HISTORY

The University of North Dakota School of Medicine and Health Sciences, founded in 1905, was a two-year school of basic medical science until 1973, when the North Dakota Legislature approved initiation of a four-year curriculum leading to the Doctor of Medicine (M.D.) degree. The School offers a statewide, university-based, community-integrated medical education program that places an emphasis on primary care. Practicing physicians, constituting the majority of the faculty, educate medical students in clinics and hospitals throughout the state.

The primary purpose of the University of North Dakota School of Medicine and Health Sciences is to educate physicians, medical scientists, and other health professionals, and to enhance the quality of life in North Dakota. Through its federally funded Indians Into Medicine (INMED) Program, the School also seeks to address disparities in access to healthcare by educating American Indians as physicians and other health professionals.

The first two years of medical education are provided at the UND campus in Grand Forks. The third year is completed in hospitals in Bismarck, Fargo, Grand Forks, and Minot; and the fourth year consists of clinical rotations in Bismarck, Fargo, Grand Forks, and Minot. Students may elect to take the majority of their third year in rural communities through a program called ROME, Rural Opportunities in Medical Education, or the Minot Integrated Longitudinal Experience (MILE), a course of clinical training that third-year students undertake in required clerkships taught over the entire third year, in a longitudinal, integrated fashion. Medical students also have the opportunity to experience training in other parts of the country and the world through fourth year electives. Postgraduate residency training in family medicine, internal medicine, general surgery, and psychiatry, as well as a one-year transitional program, is conducted in the state's four major cities.

In addition to the medical education program, the School offers graduate study in biomedical sciences, clinical and translational science, medical laboratory science, occupational therapy, physical therapy, physician assistant studies, and public health. Undergraduate study is offered in athletic training and medical laboratory science.

THE CONTEMPORARY OATH OF HIPPOCRATES

Today, in the presence of family, friends, teachers and colleagues,
I dedicate myself to the profession of medicine.

I pledge myself to the service of humanity.

I will use my skills to care for all in need, without bias and with openness of spirit.

The health of my patients will be my first concern.

I vow to hold sacred the bond between doctor and patient.

I will hold in confidence all that my patients entrust to me.

I will strive to alleviate suffering.

I will respect the dignity and autonomy of my patients in living and in dying.

As a physician, I recognize my duty to society.

I will work to promote health and prevent disease.

I will advocate for the welfare of my community.

Even under duress, I will not use my knowledge or my skills against humanity.

I will acknowledge my limitations and my mistakes so that I may learn from them.

To uphold these responsibilities, I will maintain my own well-being and the well-being of those
close to me.

I will promote the integrity of the practice of medicine.

In the tradition of my profession, I honor all who teach me this art.

Through honest and respectful collaboration with my colleagues, I will uphold the highest standards
in the service of patients.

I will seek new knowledge, reexamine ideas and practices of the past, and teach what I have learned

Above all, the health of my patients will be my first concern.

This oath I take freely and upon my honor.

This contemporary version of the traditional Oath of Hippocrates was composed by the Harvard Medical
School Class of 1998.

KEYNOTE SPEAKER

Ralph Levitt, MD, is a former clinical professor of medicine at the University of North Dakota School of Medicine and Health Sciences (SMHS), where he served as co-director of Clinical Skills.

A Chicago native, Dr. Levitt received his Bachelor of Science degree from Loyola University and his medical degree from Northwestern University Medical School. He completed a residency at the Mayo Clinic in Rochester, Minn., after which time he was board certified in internal medicine, hematology, and oncology.

After his residency, Dr. Levitt began practice as an oncologist at the Roger Maris Cancer Center in Fargo, a position he held for 39 years. During that time, he was a mentor for numerous residents, a role he completely enjoyed, and was the Center's Principal Investigator for Clinical Research, where he worked on breast cancer prevention. Over the course of many years Dr. Levitt held positions with the North Central Cancer Treatment Group executive committee, served as North Dakota Oncology Liaison for the Medicare Advisory Committee, and was President of the North Dakota Oncology Society.

In 2008 Dr. Levitt accepted a position with the SMHS, where he taught first- and second-year students Clinical Skills and served on various academic committees. His love of teaching was evident to his students, given that he commuted from Fargo to Grand Forks three days per week and won several teaching awards on the nomination of his students. He enjoyed sharing his clinical expertise in areas such as building skills for delivering difficult news, clinical diagnosis, and effective patient-centered communication. He is widely known for his sense of humor, which he used as a highly effective teaching tool.

Also well-known for his use of clinical examples and willingness to share his experiences in the real world of medicine, Dr. Levitt retired in December 2017. He now lives in Minneapolis with his wife and totally adoring dog. He enjoys music, being walked by his dog, reading about history and his heritage, traveling, attending UND hockey games with his eldest son, and spending time with his new granddaughter in Minneapolis and his new grandson in Seattle.
