### **World Trade Center Artists Exhibit At Museum**

"Re-Imagining New York," an exhibition by nine landscape painters who lost their studios in the World Trade Center tragedy Sept. 11, opens at the North Dakota Museum of Art **Tuesday, Aug. 13**. Five of the nine artists in the show will come to North Dakota for the 6 p.m. opening that day. The exhibition continues through Sunday, Sept. 29.

On **Wednesday, Sept. 11**, the Museum will extend its hours to 9 p.m. as musicians from the region will present contemplative music from noon until closing. There is no charge due to the generosity of the musicians and the public is encouraged to come and go at will.

The nine landscape artists, Vanessa Lawrence, Megan Craig, Nancy Friese, Peter Ruta, Sjoerd Doting, Stan Friedman, Karin Batten, Nedra Newby, and Ellen Korbonski, shared an expansive studio on the 91st floor in the northeast corner of the World Trade Center, courtesy of the Lower Manhattan Cultural Council's Studioscape Residency Program. For three months, their easels were to stand at the east and north windows as the artists struggled with one of the most daunting cityscapes on earth.

Museum Director Laurel Reuter, worried about her friend, North Dakota native Nancy Friese, who shared the studio on

the 91st floor.

Days later, an e-mail made it through. Friese was accounted for; the paintings were gone. Friese wrote, "I feel so numb, having worked so hard . . . over twenty paintings completed. And I feel so small, mourning my paintings, missing my brushes when others lost everything." Struck by the universality of disaster, Reuter was reminded of the flood that devastated her own community, Grand Forks, in 1997. She had seen the same guilt felt by those who didn't lose everything. She also remembered that those who continued working moved through the experience with greater peace, albeit accompanied by similar loss and exhaustion. Her friend needed to go back to painting. Thus the idea of the exhibition was born, an exhibition as much about survival, and memory and loss, as about painting. Friese agreed to curate the show in which the artists would re-imagine New York City. The show is the synthesis of the struggle first to transform into art one of the most formidable landscapes on earth, and then to remember, re-imagine, and reclaim that view which no longer exists.

Ruta, the oldest of the painters, felt the historical challenge. "When it came to painting the view from the 91st floor, I felt I was on my own – without artistic company, antecedents, or traditions. Who else in the 20th century (now shading into the 21st) had painted the city whole? I had to start from scratch."

Friese chose to step back into the room and to frame fragments of the city within the Trade Center's window casements. These slices of cityscape are crowned with billowing, shifting, life-filled clouds befitting the granddaughter of a famous Plains weatherman, the legacy of a child raised in homes where dinner table conversations were dominated by the weather.

Doting, an artist from Holland, humanized the vast city of New York with less turbulent skies and meandering waterways, reminiscent of the Dutch cityscapes of earlier times. He completed four major paintings over the course of his months in his Tower studio. Since Sept. 11, he has painstakingly recreated those paintings, one of which will be finished in time for the exhibition.

Friedman, for decades a painter of Manhattan cityscapes, found that seeing familiar places from a new, aerial point-of-view was both a gift and a challenge, especially at night when the city became "a universe of moving and stationary stars, nebulae of differently lit neighborhoods and shimmering river reflections." Friedman lost eight paintings, saving only two night scenes, carried home a few days before. On the morning of Sept. 11 he went to his 25th floor apartment window and as the towers went down, he began to draw, capturing the collapse of the building. For the next four months, he couldn't paint at all.

Batten was in shock for six weeks but by November forced herself to go back to painting. Using photographs and drawing from her memory, she began to reclaim her paintings.

Like so many artists in New York, nearly all of the painters in "Re-Imagining New York" support their artistic lives with other careers. Nedra Newby is a public school art teacher and Ellen Korbonski, a film maker and a painter who was born and raised in California, works as a book designer.

"Re-Imagining New York" is underwritten by Xcel Energy with additional funding from the Minnesota State Arts Board through an appropriation by the Minnesota State Legislature and a grant from the National Endowment for the Arts. Additional support came from the City of Grand Forks through a grant from the North Valley Arts Council.

The Museum is open from 9 a.m. to 5 p.m. Monday through Friday, and from 1 to 5 p.m. weekends. There is no admission charge. The Museum is located on Centennial Drive on the campus of the University of North Dakota. --

### **Prairie Public Broadcasting Will Transmit From Two Additional UND Frequencies**

North Dakota Public Radio, the state's National Public Radio-affiliated statewide network, began simulcasting its signal on two additional UND frequencies Aug. 1.

The University discontinued its own broadcasting from KFJM FM (90.7) and KUND AM (1370), known together as "Northern Lights Public Radio," July 31.

Prairie Public Broadcasting's board of directors approved the simulcasting, said James Shaeffer, dean of continuing education. The board also authorized its staff to explore other possible collaboration with UND in regard to KUND AM and KFJM FM. Prairie Public Radio has broadcast from UND's third licensed frequency, KUND FM (89.3), since 1998.

The decision to end UND's direct involvement in radio came after nearly five years of keeping Northern Lights Public Radio on the air after the University cut funding to public radio following the 1997 flood.

"Fund raising for public radio is a challenge," Shaeffer said, "in a market served by both Minnesota and North Dakota public radio networks. To continue would require that UND reallocate a significant annual budget towards operating costs, as well as prepare to cover needed capital improvements."

The stations first found themselves at risk in the early 1990s when the federal government drastically reduced its support of public radio. The Flood of 1997 was also devastating.
