Summer Enrollment Reaches New Peak

Summer session enrollment at the University of North Dakota passed the 1,600 mark with registration for the second four-week session which began Tuesday.

Sixty-eight persons registered for the four-week session. Last year's total was 38.

Included in the 68 are 35 undergraduate and 33 graduate students. There are 43 men and 25 women.

Miss Ruby McKenzie, registrar, said the 68 added to the previous summer enrollment of 1,538 brings the total to 1,606, an increase of 133 over last year's summer session enrollment of 1,473.

This is the second year that two four-week sessions have been offered in addition to the regular eight-week period. Dr. C. J. Hamre is director of the summer session, which concludes with commencement August 5.

NEW ON KFJM

A new program, "Tactics of Communism," may be heard each Monday at 3:45 p.m. on KFJM, the campus radio station.

NUMBER 6

School Administrator Sees Professional Gains in State

By SIG KRISTJANSON

Distinct progress in professional growth has been made by North Dakota teachers in the last 10 years, thinks Minard McCrea, president of the North Dakota School Administrators' Association.

Mr. McCrea is at the University of North Dakota for the tenth annual administrators' conference which opened Monday and continues through Friday, July 21.

"The high schools are loaded with young men and women with masters degrees and many are working toward the doctorate," he said.

"But we must have the right kind of school district reorganization to provide a minimum enrollment of at least 100, before we can iron out the 25 year spread between the educational offering of the small schools

as compared with the larger better staffed and equipped schools."

The theme of the administrators' conference workshop this year is "Building Effective School Board Policies."

"The crux of running a school system effectively is in the written school board policies, which really constitute the manual of operations for the school," said Mr. McCrea.

"Under an effective set of clear-cut, written policies the administration is able to work harmoniously with the rest of the school personnel to achieve what should be the objective of every school: the educational progress and general welfare of the individual students.

"Conferences and workshops of this type help to clarify and distribute new educational ideas, there-

cation, and Miss Clara Pederson, assistant professor of elementary education.

Center — Dean M. A. Cushman hands award to William Wettergren.

Right — Mr. D. B. Allen also handed award by Dean Cushman.

Mr. Wettergren and Mr. Allen are

state school board association executive secretaries; Mr. Wettergren for Minnesota and Mr. Allen for North Dakota. Both men were honored by presentation with a scroll for their dedicated service to the children of the public schools of their states.

National Honorary Education Fraternity, Phi Delta Kappa, To Initiate 38 Members

Alpha Theta chapter, Phi Delta Kappa, national honorary professional education fraternity for men, has elected 38 new members.

Initiation is scheduled for Thursday, July 20, at 4 p.m. in the Education building auditorium.

The large number elected to membership reflects the University of North Dakota's continuing increase in enrollments in graduate summer session programs, according to Ron Lien, PDK president, a UND graduate teaching assistant.

Following initiation ceremonies the new members will be feted at a banquet in the Student Union at 6:30 p.m. Dr. Leonard J. West, Southern Illinois University, associate editor of Delta Psi Epsilon, research quarterly in business educa-

tion, will speak on "Teaching Machines."

Prior to their business meeting, PDK members heard from Perry Lusk, Minneapolis, Minn., regional director of the National Conference of Christians and Jews, and associate director of the Institute for Human Relations now in session on the UND campus under direction of Dr. William L. Cash, Jr., psychology department.

Tracing the growth of the National Conference of Christians and Jews, Mr. Lusk pointed out that it operates as a civic rather than a religious organization, and seeks to provide an educational program on a broad area which stresses the moral and spiritual values of the joint Hebrew-Christian traditions.

University School of Medicine Transfers 38 Students to Four Year Programs

Transfer of 38 sophomore medical students from the University of North Dakota School of Medicine to four year medical schools throughout the country has been completed, according to Dean T. H. Harwood.

Schools and the students transferring to them are:

Baylor University College of Medicine, Houston, Texas: Delbert Nelson, Ellendale.

Harvard Medical School, Boston, Mass.: Reed Keller, Rugby; Richard Hicks, Grand Forks; Robert Rawitscher, Williston; David Swenson, Bismarck, and Curtis Hill, Fargo.

State University of Iowa, College of Medicine, Iowa City, Iowa: Dale Oien, Edmore; Robert Boerth, Bismarck, and Erwin Wittenberg, Bismarck.

University of Kansas School of Medicine, Kansas City, Kansas: Malcolm Murdock, Grand Forks; Hadley Verwest, Finley, and Darrel Skarphol, Souris.

Marquette University School of Medicine, Milwaukee, Wis.: Jerome Kwako, Bismarck, and Richard Stone, Grand Forks.

University of Minnesota School of Medicine, Minneapolis, Minn.: Donald Person, Fargo; Adolf Walser,

Grand Forks; David Monson, Climax, Minn.; Richard Johnson, Rugby, and Martin Evenson, Grand Forks.

University of Nebraska College of Medicine, Omaha, Neb.: William Henry, Fargo, and Gerald Hoffarth, Langdon.

Northwestern University Medical School, Chicago, Ill.: Donald Hagen, Fortuna; William Heiser, Dickinson; Kent Sack, Reeder; Glen Johnston, Mayville, and Stefan Laxdal, Gardar.

University of Pennsylvania School of Medicine, Philadelphia, Pa.: Gary Cody, Jamestown.

Southwestern Medical School, Dallas, Texas: Earl Peterson, Norwich.

Temple University School of Medicine, Philadelphia, Pa.: Edward Johnson, Finley, and Walter Miller, Coraopolis, Pa.

University of Washington School of Medicine, Seattle, Wash.: Donald Foss, Maddock; Donald Hegge, Elgin, and Robert Jacobson, Elgin.

University of Wisconsin School of Medicine, Madison, Wis.: Stephen Dippe, Wesley Sondreal and Ronald Bergom, all of Grand Forks; Clem Mattson, LaMoure, and Allen Hill, Ellendale.

Mr. Lusk said the National Conference was organized in 1928 to combat prejudice and bigotry, such as that demonstrated by the Klu Klux Klan in the presidential election of that year when Al Smith, New York governor, was a candidate for president.

Founders included Charles Evans Hughes of the United States Supreme Court and Newton D. Baker, former Secretary of War, who proposed the organization as a means of seeking to pay more than lip service to the spirit of democracy.

From one employee, the organization has grown to the point where it employs 52 regional directors. Its greatest growth came just before and during the World War II era when the persecution of racial and religious minorities by Hitler's Nazi government in Germany pointed out the need for improved human relations and understanding.

"Workshops on college campuses in summer sessions have grown from one at Colorado College in 1941, to more than 50 each summer, as the Conference seeks to bring more and more people to awareness that there are problems in the area of human relations and thus seek to promote desirable behavioral changes," he said.

Two UND Students On Geology Trip

The University of North Dakota is one of 15 colleges and universities represented at Miami University's annual geology field course in the Wind River mountains of Wyoming.

Students from UND in attendance are Charles Meldahl of Sharon and John Merrell of Swastika, Ont., Canada.

Field station for the students, from 11 states and three nations, is at Timber Line ranch near Dubois, Wyo. Within a radius of 10 miles from the ranch, students may observe sedimentary rock from Cambrian to Pleistocene periods. Glacier scars have exposed a wide variety of fossils and folds.

After Use and Abuse Record Setting Jet Will Be Dismantled

Speedster at end of last trip

The old, battered jet aircraft that was parked in front of the University of North Dakota Armory for the past year and a half has been moved to the rear of Chandler Hall where it will be dismantled.

After being used as a signboard, juvenile gym and snowball target, the plane will finally be retired from Air Force inventory.

The plane was acquired through the efforts of the department of air science at UND from the Air National Guard Fighter Group at Fargo, N. D.

It was of particular interest because it was the holder of a local speed record.

In the summer of 1956 the plane was flown from Fargo to Washington, D. C. in one hour and 40 minutes by Lt. Col. R. M. Johnson and Major A. P. MacDonald, members of the guard unit. Calculated speed during the flight was 750 miles per hour.

Prior to being shipped to UND the plane was stripped of its equipment. The right wing was amputated and hinged so that it could be swung up to provide more clearance while under tow. It had been used extensively as a display in Fargo.

While at UND it became a weatherbeaten shell, the target of pranksters, children and sightseers.

The scholarship will be added to two offered by the Fargo Forum, one by the Grand Forks Herald and one by the UND undergraduate chapter of Sigma Delta Chi, professional journalistic society, for freshmen in journalism. Six other journalism scholarships are offered to upper classmen and students from other colleges transferring to UND to major in journalism.

LOT FOR SALE

Residential building lot, 80 x 150 feet, in rapidly developing area near University and near elementary school. Several homes are under construction or presently occupied in the immediate area.

William Rintelmann. Phone: Office Ext. 333; Home 772-9123.

Jarrett Awarded New Scholarship

John Jarrett, Grand Forks, a June graduate of the University of North Dakota, has been awarded the first annual scholarship of \$250 established at UND in memory of the late Clarence Bonzer, a former athlete and 1910 graduate of the University.

The announcement was made by J. Lloyd Stone, executive vice president of the UND Alumni Association.

The scholarship was established by a son, Dr. John B. Bonzer, and daughter, Mrs. Willis Shepard (Delores Bonzer), through Dr. Willis B. Shepard, a son-in-law and UND alumnus who practices medicine in Eugene, Ore.

In establishing the scholarship, the donors said: "We prefer that consideration be given to students' needs as well as their scholarship. We also favor consideration for worthy students interested in athletics."

Mr. Bonzer, former mayor of Lidgerwood, was a member of the 1908 and 1909 Sioux football teams.

He was engaged in banking, retail and wholesale oil business until the time of his death in 1944. His wife was the former Mae Dickman of Flaxton.

Jarrett, who received a bachelor of arts degree in the College of Science, Literature and Arts, will enter the UND School of Medicine this fall.

The son of Glenn Jarrett, former athletic director at UND, he was a member of the football team for two years. He is a member of Blue Key, national honorary service fraternity, and Sigma Chi social fraternity.

He was a member of the Interfraternity Council, Athletic Board of Control, Follies Executive Committee and Phi Eta Sigma, scholastic honorary fraternity for freshmen men. He served as King Kold Carnival co-chairman last year.

Glenn Jarrett was a teammate of Shepard on the football team of 1928 when Shepard was captain.

Jarrett

Minot Newspaper Offers Scholarship

A \$150 scholarship for a beginning journalism student at the University of North Dakota has been established by the Minot Daily News, according to Alvin E. Austin, chairman of the journalism department at UND.

The scholarship will be awarded to an entering freshman of the Minot Daily news circulation area for the 1962-63 term. It will be based on scholarship, interest and proficiency in journalism, character and need. Applicants must plan to enroll at the University with the intention of majoring in journalism, Austin said.

St. Clair to Judge English Contest

Dr. F. Y. St. Clair, chairman of the English department at the University of North Dakota, has been selected to judge North Dakota entrants in the achievement awards competition of the National Council of Teachers of English. NCTE is a professional organization of about 60,000 members and subscribers at all school levels. The competition, now in its fourth year, recognizes the nation's outstanding high school English students.

The council sends scrolls of recognition to the students and to the English departments who trained the students. Recommendations are sent to colleges and universities that award winners and runners-up be considered for scholarships.

Goal of the council in its new expansion program is to increase the effectiveness of teaching the English language and its literature in the nation's schools and colleges. In addition to furnishing teaching aids such as books, recordings and literary maps, NCTE publishes six professional journals.

A native of Rockland, Maine, Dr. St. Clair received his A.B. cum laude from Harvard College in 1926, his A.M. in 1927 and his Ph.D. in 1931, also from Harvard. He also has done graduate work at the University of Wisconsin.

He taught at Wisconsin and Jamestown college before coming to UND in 1947. At UND he has been chairman of the University Honors Work Committee from its beginning. He has served as secretary and chairman of the State Committee of Selection for Rhodes scholarships since 1948. He is one of the founders of the Westminster Foundation for North Dakota and of the United Campus Christian Fellowship at the University.

DIRECTS INSTITUTE

Duane R. Nedrud, 1950 graduate of the University of North Dakota, was director of a medico-legal institute recently at Kansas City, Mo. Nedrud is an assistant professor of law at the University of Kansas City.

Linguist Comes from Philippines To North Dakota; Misses Mountains

By JOYCE BOLAND

Ten hours of linguistics as an anthropology major at Wheaton College in Wheaton, Illinois began the career of Richard Roe, a staff member of the Summer Institute of Linguistics.

Mr. Roe returned from the Philippines last April after almost five years of pioneer linguistic work and Bible translation work with the primitive Isneg tribe of the northern islands.

The Isneg tribe has a simplified method of picture writing, Mr. Roe said, but has no permanent records. His work has been to complete a grammatical analysis of the verbal language, reduce it to writing, and with an Isneg helper, translate the Old Testament into Isneg.

Born in Philadelphia, Mr. Roe spent most of his youth in New York City. Since he went to the Philippines in 1956, he has been accepted on a social relationship basis as a member of the Isneg tribe. Home has been in a leaf-roofed hut built on stilts and his diet has consisted chiefly of rice and vegetables.

"We become poor and primitive in order that we might win those people to Christ," he said.

This is Mr. Roe's third summer at the University of North Dakota. He

Richard Roe

He'd like mountains.

was a student at the institute in 1954 and returned in 1955 as an instructor in area linguistics, the course he is presently teaching.

When asked for his opinion of North Dakota, Mr. Roe said he thinks it's a very nice country but he wishes there were some mountains. He would like to visit here in the winter time he added.

After further study at the University of Michigan, Mr. Roe will return to the Philippines and continue his translation work of the New Testament into the Isneg language.

Science Research Grant Received

A grant of \$2,680 has been given to the University of North Dakota by the National Science Foundation for support of established research workers' projects or beginning research projects, it was announced by Dr. George W. Starcher, University president.

The grant was given under the foundation's program of institutional grants for scientific activities. Terms of the grant specify the money is to be reserved for mathematical, physical, biological, social and engineering sciences. The grant will be handled through the faculty research committee, Dr. Starcher said.

Amounts allotted each project will be small and will be for sup-

plies and inexpensive equipment, and salaries will not be included, he said.

"This grant is in recognition of the quality of research already being carried on at the University, and is the result of efforts of Dean Hamre and other faculty members who have secured other grants on their own through the National Science Foundation," Starcher said in accepting the grant. (Dr. C. J. Hamre is dean of the UND graduate school.)

Dr. William E. Koenker, chairman of the UND department of economics and faculty research committee chairman, said: "This grant provides a much appreciated supplement to our limited funds for faculty research. It should make possible initiation of various worthwhile new projects which otherwise would have to be denied for lack of funds."

KFJM Adds Weekly Opera Matinee

A weekly "Opera Matinee" has been inaugurated by KFJM, the University of North Dakota radio station.

An opera will be broadcast each Thursday, from 2:30 to 5 p.m., through August 31. KFJM is at 1370 on the dial.

Following is the schedule for the rest of July and August:

July 20—La Boheme by Giacomo Puccini featuring: Victoria de Los Angeles, Jussi Bjoerling, Robert Merrill.

July 27—Fidelio by Beethoven featuring: Leonie Rysanek, Irmgard Seefried, Dietrich Fischer-Dieskau.

August 3—Madame Butterfly by Puccini featuring: Victoria de Los Angeles, Anna Maria Canali, Giuseppe di Stefano.

August 10—Pagliacci by Leoncavallo featuring: Mario Del Monaco, Clara Petrella, Aldo Protti, and Cavalleria Rusticana by Mascagni featuring: Mario Del Monaco, Elena Nicolai, Aldo Protti.

August 17—La Forza Del Destino by Verdi featuring: Mario Del Monaco, Renata Tebaldi, Ettore Vastiniani.

August 24—Aida by Verdi featuring:

Harva Nelli, Eva Gustavson, Richard Tucker.

August 31—Secret of Suzanne by Wolf-Ferrari featuring: Elena Riezzi, soprano and Giuseppe Valdengo, baritone; also scenes from Elektra by Richard Strauss featuring: Inge Borkh, soprano and Paul Schoeffler, bass; and Salome by Richard Strauss featuring Inge Borkh, soprano.

NAMED COUNSELOR

A 1932 University of North Dakota graduate has been elected counselor of the New York Phi Beta Kappa alumnae chapter for a two-year term. Miss Laura C. Christianson, who received a bachelor of arts degree from UND, was named at the annual meeting of the group.

Queen City, Rangers Extend Win Streaks

Queen City and the Rangers are still on top of the University of North Dakota's summer softball league.

Both teams continued their winning ways this week following a disastrous week in which all games were called because of rain.

These games have been re-scheduled as follows:

Wednesday, July 19

Bek Hall vs. Graduates
Rangers vs. Law

Thursday, July 20

Field Mice vs. Law
Medics vs. Graduates

Monday, July 24

Anatomy vs. Bek Hall
Rangers vs. Queen City

Results of this week's games:

Rangers 11, Field Mice 1
Bek Hall 23, Law 14
Queen City 8, Graduates 3
Anatomy 20, Medics 15

The league play-offs, originally scheduled for July 20-21, will be re-scheduled and played next week following completion of all regularly scheduled games.

WINS SCHOLARSHIP

David J. Mersy, a sophomore at the University of North Dakota from Gonvick, Minn., has been awarded the Alpha Phi Omega scholarship for the coming year. He also won the \$75 scholarship last year.

Alpha Phi Omega is a national honorary service fraternity. Its purpose is to assemble men in the fellowship of the Boy Scout oath and law and to develop friendship and promote service to humanity.

Straight A Grades Earned by 31 Students From Seven Colleges for Spring Semester

Thirty-one students at the University of North Dakota earned 3.00 (straight "A") averages for the spring semester, according to Miss Ruby M. McKenzie, registrar. All were enrolled in 12 or more credit hours.

The 31 students, according to colleges are:

Science, Literature and Arts: Eldora Burns, senior, daughter of Mr. and Mrs. Harry Burns, Surrey; Ray A. Dickie, senior, son of Mr. and Mrs. A. B. Dickie, Grand Forks; Frances Frost, sophomore, daughter of Mr. and Mrs. Charles Frost, Lidgerwood; Morley Glicken, junior, son of Mr. Sam Glicken, Grand Forks; Pearl Helm, junior, daughter of Mr. and Mrs. Christ Helm, Drayton; William K. Johnson, sophomore, son of Mr. and Mrs. W. D. Johnson, Minot;

Jean Julseth, senior, daughter of Mr. and Mrs. A. M. Julseth, Lakota; Margaret LaVoy, senior, daughter of Mr. and Mrs. Oliver LaVoy, Fargo; Jane Lein Lehr, senior, daughter of Mr. and Mrs. Melvin Lein, Hunter; James Loos, senior, son of Mr. and Mrs. Donald R. Loos, Grafton; Karen M. Olson, junior, daughter of Mr. and Mrs. E. W. Olson, Minot; and Judith Sturnick Sage, senior, daughter of Mr. and Mrs. K. L. Sturnick, Minot.

Business: George E. Benner, son of Mr. and Mrs. George E. Benner, Grand Forks.

Education: Johnnye F. Bridges, junior, wife of Capt. Garland D. Bridges, Grand Forks; John P. Gray, unclassified, son of Mrs. Stella Gray, Grand Forks; Karen E. Ray, senior, daughter of Mr. and Mrs. Harry E. Ray, Grand Forks;

Romona E. Reisch, senior, daughter of Mr. and Mrs. Leo Reisch, Parshall; Phyllis J. Swanson, senior, wife of Einar M. Swanson, East Grand Forks, Minn.; and Judith A. Wallace, senior, daughter of Mrs. Juliana Wallace, Grand Forks.

Engineering: Bruce Goplen, sophomore, son of Mr. and Mrs. Maynard D. Goplen, Binford; Kenneth G. Harstad, senior, son of Mr. and Mrs. Henry Harstad, Hillsboro; and George A. Plaas, sophomore,

son of Mr. and Mrs. George A. Plaas, Grand Forks.

University College; Roderick P. Bradley, son of Mr. and Mrs. Edward Bradley, Grand Forks; Dennis C. Graves, son of Mr. and Mrs. T. E. Graves, Minot; Lois M. Johnson, daughter of Mr. and Mrs. Irving A. Johnson, Grand Forks; and Barbara L. Kadlec, daughter of Mr. and Mrs. George C. Kadlec, Omaha, Neb.

Law: Timothy Q. Davies, Law 3,

son of Judge and Mrs. Ronald Davies, Fargo.

Graduate: Robert J. Bache, son of Mr. and Mrs. Arnold Bache, Red Lake Falls, Minn.; Lois C. Becklund, daughter of Mr. and Mrs. L. C. Utzinger, Grand Forks; Jack B. Sampson, son of Mrs. Nellie Sampson, Menomonie, Wis.; and Virginia L. Zewe, daughter of Mr. and Mrs. Albert J. Zewe, Duquesne, Pa.

NOTICE

The University Press will close its doors for one week beginning August 7th for a vacation period. The Press doors will be open as usual on Monday, August 14th.

Visiting Professor Gives Views On Educational Methods and Needs

By EMMA ANNE SHANKS

Educators are constantly on the alert for new methods of improving instruction and learning.

One of them is Dr. Leonard West, visiting professor in the department of business education at the University of North Dakota.

"Efficient instructional methods are those in accord with the principles which describe the processes by which learning takes place," Dr. West said.

"Accordingly instructional methods and materials can be evaluated on the basis of the extent of their agreement.

"One important need is to bring educational practices into closer accord with psychological findings and to tear down the iron curtain that exists between the psychological laboratory and the classroom."

Dr. West was born and educated in New York, receiving his Ph.D. at Columbia University. He is at present associate professor, school of business, Southern Illinois University, Carbondale; associate editor for research, Delta Pi Epsilon Journal, and consultant on typing training programs, Perceptual Development Laboratories, St. Louis.

Dr. West has spent five years as research psychologist at the Air Force Personnel and Training Research Center, Chanute Air Force Base, Ill.

He is also known for his numerous publications and journal articles.

Dr. West is a member of the

Dr. West

American Psychological Association, American Educational Research Association, United Business Education Association, Delta Pi Epsilon, Phi Delta Kappa and Kappa Delta Pi.

Spending the summer in Grand Forks are Mrs. West and their four children, Erica, Nicole, Bill and Kenneth. The Wests believe in plain names for boys and fancy names for girls. Erica was named after Erica Morini, the famous violinist and Nicole was named after her piano teacher.

Dr. West's hobby is playing the piano which he studies with his children.

The Wests find the local climate ideal after coming from Illinois where the summer humidity is in the high 90's.

UND Museum Pieces Scattered:

Specimens Survive in Good Shape

By SIG KRISTJANSON

A wine cup made from wood grown on the Mount of Olives, and a 70 pound sample of gold ore bearing small nuggets were once displayed in the University of North Dakota Museum. So says first curator Henry Montgomery's catalog of 1886.

Interviews about the campus indicate that almost all the museum specimens have survived in good condition, though scattered around in the care of various departments.

Energetic collector Montgomery made the museum the showpiece of the University even before there was a classified library. The primary collection and first classification was his.

President LeRond McVey gave the museum a home on the top floor of Babcock hall where for a time it flourished. Montgomery's original gathering increased through gifts from generous patrons.

A sizeable chip of snow white marble collected from the ruins of the Parthenon at Athens was donated by Webster Merrifield. Other rare and valuable things from

The University museum collection contains a marble head of Hera from her temple at Olympia and a terra-cotta statuette found in the Temple of Diana at Ephesus. The paper background is 8½ x 11 inches.

Greece and Rome were also donated by Merrifield.

A stuffed duck-billed platypus from Australia and a mounted kiwi bird from New Zealand are in the biological collection.

"How they came here, I don't know," said Dr. George C. Wheeler, chairman of the department of biological sciences, who is preserving the biological part of the museum collection.

Dr. Wheeler has as much on display in the basement of the Chemistry building as room will allow.

"It is now primarily a teaching rather than a display museum, though the public is welcome," said Dr. Wheeler.

Rare and irreplaceable in the bird collection is a specimen of the vanishing whooping cranes.

"I don't know how it got into the collection or when it was collected; it was here when I came," said Dr. Wheeler.

Preserved intact in the geology department is the mineral, rock, and fossil section of the old museum. Dr. F. D. Holland, associate professor of geology, said the various departments took over care of the museum sections when the top floor of Babcock hall became a World War II barracks.

In the custody of Dr. Elwyn B.

Robinson of the history department is the historical and cultural part of the museum. The photograph of two precious items representative of the classical collection was taken with his help.

Innumerable artifacts and curios of North Dakota history rest in the cases in Dr. Robinson's office, including what appears to be a double handful of human teeth.

Interviews with faculty members disclosed interest in again establishing a museum on the campus.

"I think a museum of natural history would become a center of culture for this area comparable to a library," said Dr. Holland.

Dr. Wheeler expressed his opinion saying, "I would be happy to see a museum on the campus; the University of Colorado has a marvelous one."

Dr. Robinson admitted, "if money could be made available for space and a responsible curator it might become an important department, but it would be expensive."

Pederson and Lucas Appointed to ACEI

Two elementary education instructors at the University of North Dakota have been appointed to committees of the Association for Childhood Education International, a professional organization devoted to the study of children from two to 12 years of age.

Maurice Lucas has been appointed by the executive board of the group to serve as an ACEI center interpreter for 1961-63. He will help interpret the expanded program possible at the group's headquarters in Washington, D. C.

Miss Clara Pederson, assistant professor of elementary education, has been named to the ACEI primary committee representing the Great Plains region.

As a member of this committee, Miss Pederson will be available to groups in the nine state area for speaking engagements and consultative purposes. She will also help plan the study group conference in Indianapolis next spring.

President Starcher To Visit Air Base

Air Force ROTC summer camp facilities at Fairchild Air Force Base, Wash., will be visited by Dr. George W. Starcher, president of the University of North Dakota, August 15-21. He will be accompanied by Lt. Col. Thomas H. McGuigan, professor of air science.

The trip will give University officials the opportunity to examine Air Force equipment facilities, to participate in orientation flights in jet aircraft and to witness training being received by Air Force ROTC cadets.

Five Air Force ROTC cadets from UND will be at the camp during President Starcher's visit.

They are John B. Buchwitz, Minot; Byron H. Evenson, Grand Forks; David P. Hailey, Austin, Texas; William O. Johnson, Enderlin, and Harold T. Sheets, Grand Forks.

UND Flying Club To Meet Tonight; Offers Free Rides

By RALPH R. MOLINARO

Free airplane rides will be awarded to three participants at the Dakota Flying Club's meeting in the University of North Dakota armory at 7:30 p.m., Thursday, July 20.

Vernon Askegard, John Peterson and David Rodewald are planning activities for the meeting.

Prospective members will get a full briefing on the activities of the club. Films of general aviation interest will also be shown.

The club is conducting a membership drive and all interested faculty, students and staff members are urged to attend.

The Dakota Flying Club is a student owned and operated, non-profit activity at UND. Its main purposes are to provide equipment for its members to learn to fly at a minimum cost and to stimulate an interest in aviation.

The club now owns a Luscombe 8E two-place aircraft in which lessons are given. The plane will be on display on the mall south of the new library July 20.

During the summer session Howard E. Perkins of the engineering department is the club's advisor. Captain James O. Hays of the Air Force ROTC staff assists the club during the regular school year.

The club now has 12 active members. During the school year the membership usually expands to approximately 30. Currently the club membership is all male but female participation is welcome.

Officers of the club are: president, Don Moen; vice-president, Russell Josephson; secretary, Lyaal Bjornson; treasurer, Frank Larson; operations officer, Dennis Jorde; training officer, Dennis Nelson, and maintenance officer, Vernon Askegard.

"LIFE" EDITOR

Edward K. Thompson, a native of St. Thomas and graduate of the University of North Dakota, has been promoted to editor of Life Magazine. Thompson has been managing editor of the magazine since 1949.

Science-Math Institute Students Display Enthusiasm for Hard Work

By JOYCE BOLAND

"It's really great!"

These were Jay Muhlhauser's words in summarizing the Science-Mathematics Institute for Talented High School students.

This 16-year-old senior from Beulah, N. D., is doing biology research in the amino-acid absorption of the intestine. Beginning at 7:30, she attends three classes each morning and participates in research from 1:00 to 5:00 each afternoon.

"I have always been interested in science," Jay said, and added that she has been making projects for science fairs since she was in the seventh grade.

After high school Jay plans to attend the University of North Dakota and enter either medicine or bio-chemistry.

Another institute participant is Joyce Tevebaugh, 16-year-old junior from Niskieyana senior high school in Schenectady, N. Y.

Joyce's chief scientific interest is chemistry and she is doing research in the effects of solvent and aging on the acetylation kinetics of chymotrypsin.

"I live in a science-minded community," Joyce says. At present she is planning a project in which she will grow crystals in a super-saturated solution.

This is Joyce's first visit to North Dakota and although she likes it, she thinks it's "slightly flat." The institute has met her every expectation, she says, and she feels it is a goal well worth working for.

Administrator

fore we are pleased to note that this year's enrollment is going to top the 450 mark set last year."

Dr. Archie L. Gray, professor of school administration, is the director of the conference workshop. He is assisted by Mr. McCrea, superintendent of schools at Valley City, and Gerald W. Brekke and Edwin J. Grossman, graduate students in education at the University.

and Joyce Tevebaugh

Each of Joyce's parents hold a Ph.D. in chemistry from Iowa State University. At present, her father is a research chemist with General Electric.

Joyce has not decided where she will attend college, but is sure her major will be chemistry.

Thirty-nine students from 36 high schools in nine states are participating in the six-week institute which began June 18 and continues through July 29.

Recital Scheduled By Music Seniors

The music department will stage a senior recital Friday, July 21 in the Education building auditorium at 8 p.m.

The program will consist of selections by Thomas O'Connell on the trumpet, Donovan Flaagan on the trombone, and Donald Berntsen on the clarinet.

They will be accompanied by Roger Petrich, Roger Buckhaus, and Professor Philip B. Cory.

Those playing in the recital are students of Michael Polovitz, assistant music professor and director of bands, and Robert Van Voorhis, music instructor.
