dean Squires was graduated from the State Normal School in Cortland in 1885, and from Boston University in 1889. He received his M.A. degree from the University of Chicago, and was granted the Litt. D. degree by Brown University in 1914, the first time that any UND faculty member had been awarded an honorary degree by another university.

He came to UND in 1897 as assistant professor of English language and literature, and became Dean of the College of Science, Literature, and Arts in 1914.

During his more than 30 years of service to UND, Dean Squires became personally acquainted with nearly all those who had been graduated before he came on the campus.

He was the author of the North Dakota Syllabus of Bible Study, and had several articles published in magazines. The Liberal Arts Building, a \$300,000 structure chris-

Three Great Men!

SLA Deans Build UND Legend

tened Merrifield Hall, was built largely through his efforts.

Dean Squires married Ethel Claire Wood of Fargo in 1902, and they had six children. It was Dean Squires who was instrumental in inaugurating Founder's Day observances at UND. He was the first head of the Convocation Committee, helped bring Phi Beta Kappa to UND, and helped design the University seal. He was a man of many facets, gave scores of lectures in North Dakota and Minnesota, and had a layman's license to preach.

MEMORIAL FUND

Attesting to the stature of Dean Squires at the University and the esteem in which he was held, some of the prominent alumni during Dean Squire's years of service at UND have begun a Memorial Fund drive under the leadership of William L. Boyce, Christine Finlayson, and Laura Christianson. Names of the contributors will be publicized at a later date.

Dean William G. Bek

Dean of the College of Science, Literature, and Arts 1930—1948

Dean William G. Bek, a nationally known educator, died on August 14, 1948 and was active until the hour of his death at the age of 74.

Dean Bek came to the University of North Dakota in 1911, as Chairman of the Department of German language, and was active in administrative committees for 37 years.

A native of Washington, Missouri, Dean Bek was a charter member of the UND chapter of Phi Beta Kappa, brought chapters of Phi Eta

THREE GREATS

There are many great men who have helped to shape the progress of the University of North Dakota. Three men who have played a major role are the men who have served as Deans of the College of Science, Literature, and Arts. These men have come in contact with more students at UND over the past decades than any other faculty members. Here, in capsule form, is a brief resume of these three great men.

Sigma and Blue Key to the UND campus, and was an active worker in University and community affairs.

He finished a normal school course in 1897, after taking time out to teach in a rural school for one year, and later received his B.A. degree from Missouri University in 1903. He taught at the University of the South in Tennessee, and then returned to Missouri where he was granted his M.A. degree in 1905.

Dean Bek then studied at Pennsylvania University on a scholarship, and received his Ph.D. degree there in 1907. He married Ada Springgate in 1909, and they came to Grand Forks in 1911 when the young Dr. Bek became chairman of the department of German. He became full professor in 1912, and assumed the position of Dean of the College of Liberal Arts in 1930.

Scholar, administrator, teacher, civic leader — Dean Bek was the living embodiment of the College of Science, Literature, and Art to most alumni. He was the moving personality, the genial adviser, the inspiration and the benediction.

Dean Bek had a prodigious memory, with a great retentiveness of mind that was mirrored in his historical writings. He was an indefatigable author, and gained national prominence for his translations and original writings.

In 1938, the Missouri His-(Continued an page 8) Dean Robert B. Witmer

Dean, College of Science, Literature, and Arts 1948—

Training people to think and reason is the primary purpose of a college education says Dean Robert B. Witmer, head of the College of Science, Literature, and Arts at UND.

Dean Witmer joined the staff of the University as an instructor in physics in 1924, after having served two years as graduate assistant in that department.

He advanced through the various academic ranks to the professorship in 1938. He received his B.S. and M.S. degrees in Electrical Engineering at the University of North Dakota, and his Ph.D. degree in Physics and Mathematics at the University of Michigan, where his specialty was in the field of X-rays. He has done graduate work at the University of Washington, and post-doctoral study at Columbia University.

Dean Witmer served as Freshman Scholarship Advisor during 1936-38, and as Dean of Freshmen from 1939 to 1942. During 1942-43 he served as Head of the Mathematics-Physics department of the Navy pre-flight school at Iowa City, returning to the position of Dean of Freshmen at UND in 1945. In 1948-49, he served as Acting Dean and then as Dean of the College of Science, Literature, and Arts.

During his years at UND, Dean Witmer has devoted much time to student and University organizations. He is a member of Phi Beta Kappa, Sigma Xi, Sigma Tau, Phi Delta Kappa and Blue Key, AAUP, Sigma Nu, Masons and is listed in Who's Who in America and American Men of Science.

(Continued on page 8)

Report from the Campus:

Debates, Drama, Conferences Mark Busy Fall

By J. LLOYD STONE

Suddenly, it's December, and we are on the thresh-hold of another Christmas season. It's a most wonderful time of the year, and Christmas becomes more significant with each December. It is particularly true at your University where the UND Alumni "family" grows larger with each graduating class.

To the thousands who have been a part of a great University of North Dakota, we express the sincere appreciation of your University and its Alumni Association. Merry Christmas! Happy New Year!

December marks the end of another calendar year at UND, and it's been a busy one. The fall season has been crowded with activities and achievements. And, the tempo is picking up, during the busy pre-holiday time on the campus. Here are some recent events.

University Theater — The season opened November 1 with an Irish play never seen in Ireland or on the professional stage of America. The comedy play is called "Cock-A-Doodle-Dandy," and is about a mythical Irish rural village, inhabited by an audacious rooster, a symbol of vibrant life and a cynical mocker of people. Overflow crowds attended the four productions.

Other plays scheduled by the UND Theater include "Blithe Spirit" by Noel Coward, "Orpheus Descending" by Tennessee Williams, and "The Tempest" by William Shakespeare. The plays are held at the beautiful new Burtness Theater, a most welcome and appreciated addition on the campus.

UND Fieldhouse—Since its dedication in 1951, the UND Fieldhouse has been seeing increased use, and is termed one of the finest college athletic facilities in the nation. Of course, it is pressed into use for many other purposes than athletics. It is the site for registration, and with more than 5,000 students enrolled, it is indeed a bee-hive of activity. President Kennedy spoke to a capacity crowd of 10,000 last fall from the Fieldhouse stage. It is used for many organizational meet-

ings, for events ranging from circuses to auto shows.

Painting Exhibit - Robert A. Nelson, who returned to the chairmanship of the UND Art Department this fall after a year in New York City, had a show of his recent paintings on sculpture at the Chester Fritz Art Gallery during November. Prior to joining the UND faculty in 1956, Nelson taught at the School of Art Institute in Chicago and at the University of Manitoba. He was commissioned to do a large-scale mural in the Chester Fritz Library, and has had one-man shows in New York, Boston, Chicago, Philadelphia, Washington, D. C., Minneapolis, and in Spain and Canada. He is a member of many professional societies and is a charter member of the Arte Nuevo in Spain.

Tests and Conferences — Thirteen UND graduates were authorized by the State Board of Accountancy to practice as certified public accountants. The new accountants were awarded certificates last September, according to R. D. Koppenhaver, Board Secretary and chairman of the UND Accounting Department. Another 46 candidates were on the campus in November to take all or parts of the Certified Public Accountants examination. The Law School Admission Test, required of all candidates to most American Law Schools, was given in November at UND, and will also be given next February and April.

As you glance out the windows of the Alumni Offices on the fourth floor of Twamley Hall, you will see the Memorial that marks the site where Old Main once stood. Workmen have been busy in completing the memorial, which features a sculptured sphere, raised on 16-foot high supports above a concrete and stone patio.

Six circular tables and benches, made of slabs of granite enclose the patio. The project was designed by Stanley Johnson, of the UND Art Department. A gas light will be completed in December, which will be everburning and symbolize the University as the source of truth and knowledge. The area will be landscaped, and I'm sure it will prove a fine attraction to Alumni as they return to the campus.

Ben Eielson Medal — A medal, won by one of UND's most famous graduates, has been given to the University for safekeeping and display. The medal was presented to famed flyer Carl Ben Eielson in 1929 by his friends in Fairbanks, Alaska. Six months later, he met death when his plane crashed in Siberia while he was on a mission of mercy.

The medal was given to UND by Oliver Eielson of Minneapolis, a brother of Col. Eielson. (Oliver was one of my instructors in my high school days.) The medal has a gold nugget with an inset diamond, and will be displayed at the Chester Fritz Library.

Campus Visitors — An International Debate was held at UND in November, with two members of the UND debate team facing a touring team from Cambridge University in England. They discussed the topic of "Does the United States Need a National Health Service?"

High school girls from more than 50 high schools were on the campus in November for the annual "Career Day for Women." Members of the faculty discussed the career possibilities in 18 fields.

C. Northcote Parkinson, noted historian, humorist and educator, was a guest speaker at a November convocation in the Fieldhouse. He is a lecturer at Harvard, and the Universities of Illinois, Indiana and California. He has written many books, lectured on the problems of taxation, and taught history for many years on both sides of the Atlantic Ocean.

Another November speaker was Dr. William L. Kolb of Carleton College, who addressed the UND Forum on Religion. He is currently professor of sociology and anthropology on the Fred B. Hill Foundation and chairman of the department at Carleton College. During his visit at UND, Dr. Kolb appeared at several classes in sociology and religion, and met informally with faculty members for discussions.

Major Donald M. Sorlie, a native of Fargo, was guest speaker at an initiation banquet for two honorary engineering fraternities at UND on November 23. He is chief of the Manned Spacecraft Operations Branch at the Air Force Flight Test Center at Edwards AFB in California, and is one of the nation's astronaut candidates. Major Sorlie has completed his requirements for astronaut candidacy and graduated with the second class from the Aerospace Research Pilot Course in 1963. Only 25 men have been graduated to date.

A recent survey of our current UND students indicate that each of the 53 counties in North Dakota is represented. Of the 5,009 students enrolled on the campus, 3,619 are North Dakotans. Grand Forks, Burleigh, Cass, Pembina, Walsh, Ward, Williams, and Ramsey counties lead in supplying the greatest number of students.

As you can see, it's been a busy fall at UND. Things will slow down briefly during the annual Christmas Holiday break, but plans and hopes for 1964 will find the UND campus making even greater strides in the New Year. Happy Holidays!

UND GRADUATE NAMED NORTH DAKOTA WOMAN OF YEAR

Mrs. Mildred Johnson of Wahpeton was named North Dakota's Woman of the Year in Education for 1963 at the fall meeting of the North Dakota Education Association in Bismarck

Mrs. Johnson is the former Mildred Burns of Grand Forks, where her mother still resides, and attended Grand Forks public schools, earning her degree from UND in 1938. She has been on the State Board of Higher Education since 1952, is a lawyer, as is her husband. The Johnsons have three children.

It's a Hustle-Bustle Time for UND Alumni

Marshall D. Smith, who was graduated from the UND School of Commerce, has been elected trust officer at Marquette National Bank in Minneapolis. He is a native of Grand Forks, and joined the Marquette Bank in 1952.

Joyce Karen Kessel, '59, is a speech therapist at Oakland,

California.

Leigh A. Kessel is an actuary with Johnson and Higgins in New York City, while Ted Kessel Jr., '60, is employed with the National Labor Relations Board in Minneapolis. He is a UND Law School Graduate in the 1962 class.

Alfred B. Rogelstad, '57, is an electrical engineer, resides at Pelican Rapids, Minn.

Emil D. Wahl, '57, is associate professor in Chemical Engineering at UND and is married to the former Jean Engler, a former UND faculty member. They have a seven month old daughter.

Captain Curtis C. Erickson, '57, is a career man in the U. S. Army, is now stationed at Alburquerque, New Mexico. He is married to the former Sharon Dougherty, '56, of Warren, Minn., and they have two children.

Francis W. Defea, '59, is in his second year at the Mississippi State College for Women, where he is an instructor. He spent last summer working on his Doctoral degree at the University of Oklahoma.

Roger H. Elofson, '58, has completed his marine service, with the rank of Captain, and is a sales representative for Proctor and Gamble at Rantoul, Ill.

Dennis E. Bohlman, '57, is negotiations and supervisor with Kellogg Sales Division of International Telephone and Telegraph, resides at Wheaton, Ill.

Captain Ralph W. Sirek, '57, is a T-38 and F-5 jet aircraft project officer and U.S.-A.F. acceptance test pilot. He represents the U.S. Air Force at Northrop Corporation at Hawthorne, Calif., resides at Palos Verdes Penninsula, Calif.

Linda Maija Skroms, '63, is married to John W. Hardy, resides at Fairview, Montana.

Howard W. Neils, '57, is a chemical engineer for the American Oil Refinery in Mandan, N. Dak.

Clare G. Nelson, '57, is an agency assistant for Provident Life Insurance at Bismarck.

James L. Pester, '63, recently joined DuPont in their plastics department at the firm's experimental station near Wilmington, Delaware. He is a native of Crookston, and was awarded a degree of bachelor of science in mechanical engineering from UND.

Richard C. Burnett, '49, has been named recipient of the Russell C. Brinker Prize in Civil Engineering at Lafayette College, Easton, Pa. He and his wife have three sons.

Phyllis Robideaux Wiener, '29 & '30, is on the executive board of the National Committee for the Support of the Public Schools and on the National Legislative Program Committee of the American Association of University Women. She resides in Portland, Ore., but makes several trips each year to the East Coast for her committee sessions. She and her sister-in-law are interested in the UND Orient Tour for a chance to "go west" for a change.

Edward Neil Skinner, '50, has been named depot manager of the Jacksonville Parts Depot for Ford Motor Co., where he has been employed since 1950. He is married to the former Betty Cafferty, who also was graduated from UND in 1950, and they have four children. They reside at Jacksonville, Florida.

Wayne T. Mares, '62, is among the new students in the multiple line course offered by the College of Insurance in New York City. He is employed by the Home Insurance Co.

Donald E. Bjertness, '57, is a landman for the Humble Oil and Refining Co. at Billings, Montana. He is married, has a 9 months old daughter.

Douglas D. Berge and Karen Ruth Simons, both of Grand Forks and both graduates of UND, were married recently in Grand Forks where they will make their home. He is associated with Northern Equipment and Kedney Warehouse

Eldon Ronning, '61, is doing graduate study at the University of Rochester, New York, under a national education act grant awarded him upon his graduation from UND.

Captain Don R. Knutson, '56, is enrolled at Michigan State University under the Air Force Institute of Technology program, is studying for a Master's Degree in Business Administration. He resides in Lansing, Mich.

Quinten D. Argetsinger, '57, is an auditor for Peet, Marvick and Mitchell in Chicago.

Wallace J. Tintes, '57, resides in West Fargo, where he is plant manager of the West Fargo Manufacturing Co.

David D. Overby, '56, is field representative for Yellow Motors Credit Corp., lives in Concord, California.

Leland Paulson, '61, has been named recipient of a Bureau of Mines-UND fellowship to work toward a master's degree in chemical engineering at UND. Paulson's work at the research laboratory at the Bureau of Mines will be a continuation of studies started by Roger Adams, a former recipient of the UND fellowship. Adams received a M.S. degree last spring and is now associated with the Northwest Paper Co., Brainerd, Minn., as a chemical engineer for the technical department.

Ben Cherski, '55, has been appointed Rocky Mountain division manager of Shaffer Tool Works, a world-wide distributor of drilling and control equipment for the petroleum industry. Cherski, a former Sioux hockey star, will maintain his headquarters in Denver, where he has been a resident for the past seven years.

Marlin Stanley Kiecker, '58, is employed by the United States Air Force Auditor General as an auditor at Minneapolis Honeywell Regulator Company, and lives in St. Louis Park, Minn.

Ronald Dean Samuelson, '58, is with the Internal Revenue Service and resides in Dickinson, N. D.

John Charles Sathrum, '58, is a Captain in the U. S. Air Force. He is stationed at Mather AFB, California.

Larry Dean Williams, '58, is a Civil Service Air Force Auditor and resides at Park Forest, Ill.

Patrick B. Kavaney, '62, is a medical student at Northwestern Medical School in Chicago, Ill. Donald Weaver, '60, is employed by the California State Highway Department at Riverside, Calif. He received a professional engineering degree in California in November, 1963; he is married to the former Anne Marie Kyle, '60, of Rolla and they have one daughter.

Dr. R. Warren Pierson, '52, was commissioned a medical missionary to Ethiopia at a service held in Bismarck on Nov. 3. MENTIONED IN "TIME"

Thomas C. Barger, a 1931 graduate of UND, was men-tioned in an article in the September 13 issue of Time Magazine. The article deals with the activities of the Arabian American Oil Co. in Saudi Arabi, and describes Barger as "Aramco's easy-going president who runs his own shop. He is a geologist who arrived in Saudi Arabia in 1937, and spent four parched years prospecting the Rub al Khali, learned to eat roast camel with his fingers, and speak fluent Arabic." Barger's daughter graduated last June.

UND GRAD GETS GRANT

A 1934 University of North Dakota graduate and now Stanford University profes-sor has been awarded a professorship award, which consists of a \$5,000 annual grant to Stanford University for ten years.

Dr. Carlton A. Pederson, a native of Grand Forks, received the award from the Mead Johnson & Company Foundation, Inc., Evansville, Ind., a philanthropic organization established by Mead Johnson & Company, nutritional and pharmaceutical products manufacturers. The grant is for teaching and research in the fields of management and business principles.

Associate dean and professor of business management at Stanford University, Stanford, Calif., Pederson received his B.S.C. degree in general business from UND in 1934. He earned his M.B.A. at the University of Southern California and his Ph.D. at Stanford. He has been on the Stanford faculty since 1946. Pederson is the third business school professor in the nation to be selected as recipient of the newly-created award.

SEATTLE, WASHINGTON: "Bon Voyage" party on February 27, 1964 for Orient Tour members.

SLA Deans

(Continued from Page 3) torical Society elected Dean Bek to honorary membership, one of three men at that time to be so honored.

Miss Beatrice Johnstone, another of the great people associated with the University, said this about Dean Bek: "Dean Bek always has time to talk to anyone. He treats all persons alike, and yet each person as an individual. And he remembers people and incidents because he feels a genuine interest in them. That is his secret."

WITMER

Dean Witmer states that college should teach a person to understand and respect the opinions of others. He states that one cannot be trained in school to handle a certain job because conditions are always changing, and the rapid advances in technology are constantly making things obso-

He believes in a broad education with some depth, accompanied by concentrated study in a specific field, to be the best preparation for one's life work.

Speculating on future advances of mankind through education Dean Witmer comments: "Who can say that before long other planets will not be a part of our world. Nothing is impossible; the human mind has no limits."

Dean and Mrs. Witmer have one daughter, Jean.

CARILLON CONCERTS SET

Special concerts on the UND campus utilizing the 305 bell Carillon atop Twamley Hall will be held during December, featuring members of the UND musical staff. Concerts will be held on several dates prior to the start of Christmas recess.
