HISTORY

The University of North Dakota School of Medicine & Health Sciences, founded in 1905, was a two-year school of basic medical science until 1973, when the North Dakota Legislature approved initiation of a four-year curriculum leading to the Doctor of Medicine (M.D.) degree. The School offers a statewide, university-based, community-integrated medical education program that places an emphasis on primary care. Practicing physicians, constituting the majority of the faculty, educate medical students in clinics and hospitals throughout the state.

The primary purpose of the University of North Dakota School of Medicine & Health Sciences is to educate physicians, medical scientists, and other health professionals, and to enhance the quality of life in North Dakota. Through its federally funded Indians Into Medicine (INMED) Program, the School also seeks to address disparities in access to health care by educating American Indians as physicians and other health professionals.

The first two years of medical education are provided at the UND campus in Grand Forks. The third and fourth years consist of clinical rotations in Bismarck, Fargo, Grand Forks, and Minot. Students may elect to take the majority of their third year in rural communities through a program called ROME, Rural Opportunities in Medical Education, or the Minot Integrated Longitudinal Experience (MILE), a course of clinical training that third-year students undertake in required clerkships taught over the entire third year, in a longitudinal, integrated fashion. Medical students also have the opportunity to experience training in other parts of the country and the world through fourth-year electives. Postgraduate residency training in family medicine, geriatrics, internal medicine, general surgery, orthopedic surgery, and psychiatry, as well as a one-year transitional program, is conducted in the state's four major cities.

In addition to the medical education program, the School offers graduate study in biomedical sciences, clinical and translational science, medical laboratory science, occupational therapy, physical therapy, physician assistant studies, and public health. Undergraduate study is offered in athletic training and medical laboratory science.

THE CONTEMPORARY OATH OF HIPPOCRATES

Today, in the presence of family, friends, teachers and colleagues,
I dedicate myself to the profession of medicine.

I pledge myself to the service of humanity.

I will use my skills to care for all in need, without bias and with openness of spirit.

The health of my patients will be my first concern.

I vow to hold sacred the bond between doctor and patient.

I will hold in confidence all that my patients entrust to me.

I will strive to alleviate suffering.

I will respect the dignity and autonomy of my patients in living and in dying.

As a physician, I recognize my duty to society.

I will work to promote health and prevent disease.

I will advocate for the welfare of my community.

Even under duress, I will not use my knowledge or my skills against humanity.

I will acknowledge my limitations and my mistakes so that I may learn from them.

To uphold these responsibilities, I will maintain my own well-being and the well-being of those
close to me.

I will promote the integrity of the practice of medicine.

In the tradition of my profession, I honor all who teach me this art.

Through honest and respectful collaboration with my colleagues, I will uphold the highest standards
in the service of patients.

I will seek new knowledge, reexamine ideas and practices of the past, and teach what I have learned

Above all, the health of my patients will be my first concern.

This oath I take freely and upon my honor.

This contemporary version of the traditional Oath of Hippocrates was composed by the Harvard Medical
School Class of 1998.

PROGRAM

On March 16, the University of North Dakota campus shifted from in-person classes to remote instruction amid the coronavirus pandemic. Spring Commencement ceremonies were canceled to promote physical distancing and avoid further spread of the virus. Thus, this ceremony will be broadcasted virtually at UND.edu/academics/commencement.

KEYNOTE SPEAKER

An educator to his students:
thank you for one last chance to teach you.

Walter Kemp, M.D., Ph.D., was born, raised, and graduated from high school in Libby, Mont., and attended Carroll College in Helena, Mont. For medical school, he attended Creighton University School of Medicine in Omaha, Neb. Following medical school, Dr. Kemp pursued anatomic and clinical pathology residency training at the University of Texas Southwestern Medical Center in Dallas, Texas (UTSW), and a subsequent forensic pathology fellowship at the University of Texas Southwestern Medical Center and Dallas County Medical Examiner's Office. After completing fellowship training, he was an assistant professor of Pathology at UTSW before he returned to Montana to become the deputy

state medical examiner, a position he held for 10 years. While working in Montana, Dr. Kemp obtained his Ph.D. in Anthropology from the University of Montana in Missoula. In July 2015, he took a position as associate professor in the Department of Pathology at the University of North Dakota School of Medicine & Health Sciences (UND SMHS).

He has received Outstanding Teacher awards from UTSW Classes of 2006 and 2007, Golden Apple awards from UND SMHS Classes of 2018, 2019, and 2020, and Portrait Awards from UND SMHS Classes of 2018 and 2020.

He has published two books, one book chapter, and 24 papers. One of the papers were authored with two students in the Class of 2020.

His mother is from Gladstone, N.D.
