London visitor will discuss exchange program

The international programs office will host Carol Watts, the course director for Birkbeck College, University of London, on Tuesday, Sept. 7. Study abroad at Birkbeck College in London has been an option a number of UND students have taken in the past few years, and a good number of our students have spent a semester studying there.

Carol Watts has lectured in the English department at Birkbeck College since 1989. She received a B.A. and M.A. in English and American literature from the University of Warwick, and a D.Phil from Oxford University. Her publications include a book on the modernist writer Dorothy Richardson and articles on film, eighteenth-century literature and culture, and topics in cultural theory (including, recently, the death of Princess Diana). She is currently working on a book on the imperial culture of the 1760s, with particular reference to Sterne's *Tristram Shandy*.

Faculty or staff who would like to meet with Dr. Watts are asked to contact one of the education abroad advisors, Jen Aasvestad, 777-4756, jenniferaasvestad@mail.und.nodak.edu; or Beth Eslinger, betheslinger@mail.und.nodak.edu, 777-3301; or the director of international programs, Ray Lagasse, 777-2938, Raymond.lagasse@mail.und.nodak.edu.

Visitors will be able to use the telescopes and learn about fund-raising efforts for the new \$2 million observatory.

Directions to the UND observatory: Take Highway 2 west out of Grand Forks for approximately 10 miles. At mile marker 346, turn left onto a gravel road. After passing several homes and crossing railroad tracks, turn right at the T-intersection. Drive one-half mile and take the first left. The observatory will be about one-half mile down the road on the left.

Please call me at 777-4896 with any questions.

– Paul Hardersen, assistant professor, space studies.

Lecture will discuss Sitting Bull photos

The Indian Studies department is sponsoring Markus Lindner, who will present "Family, Politics and Show Business – The Photographs of Sitting Bull," 3 to 5 p.m. Thursday, Sept. 9, in 116 Merrifield Hall. Lindner, a doctoral student in cultural anthropology at Johann Wolfgang Goethe-University, works freelance at the Museum der Weltkulturen, Frankfurt, Germany. He received his M.A. in 2000 with a thesis on pictorial representations of Sitting Bull, on which his lecture is based. He is now working on his doctoral thesis about tourism on the Standing Rock Reservation.

The Hunkpapa Lakota generally known as Sitting Bull (1831-1890) is one of the most notorious Native Americans of all times. In his time, he was among the most photographed Native Americans – a fact made even more remarkable considering that most of the pictures were taken during the 1880s. The historical and ethnographic analysis of his collection, however, has lagged far behind Sitting Bull's popularity. This lecture will present all known photographs of Sitting Bull with their historical background – the last years of Sitting Bull's life between the exile in Canada, Buffalo Bill's "Wild West," the negotiation of the "Great Sioux Agreement," and the Ghost Dance.

All invited to attend third annual Beyond Boundaries Conference: Integrating Technology into Teaching and Learning

The third annual Beyond Boundaries Conference: Integrating Technology into Teaching and Learning, will be held Thursday and Friday, Sept. 23 and 24, in the Memorial Union.

Keynote addresses are:

"Beginning the Third Decade: From Great Aspirations to Assessment and Accountability," by Kenneth C. Green, founder/director, The Campus Computing Project, Encino, Calif. The arrival of microcomputers in the early 1980s launched two decades of great aspirations for the role of information technology in higher education. The literature provides a paper trail (now a digital trail) documenting the aspirations, expectations, and even the occasional follies regarding the role and trajectory of IT in the campus community. The third decade of the much discussed "computer revolution in higher education" marks an important transition from aspirations to assessments and accountability in which the campus community will have to document the impact and benefit of IT on teaching and learning, on campus services and on operations. Learn what's ahead and what to expect in the "third decade."

"Why Bother with Instructional Technologies?" by David Lassner, chief information officer, University of Hawaii, Honolulu. It is very easy to integrate technology into a course. It is harder to understand and demonstrate why our faculty and institutions should bother. This presentation shows how technology can help faculty and their institutions address the compelling challenges in higher education today: extending access to underserved populations, improving student outcomes with accountability and reducing costs. Or all of the above!

For a full schedule, visit www.beyondboundaries.info. You may also download a copy of the Beyond Boundaries registration brochure from the Beyond Boundaries web site.

Full conference registration is \$100 (includes materials, continental breakfasts, lunches, evening reception and access to the exhibit hall) if you register on or before Friday, Sept. 17. Student fees are \$50. Space is limited, so register early. Registration forms are now available at www.beyondboundaries.info. You may register online or call UND office of conference services at 777-2663 or 866-579-2663 (toll free) to register with a credit card. UND interdepartmental billings are accepted. Please complete the registration form, the ID billing form and send both forms to conference services at campus box 9021.

The conference is sponsored by the University of North Dakota, PeopleSoft and Blackboard.

For more information, contact the office of conference services at 777-2663 or 866-579-2663, or e-mail conferences@mail.und.nodak.edu (attn: Beyond Boundaries).

Mary Wiper Day set for Oct. 6 (Please note correction)

Mary Wiper, who was employed by the Sierra Club in New Mexico, was killed by lightning while hiking with friends in Colorado. We would like to commemorate the many ways she affected us with her warm spirit, her commitment to social change, and her deep love for the world around us.

We've been thinking of taking Wednesday, Oct. 6, as a time to come together to celebrate her life and achievements. Some activities that have been suggested for Mary Wiper Day are dedication of a bench in her name at the Soaring Eagle Prairie, a community supper at the International Centre where everyone who wishes may speak of who she was to them, an activity in her honor such as walking to work that day instead of driving. We aren't seeking suggestions (we have plenty of ideas of our own) but participation, particularly from people who knew her and who we don't know about. As the three of us have been talking, we've discovered more and more people who knew her well: her many teachers, folks she worked with at the Food Coop and the Art Museum, people she sang with in Allegro, and more.

It's the "and more" that we'd like to hear from. If you'd like to be part of the celebration of Mary's life, please contact one or all of us. – Jeanne Anderegg (campus activities), 777-3302, or honors, box 7187; Glinda Crawford (community activities), 777-3750, or sociology, box 7136; Sandy Donaldson (donations for the stone bench), 777-4461, or English, box 7209.

Diversity in the Workplace: Sept. 29, 8:30 to 10 a.m., River Valley Room, Memorial Union. Are you prepared for the emerging changes in the workforce and in the provision of products and services? As the workplace becomes increasingly global, management and employees are faced with complex cultural issues that are not easily resolved. A multi-ethnic workforce creates surprising and often unforeseen problems that require delicate handling to keep valuable employees happy and productive. Via the Web, an organization can target its products and services to virtually any market: African Americans, Hispanics, Native Americans, baby boomers, gays, older people, soccer moms, etc. These diverse groups have identifiable needs and increasing buying power. Today's successful organizations actively avoid discrimination based on race, age, gender, ethnic background, religion or sexual orientation. This presentation will make you more aware and sensitive to the cultural diversity of the modern workplace.

- To identify existing and emerging diversities in the workplace
- To understand cultural dynamics in the workplace

Prescription Drug Abuse: Sept. 29, 10:30 to 11:30 a.m., River Valley Room, Memorial Union. Most people take prescribed medications responsibly. However the abuse of prescription drugs is a serious public health problem that has been around for a long time. It is a problem that not only affects the young and elderly, but is also becoming an increasing problem due to employee impairment in the workplace. This presentation will discuss how to safeguard you and your family members against becoming addicted to prescription drugs. UND pre-school children's music classes offered

The UND community music program is again offering Musiktanz classes for children ages 15 months through kindergarten. Musiktanz is a curriculum developed by Dr. Lorna Lutz Heyge, an internationally recognized author and early childhood music educator. In the Musiktanz program the teacher acts as a role model to assist the parents/caregivers in working musically with their children. Emphasis in these classes is on having fun while building musical skills and developing a love of music. Moreover, research has shown that participation in such programs may improve skills tied to academic success as well.

Level I (ages 15 months to 3 years) meets at 6 p.m. Monday nights. Level II (ages 3 years to kindergarten) meets at 6:30 p.m. Monday nights. Both classes meet for a half hour 12 times during the semester in 258 Hughes Fine Arts Center starting Sept. 20. They are taught by Teri Preston, an experienced teacher.
