**Bismarck student is recipient** 

ogan-Hetherington award presented

A memorial award recently established by University of North Dakota alumna Mary Elizabeth Hetherington, '26, was presented to Mark Super, a senior medical student at the Bismarck, N.D., area health education center (AHEC) of the UND School of Medicine.

School of Medicine. The \$500 annual award, was given the names of the late Charlotte Logan of Bismarck and the late Dr. John E. Hetherington of Grand Forks. It has been designated for a Bismarck student enrolled in the UND School of Medicine.

Miss Logan, '26, was for many years associated with the North Dakota Attorney General's office. She was an Alpha Chi Omega sorority sister of Miss Hetherington while at UND.

Miss Hetherington is a niece of Dr. Hetherington, ex '07, who after further training in the East, returned to Grand Forks and was associated with Healy, Law, Woutat, Moore, and Hetherington medical partners. He was also a lecturer at the UND School of Medicine in the trootic. 1920's

The award was presented by Earl Strin-den, executive vice president of the Uni-versity of North Dakota Foundation, and Dr. Keith Foster, director of the southwest AHEC of the UND medical school presided over the ceremonies. Award presentation ceremonies for upcoming years will alternate between the cities of Grand Forks and Bismarck.

Bismarck. Born at St. Thomas, N.D., Miss Hetherington graduated from UND with a B.A. degree, majoring in English with minors in journalism and education. While at the University she was a member of Alpha Chi Omega sorority, the Wessley Club, the W.A.A. Board of Control, Who's Who, and Phi Beta Kappa.

Who, and Phi Beta Kappa. She was a Grey Gown, president of Matrix and Mortar Board (formerly Quo Vadis), director of the Northern In-terscholastic Press Association, desk editor and women's editor of the Daily pakota Student, on the Daoctah Annual staff, and the Carney Song Committee and the stadium drive. Following her grad-uation from UND, she enrolled in the Medill School of Journalism at North-Mestern University where she received a M.S. in journalism in 1933.

Miss Hetherington's career has been as a journalism teacher and adviser in the Saginaw, Mich., school system. She is now retired and living in Bismarck.

This is the second major scholarship provided annually by Miss Hetherington. In 1974, she established the Alpha Pi Chap-ter of Alpha Chi Omega Scholarship for students in the UND College of Fine Arts which provides a \$250 annual scholarship award.

Mark Super, a senior medical student, was the recipient of the Logan-Hether ington Award. He is pictured here (left) with Mary Elizabeth Hetherington and Dr. Keith Foster, director of the UND medical school's Bismarck Area Health **Education Center** 

### **Funds are sought for Marching Band**

A 22-member committee of Grand forks community leaders has been to be a start-up costs for a University or write start-up costs for a University or Merrie and the start of the start miforms, percussion and brass instru-miforms, and for the reconstruction of facil-ties for storage of uniforms and equip of the storage of uniforms and equip dent, said the group's chairman, Ed-tart, and core the group's chairman, Ed-tart, and core the storage of uniforms and the storage of uniforms and the storage of uniform and the storage of uniforms and the storage of uniform and the storage of uniforms and the storage of uniform and the storage of the storage of uniform and the storage of uniform and

sity has committed support for the direc-tor's salary and other on-going expenses, said President Thomas J. Clifford. The 70-piece band will consist of 64 instru-mentalists, five flag bearers, and a drum major.

Director of the UND Marching Band is slated to be Mike Blake, a faculty mem-ber in the UND bepartment of Music who currently directs the University's Jazz Ensemble.

Christenson said that if the fund-rais-ing effort is successful, auditions for the

**Merry Christmas!** From all of us in the UND Alumni Office

Marching band will be held in March and April. Presently enrolled UND students, as well as high school students who will be reshmen at UND this fall, will be invited to audition. The UND Marching Band — the first at the University since the early 1960s — will premiere in the fall. Thristenson said contributions for the band should be made to the UNIVERSITY OF NORTH DAKOTA FOUNDATION for the UND MARCHING BAND FUND, P.O. Box 8157, University Station. Grand

### **Centennial Logo** competition announced

The University of North Dakota, the state's oldest institution of higher education, is sponsoring a design com-petition to select an official logo to be used during UND's Centennial observance.

According to Dean Emeritus D. J. Robertson, chairman of the UND Cen-tennial Committee, and UND Foundation President Warren Hanna, chairman of the Alumni Association Centennial Com-mittee, the logo will be reprinted on stationery, announcements and other Cen-tennial-related items, beginning in 1980 and extending through 1983.

The University of North Dakota was founded on Feb. 27, 1883, when Dakota Territorial Gov. Nehemiah Ordway signed into a law a bill establishing the school. It was the first official use of the expression

(Logo . . . continued on page 9)

### **UND** Foundation receives \$100,000 in AT&T stock

The UND Foundation has received a gift of approximately \$100,000 from the estate of Miss Leanna Gibbens, a 1924 graduate of UND, Earl Strinden, execu-tive vice president of the UND Alumni Association and Foundation, announced recently.

The terms of the agreement stipulate that 1,800 shares of stock in the American Telephone and Telegraph Co. be given to UND to establish a memorial endowed gift in memory of Miss Gibbens' parents, Albert S. and Alice Gibbens.

Income from the endowed gift will be used for special needs as determined by the UND Foundation board of directors, Strinden said, in accordance with the agreement between Miss Gibbens and the Foundation.

Miss Gibbens' parents came to North Dakota from Illinois, and lived for some years in Towner County, near Cando, N.D. She was one of six children who grew up in North Dakota. Albert Gibbens was an early North Dakota législator, serving in the State Senate.

Leanna was a member of the Delta Gamma Sorority while a student at UND, in addition to being a member of Phi Beta Kappa. She taught school in Beach, N.D., after graduating in 1924, traveled to Utah for a short time, and settled in Seattle, Wash., in 1928.

In 1929, she joined Pacific Bell Tele-phone company, and in 1938 Miss Gibbens was the first woman to be promoted to a management position. She retired in 1966 as a tariff engineer.

Miss Gibbens was active in Soroptimist International, and was president of the Seattle chapter in 1955. She died on Sept. 10 of this year.

Leanna Gibbens

Strinden said, "Leanna Gibbens had a deep appreciation of the sacrifices made by her pioneer parents in giving their chil-dren educational opportunities. Her gen-erous bequest will, in the name and memory of her father and mother, offer to the students of today and the future a greater educational opportunity at UND."

### **Report from campus**

By Earl Strinden Alumni Assoc. Executive V-P

### **Happy Holidays**

Merry Christmas from the board of directors and staff of your Alumni Asso-ciation and Foundation. We wish you the best of joy and happiness for this holiday season and throughout the coming year.

### Reflections

In reflection, 1979 was a very good year. For the University, it was a year of record enrollment and satisfying ac-creditation reports for several colleges and departments.

The Fighting Sioux athletic teams brought honor and recognition to the Uni-versity with several championships in-cluding golf and tennis, and with the hockey team winning the prestigious Western Collegiate Hockey Association (WCHA) title and receiving national recognition with a second-place finish in the NCAA Hockey Tournament.

The Fighting Sioux football team not only won the conference championship but set a record of their own by winning 10 regular season games — the most 10 regular season games — the most victories ever for a UND football team in the University's history.

For the Alumni Association, it was a year of expanding programs and in-creased participation by members of our alumni family.

The Christmas season is a time to re-member and to appreciate. It is again an opportunity to say thank you to you, the loyal alumni. You continue to play a key role in the growth and the development of this great University.

### **Tuition costs**

One of the questions asked frequently at our alumni reunion gatherings around the nation is "What does it cost to attend the University of North Dakota?"

Recently, the National Associaton of State Universities and Land Grant Col-leges published the results of a survey giving a comparison of tuition costs, fees, and room and board costs at public colleges and universities.

This survey showed charges at all institutions to have increased an average of five percent during the last year — an increase substantially less than the 9.3 percent increase in the average consumer price index for the same period.

The survey also showed that the median total charges — tuition, fees, room and board — for an in-state resident attending a state or land-grant university is \$2,333, and for a non-resident tie \$3,667. The national median for resident tuition and fees is \$781 for the 1979-80 school year, and room and board averages \$1500 year, \$1.589.

How does the University of North Dakota compare to these statistics? At UND, the total cost for a nine-month college year, excluding expenses for transportation, clothing and other per-sonal items, is \$2,082 for a resident student. Resident tuition and fees total \$645 per year. Room and board at UND is \$1,160. As you can see, the University of North Dakota is substantially below the national median in all of these categories.

#### Alumni Review **USPS 651980**

#### Vol. 62 No. 4 December 1979

The University of North Dakota Alumni Review (USPS 651980) is the official publication of the University of North Dakota, Grand Forks, ND 58202, Published monthly except for July and August by the University for alumni and former students in the interest of the University of North Dakota. Second class postage paid at Grand Forks, ND 58201. Any correspondence and address correction forms should be sent to the Alumni Review. University Station, Grand Forks, ND 58202.

Produced by the UND Alumni Association with editorial assistance by the Office of University Relations. Robin Selvig, editor.

Articles appearing in the Alumni Review may be reprinted without prior permission.

ALUMNI ASSOCIATION BOARD OF DIRECTORS

President: Paul Larson: First Vice President: James Ramsland; Second Vice President: Merlin Dewing: Executive Vice President: Earl Strinden; Treasurer: Gerald Skogley; Athletic Board of Control: Gordon Caldis and Mark Foss; Honorary Charman of the Board J Juoyd Stone: Direc-tors: Thomas C Barger, Eugene Dahl, E, Fox Jr, Waren Hanna, Albert Harti, JoAnne Bridston Hedlin, Chuck Johnson, J. Emmet Judge, James Kack, Don P. Miller, Gilbert Olson, Beatrice "Bet-ty" Peterson, Daniel Schorsch, James Seifert, Richard T, Smith, Lowell T, Swenson, Rita Roach Traynor, David Vaaler, Thomas J. Clifford.

#### UND IS AN EQUAL OPPORTUNITY INSTITUTION

Several conclusions can no doubt be derived from such statistics. I like to think, however, the favorable rates in North Dakota reflect the efficiency of a University of this size compared to some of the very large universities in the na-tion. This does substantiate that UND operates an efficient food and housing service, a goal and a source of pride for Loren Swanson, who until his untimely death, served as vice president for oper-ations. ations

From these statistics, we can also con-clude that the people of North Dakota still place a high priority on furnishing quality education at a reasonable cost to the young citizens of this state. North Dakota con-tinued to rank at the top in per capita effort for education. Unfortunately, with a stable or declining population, this effort is becoming increasingly difficult.

We are a long way from the fees as outlined in the 1895-96 UND student cata-log. Then, the matriculation fee was \$5 for residents and \$10 for non-residents. Dormitory room rent was 50 cents per week, and the cost of board was \$2.75 a week

But, it is gratifying to know we are doing better than most other public col-leges and universities in holding down educational costs for our students. I would be remiss if I did not also mention the role alumni and private giving has played in making this desirable situation at the University of North Dakota.

Have a joyous Holiday Season! We are looking forward to making contact with you in 1980.

# **News briefs**

A \$23,000 HEW grant has been awarded to the UND law school's elderly law clinical project, acting dean Randy H. Lee announced recently. Through the proj-ect, part of the law school's general legal aid program, law students are supervised in their representation of elderly clitzens by practicing attorneys. Kathryn Dietz directs the law school's over-all legal aid curriculum, and the elderly law program is supervised by Karen Wills.

Roger W. Davis, M.D., has joined the Roger W. Davis, M.D., nas joined the physical medicine and rehabilitation staff at UND's Medical Center Rehabilitation Hospital as the hospital's fourth physi-atrist. A native of Utah, Davis was pre-viously the associate director of rehabili-tation medicine at McKay-Dee Hospital Center in Salt Lake City.

Dr. Robert C. Painter has been named assistant dean and director of health education for the UND School of Medi-cine's northeast Area Health Education Center (AHEC). Dr. Painter's primary responsibilities will be for the educational activities of senior medical students and he will serve as liaison between the medical school and the northeast area communities. An internist at the Grand Forks Clinic, Ltd., Dr. Painter replaces Dr. Edmund Weis Jr., who served as acting assistant dean.

## **Reunions & tours**

Jan. 22-29, 1980 — Hawaiian Holiday on Maui (see ad this issue). March 25-April 8, 1980 — Australia/New Zealand Tour (see ad this issue). April 12, 1980 — Minneapolis/St. Paul, Minn. (details to follow). May 21-23, 1980 — Alumni Days, UND

campus. Sept. 18-26, 1980 — Bavarian Holiday (see ad this issue). Oct. 3-4, 1980 — Homecoming 1980.

### Homecoming 1979

Several lists of those attending Home-coming 1979 festivities were included in the last issue of Alumni Review. This month we continue with listings.

### **Medical School**

Those attending from NORTH DAKOTA: BISMARCK — Dr. and Mrs. Al Samuelson, '50 (Betty

rson, '45); FARGO — Dr. and Mrs. Don Lamb, '54 (Mary w.

Wright, '55): GRAPTON — Dr. Myron Scheflo, '53; GRAND FORKS — Dr. Walter Wasdahl, '52; Dr. and Mrs. Tom Johnson; Dr. and Mrs. W.E. Cornatzer; Dr. and Mrs. Heige Ederstrom; Dr. John Vennes, '51; HARVEY — Dr. David Halliday, '52; Dr. Lowell Burner, '62;

HARVET - Boyun, '43; ROLLA - Dr. Arnold Overland, '58; VALLEY CITY - Dr. and Mrs. John. Goven, '55 (Carol Simonson, '53); WILLISTON - Dr. Gordon Ellis, '49;

Those attending from other places: PORT COLLINS, COLO. – Dr. Robert Ellis, '51; KANAKEE, LL. – Dr. Ray Schale, '59; WINNIPEG, MAN. – Dr. John Wade, '56; MOCHERGAD, MINN. – Dr. Richard Finlayson, '59; ROCHERGAD, MINN. – Dr. Richard Finlayson, '59; ST. LOUIS PARK, MINN. – Dr. J. Roald Puzgleistad,

'59; ST. PAUL, MINN. — Dr. and Mrs. David Mersy, '64 (Patricia Gilmour, '66); RANCHERO, N.M. — Dr. John Saiki, '58.

#### **Delta Gamma**

Those attending from NORTH DAKOTA BEULAH — Mr. and Mrs. Emmanue el Liebelt '50

Those attending from NORTH DAKOTA: BEULAH – Mr. and Mrs. Emmanuel Liebelt '50 (Merilynn Taintor, '50): BISMARCA – Mr. and Mrs. Mike Addiefson, '73 (Peggy Reuter, '73); Mr. and Mrs. Bill Schmidt, '72 (Patricia Hallowell, '74), Jancie Schultz, '58 (Weisner): CARRINGTON – Mary Klein (Gilletto), '79; CAVALIER – Mr. and Mrs. Adrian Askew, '63 (Garole Mc Pherson, '59); Mr. and Mrs. Arthur Johnston, ex '31 (Juantia Harris, '31); CRYSTAL. As basketball season gets under way

# Gunther's preseason optimism guarded

(Editor's Note: When this was written the Sioux had not yet played a baskethall game. The Sioux did win their season opener, an exhibition game against the University of Manitoha, by a score of 70-58.)

By TIM MADIGAN Dakota Student Sports Editor

The first game has yet to be played.

It is a time for eternal optimism among coaches and players. Every team is undefeated. The failures of last year are but distant memories.

So it is as the University of North Dakota men's basketball team prepares for another season.

Not that the UND cagers or their coach Dave Gunther have that many unpleasant memories from a year ago.

The Sioux were 19-9 in 1978-79, and competed in the Division II playoffs. The team finished in a tie for second place in the North Central Conference, with a 7-5 record. It was another in a long string of successful campaigns that have been a

Fighting Sioux fans and players alike rejoice at Dusty Carroll's (#9) goal, which led off a 6-3 victory over the arch-rival University of Minnesota Gophers Nov. 30. The Sioux went on to sweep the home series, edging the Gophers 7-6 in overtime.

### Football season comes to close

One of the University of North Dakota's best football seasons came to a disap-pointing end at Jackson, Miss., where the Fighting Sioux dropped a 3-15 decision to nearby Mississippi College in the first round of the NCAA Division II playoffs. The UND season ended at 10-2-0. The 10 wins is the most in UND history. Second-year coach, Gene Murphy said, We beat ourselves by critical mistakes. Two turnovers in the third quarter (a fum-ble and an interception) completely killed our momentum.

Be and an interception) completely killed our momentum. "We had a very tough assignment. Mississippi College has outstanding team speed and our defense had contained that speed in the first half, but we let them out of the bag in the third quarter. "But we're all very, very proud of this great football team. We were picked to finish fourth in the North Central Con-ference before the season started and won the North Central Conference title and were highly ranked all season by the NCAA. Those are tremendous ac-complishments and we are very proud of them."

### **Basketball Schedule**

Home games include:
Dec. 12 - Univ. of Tennessee-Martin
Dec. 15 — Puget Sound University
Dec. 17 - Yankton (S.D.) College
Dec. 21 - Mount Mary (S.D. College,
7 p.m.

\*At Region VI AIAW Championship, Nov. <sup>n</sup>-10 at Warrensburg, Mo. UND inished 16-16 win-loss for season

North Dakota trademark since Gunther took the head coaching job 10 years ago.

And Gunther is predictably optimistic about the chances of this year's team.

"We can be a very good basketball team," Gunther said. "I think the talent is there. Everyone has worked hard in pre-season drills, and every guy out there wants to have a good team."

However, Gunther's club faces some major obstacles this year.

One is a grueling schedule — Gunther says it's the toughest schedule in his 10 years at UND. The Sioux face the likes of Division I schools Minnesota and Port-land State, and perennial Division II power Puget Sound, all before the North Central Conference campaign opens in late December.

Gunther also faces the task of replac-ing the graduated Chris Fahrbach. As a forward, Fahrbach was UND's leading scorer and rebounder of a year ago. He finished his career as the third leading scorer in North Dakota history.

"We're not going to be able to replace Chris as such," Gunther said. "You just don't replace your leading scorer and re-bounder. But we are looking for more overall balance this year."

Seven lettermen, one freshman and three junior college transfers are in the Sioux camp this year, and it is from that

group that Gunther hopes the balance will come.

Returning starters include senior forward Mike Greulich, junior center Todd Bakken, and junior backcourtman Doug Moe.

Greulich and Bakken were the second and third leading Sioux scorers a year ago, and Gunther hopes that the pair will help fill the void left by Fahrbach's departure

But as Gunther says, "We have seven lettermen, and all of them are going to be counted on. The junior college trans-fers should also make a contribution for

If Gunther is optimistic, it is a guarded optimism

"Don't put me down as saying we will be better than last year," Gunther said. "We can have a good team, but there are so doggone many intangibles that have to be considered.

"One is injuries. Another is the schedule. Another is how fast the team jells."

But Gunther is pleased by what he has seen so far from his team. After all, the Sioux haven't lost yet and success in the past would seem to give promise for the future. Hope springs eternal.

Lou Wangberg, Minnesota; Wayne Sanstead, North Dakota

# **Neighboring state officials have similarities**

### By ROBIN SELVIG

Wayne Sanstead and Lou Wangberg have a lot in common.

First, each did his undergraduate work in the other's home state. Sanstead, who considers Minol, N.D., his hometown, received his bachelor's degree in speech and political science from St. Olaf College in Northfield, Minn. Wangberg, a native of the Halstad/Hendrum, Minn., area earned his B.A. in geography from the University of North Dakota in 1963.

Although Sanstead moved on to Northwestern University for his master's degree in public address, and Wangberg stayed at UND to complete his master's degree in 1964, both attended the University of North Dakota to earn doctorates — Sanstead in 1974 and Wangberg in 1970.

Both have backgrounds in education — Wangberg was a school administrator in Worthington and Bemidji, Minn., following several teaching assignments; Sanstead was a social science teacher in the Minot Public Schools for nearly 20 years.

Perhaps the most unusual of Wangberg's and Sanstead's similarities, however, is that each is currently serving as lieutenant governor of his home state. Sanstead is the senior politician, serving as the state's second-in-command since 1973 following terms in the N.D. House of Representatives and the N.D. State Senate. Wangberg has served his state only since January of this year.

As far as their duties as lieutenant governors of North Dakota and Minnesota, both have the power to act as governor when he is out of the state, and both travel to various meetings and other activities as representatives of the governor.

However, the similarities between Wangberg and Sanstead end there.

Lou Wangberg is a Republican. He was active in the Young College Republicans while a student at UND, but said as time elapsed, education became more important, and "politics went by the bye."

Wayne Sanstead is a Democrat, and although he says he found teaching "wery satisfying," Sanstead has always had a fascination with politics. He served in the House of Representatives from 1964-70, followed by a term in the State Senate in 1971-73. In 1978, Sanstead was elected vice chairman of the National Lt. Governor Conference Midwestern Region.

visit to campus. Here, he is talking to Chuck Haga, a UND journalism professor.

Wangberg, a member of Sigma Nu fraternity while on campus, likens his position as Minnesota's lieutenant governor to that of Minnesota's own Vice President Walter Mondale. Wangberg said he spends part of almost every day with Gov. Al Quie, with his primary responsibility being that of counselor and adviser to the governor. Currently, for example, Wangberg said he was helping Gov. Quie decide whether or not to call a special legislative session to form some policies on assistance to citizens of Minnesota who may be unable to afford fuel necessary to get through the winter.

Wayne Sanstead, right, North Dakota's lieutenant governor, talked with UND faculty members and students during a recent

His training in education, and background as a school superintendent, well prepared him, Wangberg said, as many of the same things he was involved with as a superintendent confront him as lieu-

Minnesota Lt. Gov. Lou Wangberg took a break to meet with an Alumni Review reporter, during his visit to the UND campus for Homecoming 1979. He spent much of his time meeting with "brothers" at the Sigma Nu house, where this photo was taken. He said many Sigma Nu alumni are interested in working to improve the UND chapter.

tenant governor — public relations, conflict resolution, and budgets. In addition to serving as an extension of the governor, Wangberg said, his responsibilities include "serving on 15 or 20 major and minor boards or commissions of state government," and ceremore than 250 invitations per month, and he gives sight or ten major speeches each week

When this interview took place at Homecoming 1979, Wangberg had been serving as lieutenant governor for about 10 months. In that time, he said, he had served as governor for about 1½ months because of Gov. Quie's trips out of state. (He jokingly noted that he hoped no one realized he was two miles across the North Dakota border during his visit to the UND campus for Homecoming, because Quie was out of the state, and Wangberg was serving as governor.)

The position of lieutenant governor is "very fulltime." Wangberg said. It was officially made fulltime in 1972, when the constitution was amended. His duties are totally in the executive branch of government — he convenes the state senate for five minutes every other year, but does not preside.

Wangberg and Quie have developed a close working relationship, the lieutenant governor noted, but he said he did not know Quie until after the election. He got re-involved in politics while superintendent of schools in Bemidji. A special congressional election was held to replace agriculture secretary Bob Bergland, and Wangberg made a number of friends during the campaign that elected Arlan Stangeland to the U.S. House of Representatives.

Somewhat of a philosopher, Wangberg stressed that he is in the "people business," and that a fundamental reason for his serving in public service is, "to get a broader view of how to expand the public's lives."

Wangberg fondly reminisces about his years at UND. He says he has "deep, deep, warm memories," and that he "can't think of a better part of my life." He talks about the people who were special to him — John Penn (speech), Henry Tomasek (political science). Bernt Wills (geography), Russ Peterson (education) and many others. He talks about his experiences as a member and later as president of the Sigma Nu fraternity – the management skills learned, the inter-

### Wangberg, Sanstead reminisce about their UND years

personal relationships developed — all as important as the educational development.

Hent. He talks about how he got started at UND — taking courses in the summer session immediately after graduating from high school, noting that he started as a speech major after talking to John Penn ("One of the people able to get at ne's conscience and perspective," Wangberg noted). He recalled receiving a "B" from the "very demanding Valborg Oslund (English)," along with an "A" from Robert Wilkins (history), and decided he could make it in college — he had developed the confidence.

Wangberg said after a short time he decided speech was not the right major, and that he loved the geography courses he was taking, thus decided to change his major. He calls college days an 'opportunity to explore and find ourselves; a chance to redefine our values."

He met his wife, Jane Ormiston, '62, when both had minor roles in the play "The Matchmaker." She was also a member of Delta Delta Delta sorority.

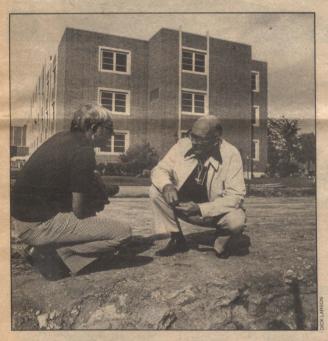

Wangberg said he "loves the political life," and that he finds it "stimulating and satisfying." As for career plans, he said, "No one stays lieutenant governor as long as I can, and I know I have some career ahead of me. I just don't know what it is." Sanstead, who only recently assumed fulltime duties as North Dakota's lieutenant governor, also talks fondly about his days as a student on the UND campus. However, his student days were a bit unusual. He was already lieutenant governor of North Dakota when he decided to pursue his doctorate in education. (He quips something about being a North Dakota institution, thus he decided to earn his Ed.D. from UND.)

He lived in married student housing with his wife Mary Jane, and two sons, and that, combined with his return to school under the G. L bill, made news via the Associated Press across the country.

Several newspapers, however, got the story a bit confused, Sanstead notes. For example, in one version he was listed as the lieutenant governor of Grand Forks (no, the town has not yet seecded to form its own state), and instead of listing his age at 38 at that time, it was 78.

Sanstead says he received letters from well-wishers across the country on his achievements, and says he even received letters from people "younger" than he was wanting to get information about going back to school.

He wrote his dissertation on "The Study of the Political Attitudes of North Dakota High School Seniors," and said

Lee Gerhard (left), North Dakota state geologist and chairman of UND's Department of Geology, and Wilson Laird, former state geologist and UND faculty member, discuss the new North Dakota Geological Survey core and sample library to be constructed on the UND campus.

### New geological survey building to be named in honor of Wilson Laird

A new North Dakota Geological Survey building slated for spring construction, will be located on the UND campus and named in honor of Dr. Wilson Laird, former state geologist and university faculty member.

The new structure, to be called the North Dakota Geological Survey (NDGS) Wilson M. Laird Core and Sample Library, will be located adjacent to Leonard Hall and will provide 21,000 square feet of space for the library, receiving rooms and laboratories. A \$500,000 appropriation for the structure was provided by the North Dakota Legislature.

Since 1941, North Dakota law has required the survey to maintain a library of cores, samples and geophysical logs from exploration and development of oil, gas, lighte and subsurface minerals. Dr. Lee Gerhard, survey director and geology department chairman, noted that materials have accumulated rapidly since the discovery of oil in the state. According to Gerhard, the new Laird Core and Sample Library will greatly enhance the usefulness of these samples, not only for the survey but also for researchers, students and industry.

Wilson Laird joined the UND faculty in 1940 and was named state geologist and NDGS director one year later. He left North Dakota in 1960 to serve as director of the Office of Oil and Gas in the U.S. Department of the Interior, The State Board of Higher Education conferred upon him emeritus rank, a recognition normally granted only to distinguished faculty who have reached the mandatory retirement age.

From 1971 to 1979, Laird was director of the American Petroleum Institute's committee on exploration, guiding efforts to maintain active exploration and assure a level of U.S. energy sufficiency. Retired and living in Kerrville, Texas, he continues to do consulting work in geology and government relations. he found some interesting results — and perhaps as a politician, some disappointing results.

pointing results. For example, Sanstead concluded that the study demonstrated that "North Dakota high school seniors in 1974 did not hold a supportive view of government or public officials; rather cynicism and alienation predominate." He noted that "the impact of the conventional civics and government curriculum on any of the political socialization indices (e.g., political efficacy, expectation for political realism, even political knowledge) is negligible." However, he did find that "The realization between school classification level and student perception and response was significant; it seems the of the political system or more politically efficacious the students were."

As a teacher, Sanstead said, his students were perhaps more politically aware than the average student. Most of his students, he said, "took pride in the fact that I was not only their teacher, but also the lieutenant governor." And he says, "I miss the classroom a great deal. I gained great satisfaction in my teaching career." Until recently, Sanstead's duties as lieutenant governor were "largely ceremonial," he said, in addition to presiding over the North Dakota Senate. Now, however, the duties of federal aid coordinator have been shifted to the lieutenant governor, making the position fulltime.

As federal aid coordinator, Sanstead is responsible for energy management and conservation, state and local planning, and community action assistance. He is also responsible for the operation of the state intergovernmental clearinghouse, special projects and he has been directed by Gov. Arthur Link to plan and carry out a study of executive branch re-organization.

Sanstead said one of his goals, when he was first elected lieutenant governor, was to work for a fulltime lieutenant governorship. He has now moved his family from Minot to Bismarck, North Dakota's state capitol. He said he 'likes politics,'' and he finds ''public service natural.''

As for his future, Sanstead said he has many friends and associates in North Dakota, "and if the voters continue to give me support, I will continue in public life."

discouraging you from selling? A charitable gift annuity

with the UND Foundation may be the answer!

It's not unusual these days for the tax on long-term capital gains to deter an owner from selling property. Such was the case for R. Lyle and Edith Webster of Honolulu, Hawaii. Lyle, UND class of 1926, a journalist who has lived in various parts of the world during his distinguisted career, had purchased a house near Washington, D.C., a number of years ago for about \$19,000. Recently, the Websters had been receiving rent from this property of \$2,069,60 per year, from which they paid the taxes, insurance, and a management fee to a local realty firm.

The Websters had long planned to make a gift to the UND Foundation to set up a lectureship on international journalism at the University. When they read the Foundation's booklet on the CHARITABLE GIFT AN-NUITY, they chose to make their contribution with the Washington area house.

Here's how it worked for the Websters. The house was given to the UND Foundation, which sold it for \$47,500. Lyle and Edith will receive an annuity payment for life of \$2,850 per year. They also receive a charitable contribution income tax deduction of \$16,620, which can be applied for up to five years if necessary. In addition, part of their capital gain escapes taxation, and the balance of the capital gains tax is paid over the years they will be receiving the annuity, rather than all of it paid in the year the sale was made. Of their \$2,850 annual annuity, \$1,298 is reported as ordinary income and \$1,419 as the lower-taxed capital gain. The balance is tax free.

If your situation is similar to the Webster's, we would be happy to provide you with more information. Mail the coupon below, or call and tell us about what you have in mind. Our telephone number is 701/777-2611.

### Brick, marble and memories -

# 1930-1980: Merrifield Hall's 50th anniversary

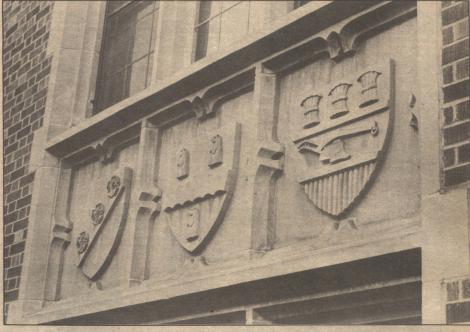

### By COLLEEN HAGEN MORIN

The outside walls of the building are embossed with crests depicting the wild prairie rose, flickertails, and sheaves of wheat beside a plow. The inside walls are embossed with the voices, the memories, and the comings and goings of UND students and faculty covering a span of 50 years. The building is Merrifield Hall.

Named New Merrifield Hall, it was completed in 1930 and dedicated in 1931 as the Liberal Arts Building. In the 1931 Dacotah Annual, then University President Thomas F. Kane wrote in his 'The Year in Review,' "The university work has been done under more favorable circumstances this year than any time before in the last 12 years, by use of the new Arts Building, much the largest building on the campus, which contains 40 classrooms, with two large lecture rooms and certain supplementary rooms, and 40 offices for teachers."

offices for teachers." To unders Day 1931, marked the dedition of New Merrifield and many outstanding individuals of the era werrihere to pay tributes or to be honored. Judge Sveinborn Johnson. "66, "07, and the the chiel legal counsel and a motoss of law at the University of the first of the the legal counsel and a profess of law at the University of the same the chiel legal counsel and a profess of law at the dedicate aviation for North Dakota, delivered the the same the chiel legal counsel and a profess of law at the dedicate aviation the same the chiel legal counsel and a profess of law at the dedicate aviation the same the same the same the same profess of the same the same the same the same the same the same profess of the same the same

State legislators, university alumni and presidents of state educational institutions were invited as special guests of the university for the dedication. J. E. Davis, chairman of the state board of arministration officially presented the building, which was accepted on behalf of the University by President Thomas F. Kane. Students acting as ushers took guests on tours of the building following the dedication ceremonies.

With a hint of architectural artistry, symbols of North Dakota give life to the staid exterior of Merrifield Hall.

According to Louis G. Geiger in his book, "University of the Northern Plains," "The need for the liberal arts building had become acute in 1924 upon the discovery that the old Merrifield Hall (also known as Old Main), housing both offices and classrooms, was settling so rapidly on its weak foundations that it was necessary to remove the upper floors immediately and to erect a one-story barrack, quickly dubbed the 'cow-barn,' on the mall for temporary classrooms.

"Despite the desperate need, however, the economy-minded legislature of 1925 refused to vote any money for a new building. An appropriation of \$225,000 was approved in 1927, with the intention of providing a building that would be usable but not entirely finished. "The Board of Administration proceeded to let contracts to start a building costing about \$350,000 when completed, on the chance that the 1929 legislature would provide the additional funds. Not a few of he legislators in the 1929 session considered this a pressure tactic, and although an appropriation of \$161,000 was finally approved, it was not done without considerable criticism of the University."

This was during the days when the Nonpartisan League was in political control of the state and it was difficult to get appropriations for the University and for the Agricultural College, both on the eastern edge of the state. When the Independent Voters Association (IVA) came into political power in 1927 they decided to try for an appropriation of \$225,000, while planning a \$400,000 building.

When the 1929 session began, the roofed shell of Merrifield Hall stood erected, tar paper covering the windows, with no money to complete the structure. After much political manuevering, an appropriation bill was signed by Gov. George Schafer making the necessary money available and students who came to UND in 1930 saw Merrifield Hall completed and ready for occupancy.

Although their method was unorthodox, it was not unlawful at the time and the legislators excused themselves by saying there was no law against doing what they did. But their methods did result in the creation of a North Dakota statute which provided a penalty and/or fine for any member of higher education or managing head of any state institution, who would knowingly exceed legislative appropriations for any designated purpose.

When it was built Merrifield Hall was by far the largest building — four stories high and 300 feet long — on campus. It was entirely fireproof, and architect Joseph Bell DeRemer, whose first campus building was Budge Hall, designed it with some hint of elegance beyond the absolute necessities.

Liberal Arts Dean Vernon P. Squires, who had been desperately ill during the final phases of Merrifield's construction, had worked diligently to secure the appropriations for the construction and equally hard during the planning stages and the preparations for occupancy. He died six months following the dedication, and as a fitting tribute, his body was laid in state in Merrifield Hall.

Merrifield has undergone certan major structural and cosmetic improvements in recent years including the installation of an elevator and ramps in 1975, providing total accessibility for handicapped students. Throughout the summer of 1976, new heating-ventilation-air conditioning systems and new windows were installed, comprising the first rennovations in those systems since the building opened in 1930. Koom 300, the lecture bowl, was completely remodeled to include a new audiovisual system, new seats and new lighting. Other improvements include the addition of a safety rail on the outside steps in 1971, a fire alarm system, rewiring new cellangs in all of the corridors and some classrooms, roof repair, and repainting and remodeling in some of the rooms and offices.

Despite these rennovations, many alumni will fondly remember the banging and steaming of Merrifield's radiators during the winter, and the way the windows would whistle when the wind blew. Many of Merrifield's unique architectural features remain unchanged including the marble window seats below the bayed windows on the second floor landings, which still provide quiet study and gathering areas for students.

Tucked high above the same landings studious little carved gnomes, noses pressed into open books, survey those students huffing and puffing their way wherrifield's three flights of stairs. At he north end of the ground floor two green ceramic fountains that once provided refrigerated drinking water for students and faculty, have since been filled with sand and relegated to ashtrays with more modern fountains being installed throughout the building. This was done despite an editorial crusade in the Dakota Student, led by Larry Aasen, vt, for the fountains 'revitalization.

Marble floor-standing ashtrays once scattered strategically throughout the building, have since "winged" on their way assumably with the help of those people who intended to provide better accommodations for those unique fixtures. Small scrolled ledges, possibly the display areas for statues in an earlier era, now find uses as plant stands in some offices.

Merrifield has its original terrazzo (inlaid marble) floors in the hallways, and on some of the floors the coat hooks lining the halls remain in use. Students continue to sit on the hallway window ledges waiting for or biding their time between classes.

Colored tiles in relief adorn the wall at the north end of the ground floor depicting fond images of North Dakota including the beautiful prairie rose, our state flower; a buffalo and an Indian brave who once roamed this native prairie; and a cowboy holding tight to the reins of his bucking horse. Along a spiral stairway leading to the roof where a small building once housed the University weather station, names of former

The hallways of Merrifield, with their shining floors, and doors, and doors, and doors, and doors, are part of the memories of all students who have attended classes in the building.

### students, faculty and employees are scratched into the brick walls.

Built as a liberal arts building, Merrifield Hall once housed the offices for the College of Arts and Sciences, and although various departments have come and gone, the basement of the building has always been home to the journalism department, and from 1931 until 1947 it also housed the university press. Today the departments of English, history, languages, philosophy, religion, and Indian studies are located in Merrifield as are the North Dakota Newspaper Association (NDNA) and the telephone switching equipment for the entire campus.

The stories about personalities and occurrences in Merrifield Hall are as varied as the building itself, and possibly because it was one of the taller buildings on campus for its time, there seemed to be a penchant for people and other assorted objects taking flight out of Merrifield's windows. One popular story recalls the time Richard O. Hale, an English professor renowned for his classroom antics, jumped out of a classroom window. When he returned to class, he requested that the class write their reactions to his 'text.'

Another story comes from Lee Bohnet, '51, currently sports information director for UND. Bohnet remembers when Joe Silovich, '50, an active football and hockey athlete, affectionately known as 'Joltin' Joe.'' was attending the University. Silovich had a big dog, a labrador named Bruiser, who accompanied him to all of his classes, including those on the third floor of Merrifield. The story goes that one day a group of students, motive: unknown, corralled that scholarly dog and sent him on a short flight out of a third-floor window into a snowbank below.

Animals have a habit of figuring into many of the stories about Merrifield Hall, in particular a story about a cow on the third floor is recollected but the details are vague. Ernest "Mick" Simmons, "38, recalled that the cow incident happened while he was a student during the 1930s, but he was sorry to say that he wasn't involved in it.

"As far as pranks," recalled Simmons, "there weren't many as we were just leaving the depression era, and things

Following the pattern of 50 years of students, Michell Leidal, a nursing student from West Fargo, N.D., spends her time studying and waiting for her next class seated on one of the window seats in the hallway of Merrifield.

weren't too funny, — if you know what I mean. But I do have one memory regarding rumors about whether or not papers were graded on the curve.

"The answer was no, the professors just go up to the top floor of Merrifield and drop the test papers down the stairwell, and they are graded according to where they land. If your paper makes it all the way to the bottom you receive an 'A,' and so on."

Simmons called Merrifield his "home away from home" while he was a student, figuring that 80 percent of his classes were in that building. "I shifted gears and ended up with a degree in commerce through the school of marketing, but my heart was always in journalism," Simmons added.

of spending long hours at class in Merrifield Hall. According to Boyd Christenson, '59, ''During my freshman year it seemed

The "spirit" of Merrifield as much as the building itself, lives in the memories of students who have attended classes there. An enormous cast of characters, people and personalities have given Merrifield Hall a personality of its own, and although there have been some changes and renovations, the personality of Merrifield Hall remains unique. Unchanged in the memories of former students, for many the memory of "college" is Merrifield Hall.

# Nursing dean learns about life in China

#### By JUDY HARRIS Medical Information Officer

"Stereotyping. It seems everyone has that special image of themselves and those 'others' out there," points out Dr. Elisabeth Zinser, dean of UND's College of Nursing. "But it's a shame when it's utilized in any negative manner, particularly if it's done to simply fill in a gap brought on by lack of communication. And yet it's certainly gratifying when those unnecessary stereotypes break down for the better."

This acknowledgement epitomizes the "gist" behind Dr. Zinser's 21-day trip to China during this past summer. She and 16 other women from all walks of life toured the land of 900 million people as guests of the Prominent Women's Tour of China, co-sponsored by the U.S.-China Peoples Friendship Association in Los Angeles and the All China Women's Federation in Beijing.

Dr. Zinser was the only representative from the rural midwest. And this tour was the first official women's delegation to visit China since initiation was made to normalize diplomatic, trade, and cultural relations between China and the United States.

"Since few contacts or exchange of information have existed between the two countries since 1949," said Dr. Clinser, "the American public knows little about how the daily lives of the Chinese are affected in terms of the country's new foreign and domestic policies concerning modernization."

The nursing dean notes that nearly one-fourth of the world's population lives in the People's Republic of China. Via improvement in health care services, education, trade, science and industry, she says, the Chinese are now emerging as a nation with a significant future role in world affairs. "The world is much smaller than we think," Dr. Zinser concedes. "It's time we all gained a better insight into each other's daily world."

She reports that the tour was "exciting" since the group saw, from a firsthand basis, how the Chinese have changed their lifestyles from the early days of the cultural revolution during 1966-76. Four areas of modernization are now under way in the fields of science, technology, industry and agriculture. "People are no longer forced to work on farms and let their world of intellect stand still," she explains.

Dr. Zinser says Chinese towns, communes, factories, farms and schools are all bustling with activity now. "This atmosphere of perpetual participation seems to have a special flavor about it," she notes. "It seems as if the Chinese feel a sense of commitment toward helping themselves and their country. It shows in their attitudes about both work and play. It's as if they have a mission to mobilize their resources and modernize for the betterment of all."

The dean's tour group virtually "swept" the country in terms of visiting a variety of places. She says for the most part, and if there was time, the group was allowed to see what they requested. She never felt the Chinese were hiding anything nor that the group was shown only "showcase" material.

"Our escorts went out of their

1

way," she reflects, "to let us see as much as possible. They were set on showing us a good time in the same manner we would do for any visiting friend in America."

Dr. Zinser particularly enjoyed viewing the health care services such as clinics and hospitals. She says that health delivery services, if only composed of a physician and nurses or even the "barefoot doctors," exist at the majority of factories, communes, schools and within each neighborhood clustering. The hospitals, she adds, were not as modern as here, nor did they have various specialized services. But they did appear to have excellent staffing, she noted, particularly in terms of the quantity of doctors and nurses available.

She acknowledges that the tour group also received an orientation to the combined utilization of Chinese and Western medicine. Hospitals and clinics frequently provide for health care management via a mixture of Western medicine, herbal treatments and/or acupuncture. And the patient is generally given the choice, she says.

bays. Dr. Zinser was fascinated with her introduction to acupuncture She even brought home an acupuncture doll which depicts how the body is mapped out for specific treatments. She says historically, the Chinese have used acupuncture for centuries. The knowledge and practices available have probably been accumulated through trial and error, she adds. And apparently little scientific basis is known about the practices. However, with a focus on modernization, China is searching to understand the scientific basis of acupuncture through research and special institutes.

The dean recalls seeing a film on acupuncture in which a woman with a cardiac birth defect, received four hours of open heart surgery with acupuncture. Apparently, says Dr. Zinser, acupuncture allows for elimination of anesthetics thereby decreasing many of the risks associated with surgery. It is 90 percent effective in head and neck surgery.

She contends via her personal introduction to the subject that whether or not a patient "believes" in acupuncture has no effect as to whether or not the practices "work." She also suggests that it is really not known if or how the central nervous system is involved, or other unknown mechanisms.

The nursing dean also points out that she saw some of the well-known "barefoot doctors" at work in the communes or farming areas outside of the larger communities. She says they are both men and women who are trained for brief terms by the fully trained physicians.

These "barefool doctors" even seem to have a continuing medical education system, adds Dr. Zinser. A physician from a community hospital or clinic nearby is assigned to a certain number of "barefoot doctors." These physicians, in turn, periodically visit their satellite-type health care operations to check up on difficult cases or to provide for more instruction for the "barefoot doctors."

Whatever practice of medicine the Chinese might receive, they are guaranteed health care management and health insurance. All gross income from

٢

Elisabeth Zinser

all individuals, no matter what their line of work, goes into a national pool from which services such as health care are derived. Their actual salary then is small compared to our standards, where we "purchase" such services from our income.

'The Chinese also have four other "guarantees" in their system: a job, education, a place to live, and, a decent burial. Since 1978, says Dr. Zinser, they have begun looking at new "rights," such as the right to own a home, to claim inheritance, to strike, to practice religion or atheism, and to complain about an elected official without fear of reprisal.

The dean notes that the Chinese have a special pride in their jobs. The general worker, the peasant, and the soldier are primarily "bhonred." The Chinese attitude toward these three groups is epitomized by the respect shown the individuals by all age groups. Children learn from their first days at school to acknowledge the contribution of these workers. Frequently the workers are selected for special recognition and to serve as models.

Of course, affirms Dr. Zinser, certain workers or professionals receive higher salaries than others, such as physicians. But, she adds, little discrepancy exists between the salary level of all workers. All salaries are also incredibly lower than those in this country.

Probably the majority of women in China hold jobs, says the dean. They seem to have the choice to work or remain at home. They are now thoroughly organized and mobilized through an intricate network, the All China Women's Federation, a co-sponsor of the tour group.

The Federation is a legitimate organization of the national government, according to the dean. The group has identified particular social, cultural, and educational problems of the Chinese women. Evaluations have been made concerning just what is needed to elevate the quality of life for women, says Dr. Zinser. In fact, branches of the Federation in communes, factories, and neighborhoods are continually at work to improve the lifestyle of women.

"This liberation movement for Chinese women," adds the dean, "demands a major shift in attitude. For centuries Chinese women were totally subservient to everyone else. They were forced to first honor and work for their fathers, then their husbands, and then their oldest sons. Often daughters were sold as slaves when families were poor."

Some of the older Chinese women, notes Dr. Zinser, can still be seen with evidence that their feet were bound. But today, the women have more equal opportunities for education, jobs and particularly for decisions regarding marriage. Women are now pampered during periods of menstruation, pregnancy, maternity and lactation. They always get 57 days off for maternity leave.

Family planning also ranks significantly high as a new governmental policy says the dean. The government strongly advocates one child per family, although two are tolerated. And all families, no matter the number of children, are provided with essentially the same amount of living space unless they live as an extended family with grandparents.

Dr. Zinser and the tour group also learned about the general operation of neighborhood life. She says that with all the people in China, thousands of neighborhood clusterings exist. And an elaborate network is set up in each one.

She explains that the people within each clustering have easy access to such services as schools, day care centers, factories, shops and health care centers. She says that children generally spend the majority of their time in school or at "children's palaces" in the evening where, again, education, cultural and play activities are available. No one locks their doors. There are telephones. No one owns a car. But hundreds of buses and thousands of black bicycles are used for transportation.

And via the neighborhood system, the Chinese primarily monitor their own civil cases since their legal system is relatively underdeveloped. Everyone generally seems to know everyone's business, says Dr. Zinser. If trouble seems to be brewing in a particular family, then someone from the neighborhood steps in to help settle the matter.

The dean adds that children are seldom looked upon as being "delinquent" if they get into trouble. Punsishment in any shape of form is rarely considered. If children should fail to settle down or get into "real" trouble, they are sent to a work-study camp. Dr. Zinser says they are simply viewed as having been under the "wrong influence," not loved enough by their families, or lacking direction for the future. China's approach is "reeducation" into the right way of life.

education" into the right way of life. All in all Dr. Zinser thoroughly "relished" her venture to China. While there are basic differences between China and the U.S. in culture and beliefs, Dean Zinser came to respect China's achievements, when reviewing them in the context of their society and not measuring them against our society. Her visit introduced her to a variety of Chinese ranging from the 90-year-old vice chairperson of the National People's Congress, Madam Soong Ching Ling, to little children who sang for the tour group. She found the Chinese exceptionally warm and outgoing, candid, vulnerable, and almost child-like. Her experiences renewed her faith in the values of friendship, a relationship that will outdistance stereotypes every time.

# 'College to Careers' conference involved alumni

How to project a professional image; how to interview successfully; how to balance a marriage and two careers; how to finance the move from college to career; and how to move toward career horizons,... these were the topics that brought an audience of approximately 200 to the conference, "Transitions; College to Careers," sponsored by the Society of Women Engineers on the UND campus in mid-November.

Corporation representatives, many of them UND alumni, were involved as panel members and speakers, as they presented their insights into these im-portant aspects of career development during the two-day conference.

Following a welcome by Alan G. Fletcher, dean of the UND School of En-gineering and Mines, a session itiled "Projecting a Professional Image" pre-sented participants with examples of proper attire for both men and women while interviewing or on-the-job. UND engineering students presented the ex-amples in this session moderated by Myra Souby, president of the UND student section of the Society of Women En-gineers. gineers

The session, "Interviewing: Re-ray and company recruiters including decruiters' Viewpoint," was made up of a panel of company recruiters including decruiter for the Clark Equipment Co. Method Division, Gwinner, N.D.; Larry Yee, from the staffing and employee re-sources department at 3M, St. Paul, Minn, Diana Naddy, employee relations administrator for Boise Cascade Paper Group, Portland, Ore.; and Richard North, UND's career planning and place-mod director, discussing what recruiters book for during a interview. LeeAnn Boushley, a senior in chemical engineer-understant of the Board.

Three married couples comprised the panel for the session "Marriage and Careers," discussing how they personally balance a marriage and two careers.

Panel members included Kurt Hill-man, '71, a graduate in geological engin-eering from Cavalier, N.D., who is em-ployed as a production engineer with the offshore district office of Texaco in Morgan City, La., and Diane Sanderson Hillman, '71, a chemical engineering graduate from Rugby, N.D., who is cur-rently a production engineer with the U.S. East Offshore Gulf of Mexico District of Texaco, also in Morgan City, La.; R. Lee Olson, '73, a graduate in accounting from Langdon, N.D., currently a C.P. Av with Drees, Bredemeier, Riskey and Nordell in Grand Forks and Brenda' Shannon Olson, a senior in Chemical engineering from Langdon, N.D., and Ken Mentz, '76, a history graduate from Minot

### Logo . . .

(continued from page 1)

"North Dakota," since statehood did not come until six years later.

Robertson said cash prizes will be awarded for the top submissions in the logo design competition. The best entry earns a \$300 prize, and there also will be a \$100 prize for the second best entry, and \$25 awards for the four next entries.

There are no restrictions on the content of the proposed logo, he said, although en-trants may wish to make use of the thought, "By the light of knowledge, we read the laws of life." This motto, chosen as the theme of the loubt anniversary ob-servance, was written by retired UND English Professor F. Y. St. Clair, who now resides in Tucson, Ariz.

Any person living in the United States may enter the logo competition, and there is no entry fee or limit on the number of en-tries. Each entry must be submitted before March 1, 1960, as a mounted black-and-white photostat with a 10 by 12 inch image size image size

Entries should be mailed to the Depart-ment of Visual Arts, Hughes Fine Arts Center, University of North Dakota, Grand Forks, ND Sat02. The department is coor-dinating the contest.

Entries will be judged by Russel Mroc-zek, chairman of the Division of Design at the Minneapolis College of Art and Design. Entries will not be returned, and the win-ning design will become the property of the University of North Dakota.

N.D., who is currently a student at William Mitchell College of Law and a student attorney's Office in St. Paul, Minn., and Deb Brooks Mentz, '77, a graduate in electrical engineering from Jamestown, N.D., who is an associate logician with Sperry Univac, also in St. Paul.

The panel moderator, was Mary Beth Simenson Mallo, '78, a chemical engineer-ing graduate from Wimbledon, N.D., and currently a chemical engineer with the engieering service division field engineers of E.I. duPoint in Parkersburg, W.Va. Mallo is married and her husband is also a chemical engineer with duPont.

During the session "Finances - Getting Started," financial topics including credit, insurance, banking services, short-term loans for interview trips and expenses involved with setting up an apartment or home, and fringe benefits. Members of the panel included William Connelly, president and chairman of the board for the First Bank of North Dakota - Grand Forks, and Larry Yee, from 3M in St. Paul, Minn. Shan Kragness, a junior in chemical engineering from Walcott, N.D., served as panel moderator.

Four UND alumni comprised the panel for the "Career Horizons" session, giving insights into their specific engineering areas — bio-medical, sales, off-shore drilling and education.

Panel members included Barbara Tischart, '77, a mechanical engineering graduate from Red Lake Falls, Minn., who is a technical sales engineer in the sales and marketing office of the Trane Co. in Louisville, Ky. Peter Berntson, '77, an electrical engineering graduate from Williston, N.D., a design engineer in ad-vanced products development with Med-tronic, Inc., in Minneapolis, Minn.; Diane

UND alumni participating in the "Transitions: College to Careers" conference included, left to right, Peter Berntson, Barbara Tischart, Mary Beth Simenson Mallo, Vicki Morast (chem eng., '79), Donald Naismith, Deb Brooks Mentz, Ken Mentz, Kurt Hill-man and Diane Sanderson Hillman.

Sanderson Hillman, with Texaco; and Donald P. Naismith, '53, '59, a graduate in mechanical engineering from Lakota, N.D., who received his Ph.D. in nuclear engineering from lows State University and who is currently the chairman of the mechanical engineering department at UND.

Peggy Herbeck, a senior in chemical engineering from Grand Forks and secre-tary of the UND section of the Society of

Women Engineers, served as panel moderator

This year marks the fifth anniversary of the chartering of the UND student section of the Society of Women En-gineers. In recognition of this event, and as part of the conference, LeEarl Bryant, senior engineering executive for Rockwell International Corporation of Pittsburgh, Pa., spoke to those attending the anni-versary banquet on the subject of career goal setting.

### United Features executive donates to Austin practical journalism fund

Keith Anderson

Keith D. Anderson, '64, says he has a lot thank recently retired journalism to thank recently in professor Al Austin for.

Anderson recalls a Sigma Delta Chi (professional journalism society) meeting Austin attended in San Francisco, Calif., seven years ago, when he was asked if he knew anyone who would fit a job opening at United Feature Syndicate.

Austin proceeded to call Keith An-derson, who traveled to New York for an interview, and was then offered the job.

Anderson has never forgotten that favor, and when he returned to his alma mater for Homecoming 1979 – specifically for the Al Austin Recognition Dinner at-tended by more than 300 of Austin's friends – he presented a \$1,000 check to the Uni-versity of North Dakota Foundation. The money was placed in the Al Austin Practical Journalism Fund, and will be used to support student trips to various newspapers in North Dakota. used to support student tri newspapers in North Dakota

A native of Hallock, Minn., Anderson was recently named a regional sales vice president for United Feature Syndicate

and Newspaper Enterprise Association. He currently represents the company in Alaska, Hawaii, Iowa, Michigan, Min-nesota, North and South Dakota, Wiscon-sin and Illinois, in addition to the Canadian provinces of Alberta, Manitoba and Saskatchewan.

Before joining United Feature Syn-dicate as a midwest sales representative, Anderson was press secretary for U.S. Sen. Quentin Burdick of North Dakota, and he served as personnel director and special assistant to the N.D. state tax com-missioner for a time also er for a time

Vern Keel, chairman of the journalism department, said, "The Department of Journalism is indeed grateful to Mr. An-derson for his generous gift. It will enable journalism students to participate in field trips to newsrooms across the state for the 'hands-on' experiences necessary in fur-thering their journalism education."

Others wishing to contribute to the Al Austin Practical Journalism Fund can do so by sending a contribution to the UND Foundation, restricted to the Austin Ac-count.

education in this basically rural region,

education in this basically rural region, and concerns about those issues; to establish a base of communication among individuals in this region, who share those concerns; and to provide those concerned individuals with information, inspiration and strategies to develop, maintain and enhance arts and education programs that will contribute to the cultural life of the people in the Northern Plains.

John Rogers, dean of the College of Fine Arts at UND, and Vito Perrone, dean of the Center for Teaching and Learning, are spearheading the project, with assistance from 16 University faculty, staff members and 26 others.

Anyone interested in attending this

### Second arts, education festival planned at UND

The University of North Dakota will be the site of the second Northern Plains ARTS and EDUCATION Festival, Jan. 27-30, 1980. The theme is "The Arts — Es-sential to Education and Life."

Supported by the National Endowment for the Arts, a federal agency, and the North Dakota Alliance for Arts Educa-tion, the festival is co-sponsored by UND's College of Fine Arts and the Center for Teaching and Learning.

The Northern Plains ARTS and EDUCATION Festival 2 will bring together artists, arts educators, arts ad-other interested persons from throughout the Northern Plains, along with nationally recognized resource persons, to address the issues of arts and education in our predominantly rural area. UND adumni in-terested in or involved in the arts or arts education are encouraged to attend. This festival is intended as a follow un to the festival is intended as a follow up to the

first Northern Plains ARTS and EDUCA-TION Festival, which took place in April 1978.

The Northern Plains has been defined as the states of North Dakota, Minnesota, South Dakota, Iowa and Montana, along with the Canadian provinces of Manitoba and Saskatchewan.

A steering committee comprised of per-sons from each of the institutions of higher education in North Dakota and represen-tatives from each of the other states and provinces is working to plan the program. Both arts events (in creative writing, dance, music, theatre and visual arts), and a combination of presentations, panel discussions and workshops, will be em-ployed to celebrate what can be (and has been achieved in the arts and education in this region.

### Objectives of the Festival are to clearly identify the issues of the arts and

Anyone interested in attending this festival should begin making plans now to be in Grand Forks Jan. 27-30, 1980. A ten-tative registration fee has been set at \$30. Program information will be available in the near future from the UND College of Fine Arts, Grand Forks, ND 58202. 

# UND professor named 'Outstanding Young Woman'

Dr. Sharon Carlson Wilsnack, associate professor and director of preclinical curriculum in psychiatry and behavioral science with the UND School of Medicine has been named as one of the Ten Out-standing Young Women of America for 1979. The announcement and presentation was made on Nov. 19 at the Capitol Hilton in Washington, D. C.

Earlier, Dr. Wilsnack was selected as North Dakota's Outstanding Young Woman-of-the-Year for 1979. She, along with women representing each of the other 49 states, was considered for the Ten Out-standing Young Women of America awards. Dr. Wilsnack was nominated by Dr. Russell Gardner Jr., UND professor of neurosciences and head, division of psychiatry and behavioral science.

The Outstanding Young Women of America program is sponsored annually by leaders of women's organizations, and it honors young women between the ages of 21 and 36 for civic and professional achievement. Dr. Wilsnack's biography and record of accomplishments will ap-pear in the 1979 awards volume – "Out-standing Young Women of America."

Dr. Wilsnack has conducted research and published widely on the subject of alcohol abuse and alcoholism. She has received numerous grants to pursue research in these areas. She currently serves as a consultant for the Prevention Grant Review Committee for the National Institute on Alcohol Abuse and Alcoholism.

A Woodrow Wilson Fellow when she was at Harvard, Dr. Wilsnack is currently a member of the UND President's Com-mittee on Chemical Use and Abuse and is the North Dakota Psychological Association's representative to the Com-mittee on Women in Psychology of the American Psychological Association.

Speaking about her responsibilities as preclinical curriculum director at UND, Dr. Wilsnack points out that special im-portance needs to be paid to training the future new breed of primary care physicians. 'It's vitally important today,' she says, ''for medical students to un-derstand the influence of psychological, social, and cultural factors on an in-dividual's state of health.''

Many medical educators, she says, feel that today's doctors are technically and expertly trained to treat diseases but not the "whole person." She says that the behavioral science movement in medical education aims to "get the focus back on understanding the individual 'patient' as a person

"Medical students, from the day they walk into class, should always keep in mind and develop a respect for all the psychological environmental influences which can not only affect their patient's behavior and health status but also their own." Young physicians, she explains, even before having total responsibility for patient care must also learn to deal with their own behavior.

"Medical students," she notes, "also need help in preparing to deal with a num-ber of emotionally sensitive issues in medicine. The more aware they can become of their own attitudes and feelings toward these difficult issues such as death, terminal illness, or discussing sexual problems with patients, the better chance they have of being comfortable with these issues as future physicians."

After receiving an undergraduate degree from Kansas State University, Dr. Wilsnack studied in Germany as a Fulbright Fellow. Returning to the United States, she entered Harvard University receiving both her M.A. and Ph.D. While at Harvard, Dr. Wilsnack was on the staff of the Massachusetts Mental Health Cen-ter where she was a supervisory psychologist and associate in psychology at Harvard Medical School.

In 1974 she was named director of the Regional Alcoholism Rehabilitation Program at the South Central Community Mental Health Centre in Bloomington, Ind., and also adjunct professor at In-diana University. She has been associated with projects on Alcoholism Education and Women's Health Issues, and has received research grants and contracts from the American Heart Association, National In-stitute on Alcohol Abuse and Alcoholism, and the Distilled Spirits Council of the United States.

Sharon Wilsnack

### Sigma Chi's earn chapter award

The Beta Zeta chapter of Sigma Chi fraternity was recently selected as a win-ner of the Peterson Significant Chapter Award for the 1978-79 academic year, ac-cording to Craig Bauley, UND chapter president and Robert Schwartz, UND Greek adviser and assistant dean of students.

Presented to the UND chapter for the sixth time, this highest award which may be bestowed upon an undergraduate chap-ter of the Sigma Chi fraternity recognizes chapters "whose achievement each year is above average and "significant" in all areas of major endeavor," Schwartz noted. noted

A plaque and a \$50 check payable to UND for scholarship or scholastic activity were presented to chapter president Bauley at the 1979 Leadership Training Workshop held at the University of Nor-thern Illinois in DeKalb, Ill.

Named for a past grand consul of Sigma Chi, Dwight J. Peterson, the award recognized the UND chapter for its scholastic standing on campus, financial stability, graduating rate per class, in-volvement in campus activities and awards or special recognitions on cam-nus pus

According to Bauley, the award con-tributes to "higher quality among Sigma Chi chapters nationally," and this year, from among 174 chapters, 50 chapters were presented the award.

# News notes/Alumni of 1900s-1972

### 1900s

Laura C. Gretzinger '06, is a retired high hool teacher. She lives in Fargo, N.D.
