**T**HE UNIVERSITY OF NORTH DAKOTA SCHOOL OF MEDICINE AND HEALTH SCIENCES, founded in 1905, was a two-year school of basic medical science until 1973 when the North Dakota Legislature approved initiation of a four-year curriculum leading to the Doctor of Medicine degree. The UND school offers a statewide, university-based, community-integrated medical education program which places an emphasis on primary care. Practicing physicians throughout the state constitute the majority of the faculty.

**T**he Mission of the University of North Dakota School of Medicine and Health Sciences is to educate and prepare North Dakota residents as physicians, medical scientists and other health professionals for service to the people of North Dakota and the nation, and to advance medical knowledge through research.

**T**he first two years of medical education are provided at the UND campus in Grand Forks, third year in hospitals in Fargo and Bismarck, and fourth year in clinical rotations at Grand Forks, Minot, Bismarck and Fargo. Portions of the curriculum are conducted in 28 smaller communities throughout North Dakota. Medical students also have the opportunity to experience training in other parts of the country and even the world.

**T**he UND School of Medicine and Health Sciences also offers postgraduate residency training in family medicine, internal medicine, general surgery and psychiatry, and a one-year transitional program. In recent years, the school has developed and initiated a combined M.D./Ph.D. degree which permits the student to pursue a terminal degree in one of the basic science disciplines while earning the Doctor of Medicine degree.

**T**he educational program also includes graduate study in clinical laboratory science and physical therapy as well as the basic sciences of anatomy and cell biology, biochemistry and molecular biology, microbiology and immunology, pharmacology and toxicology, and physiology. Undergraduate study is offered in cytotechnology, athletic training, clinical laboratory science and occupational therapy.

## OATH of HIPPOCRATES

**N**OW BEING ADMITTED to the profession of medicine and dedicating my life to service, upon my honor and before God, I freely make these promises:

**I** will carry out that regimen which, according to my power and discernment, shall be for the benefit of my patients; I will keep them from harm and wrong. To none will I give a deadly drug, even if solicited, nor offer counsel to such an end. I will maintain the utmost respect for human life.

**I** will respect and show gratitude to my deserving teachers and, in as far as reasonably I can, shall teach the science and art of medicine by precept, lecture and other modes of instruction to those who are worthy.

**M**y own life and my professional practice I will keep guiltless and right. Even under threat I will not use my knowledge contrary to moral law.

**I** will keep silence regarding that which, within or without my practice, I shall see or hear in the lives of others which should not be made public, holding such things unsuitable to be spoken.

**W**hen skill or knowledge greater than mine will benefit my patient, I will seek assistance or advice, nor will I refuse my aid or my counsel to other physicians.

**I** will not permit considerations of race, religion, nationality, party politics, social standing or financial circumstances to interfere with my attending my patient.

**I** will maintain the honor and noble traditions of the medical profession and forward its highest ideals.

**A**s long as I shall keep these promises inviolate, may I continue the practice of my profession and be respected for all time. Should I violate them, may the reverse be my lot.

## KEYNOTE SPEAKERS

**Dr. John McCormack** grew up in Houston, TX, where he attended St. Thomas High School and completed a bachelor of arts degree in biology at the University of St. Thomas. He earned the Ph.D. degree at the University of Kansas School of Medicine, receiving the Homer B. Latimer Award for Graduate Student Research in 1974. At the University of Pittsburgh School of Medicine he pursued postdoctoral studies in the Department of Physiology.

While serving on the faculty of Louisiana State University from 1976 to 1983, he was recognized with the Aesculaplan Award for the Outstanding Professor for the Freshman Year. He joined the UND School of Medicine Department of Anatomy faculty, first as a temporary assistant professor in 1983 and as an assistant professor in 1985.

At the UND School of Medicine and Health Sciences he teaches histology and developmental anatomy, and conducts research in the areas of mechanism of cell death, with special interest in apoptosis in the tissues and organs of the reproductive system. He also has an interest in apoptosis and programmed cell death during heart development and in mature cardiac myocytes.

Dr. McCormack has worked closely with the Office of Student Affairs and Admissions and has served as the Chair of the Admissions Committee for the last six years.

Members of the M.D. Class of 1991 presented him with the Portrait Award for excellence in teaching at the end of their sophomore year. The award includes a full-size color portrait that hangs in the hall of the medical school.

**Dr. Percy Wootton**, a private practitioner of internal medicine with a subspecialty in cardiology, from Richmond, Virginia, became President of the American Medical Association (AMA) in June of 1997. Dr. Wootton, who was elected President-Elect of the AMA in June 1996, has served as a member of the AMA Board of Trustees since 1991.

In addition to his service to the AMA, Dr. Wootton is a clinical professor of medicine at the Medical College of Virginia/Virginia Commonwealth University, a Fellow of the American College of Physicians and a fellow of the American College of Cardiology.

Born in Burkeville, Virginia, Dr. Wootton received his M.D. degree from the Medical College of Virginia/Virginia Commonwealth University where he was a member of Alpha Omega Alpha Honor Medical Society. He completed his internship in internal medicine at Roanoke Memorial Hospital, his residency in internal medicine at the Medical College of Virginia, and his fellowship in cardiology at the Medical College of Virginia. He served on active duty in the United States Naval Reserves from 1960 to 1962. In 1996, he received the Outstanding Alumnus Award from the Medical College of Virginia.
